Part A — Training Organisation User Manual

A1 Introduction to AAICBI

This chapter explains what the AAICBI Ecosystem is and what a training organisation can do with it.

What the AAICBI Ecosystem is

The AAICBI Ecosystem is a web platform from Africa's AI Capacity Building Initiative, organised by Futybills Tech Community. It brings together the people who make digital skills useful: **trainees** who learn, **training organisations** that teach, **employers** who hire, **investors** and **startups**. It runs in a normal web browser on a computer, tablet or phone and can be added to a phone's home screen like an app.

What a training organisation can do

- Create and run **courses** with modules, lessons, assessments, examinations and assignments.
- See which trainees are enrolled, how far they have got and how they scored (**Overview**, **Performance** and each course's pages).
- Design and issue **certificates** with your own logo (**Certificates**).
- Present your organisation on a **public profile** and announce **events**.
- Invite **team members** and give each a role: Owner, Manager, Editor or Viewer.
- Write to trainees in **Messages** and post to the community **Feed**.
- See how trainees do in the educational **games** on your courses, keep play fair, and pass problems to the AAICBI team (**Games**).

How you fit with trainees and the wider ecosystem

You teach; trainees learn and their results stay with you. Trainees can find your public profile, follow you and message you. Employers and investors can browse training organisations and see the skills each programme teaches. You only ever see **your own** trainees, team and records — never another organisation's.

> IMPORTANT
> Some tools belong to the AAICBI team and are not available to training organisations: the Gaming Studio and other platform-administration tools. This manual only describes what your account can do.

How this manual is organised

Each chapter ends with the steps you need. Procedures always follow the same pattern — Task, Purpose, Before you begin, Steps, Expected result and If it does not work — so you can find what you

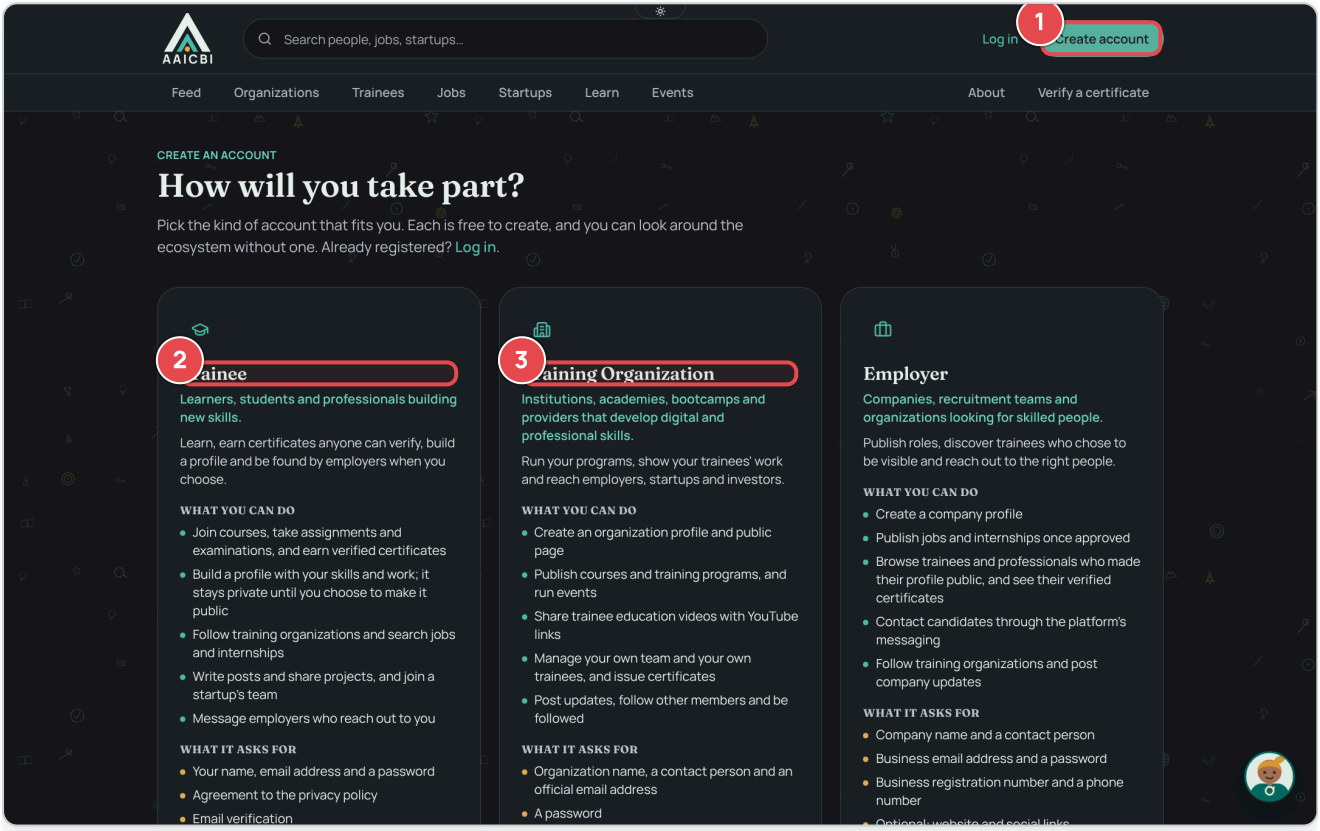
need quickly. Numbered red circles on a screenshot match the numbers in the steps beside it. Where the phone looks different from a computer, both are shown.

A2 Getting Started

How to create a training organisation account, wait for approval and sign in.

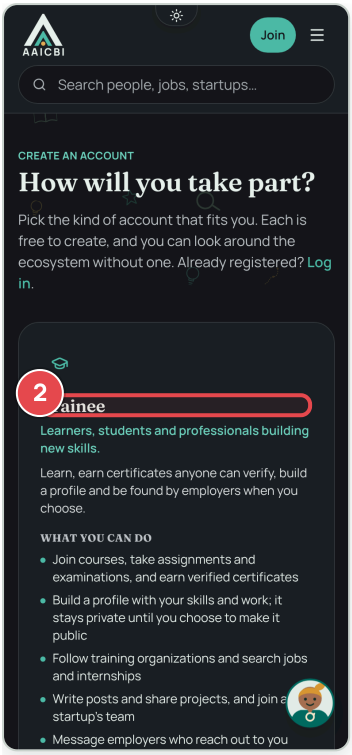
Choosing the right account type

Open the AAICBI Ecosystem in your browser and select **Create account** (top right), or go to the **Join** page. It shows five cards: **Trainee**, **Training Organization**, **Employer**, **Investor** and **Startup**. Each card says who it is for, what it can do and what it asks for before you type anything.



1. **Create account** opens the Join page from any page.
2. The **Trainee** card is for learners.
3. The **Training Organization** card is for organisations that run courses.

COMPUTER



PHONE

2 The **Trainee** card is for learners.

3 The **Training Organization** card is for organisations that run courses.

Figure 1. The Join page lists the five account types. Choose **Training Organization** if you run training programmes.

LIMITATION

There is no staff or administrator option on the Join page. Staff accounts are created by the AAICBI team only.

TASK

Create a training organisation account

Purpose Apply to run training programmes on AAICBI. Every organisation is reviewed before it can start.

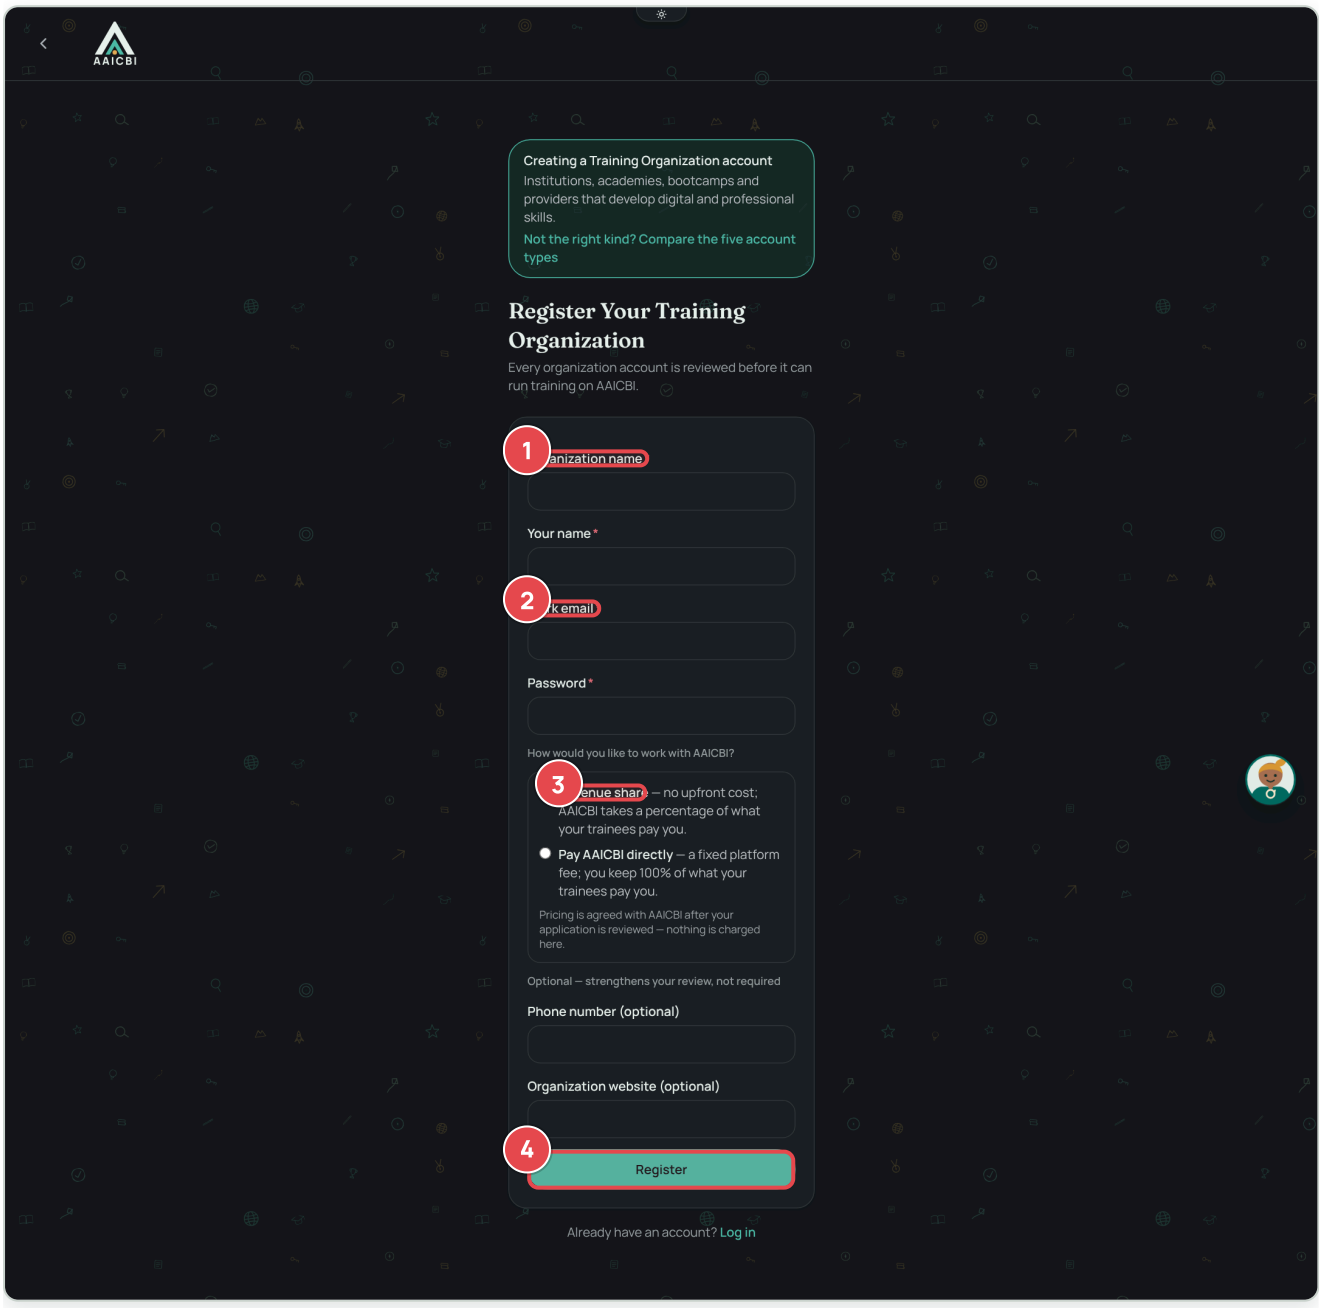
Before you begin Have your organisation's name, your own name, a work email address you can read, and a password of your choice ready. A phone number and website are optional but help the review.

Steps

1. On the **Join** page, select **Create a Training Organization account** on the Training Organization card. (You can also open `/org/register` directly.)
2. Under **Your account**, fill in **Organization name**, **Your name**, **Work email** and **Password**.
3. Under **How would you like to work with AAICBI?** choose **Revenue share** (no upfront cost; AAICBI takes a percentage of what your trainees pay you) or **Pay AAICBI directly** (a fixed platform fee; you keep 100% of what trainees pay you). Nothing is charged here — pricing is agreed with AAICBI after review.
4. Optionally add a **Phone number** and **Organization website**. They strengthen the review but are not required.
5. Select **Register**.

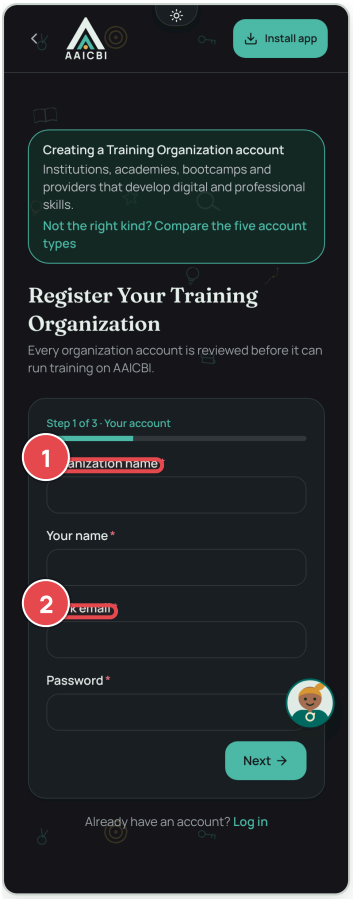
Expected result The page changes to **Application received**: your account is pending review and you will be emailed once it is approved. You cannot sign in until then.

If it does not work If a red message appears under the form, read it and correct the field it names (for example a missing required field or an email that is already registered). If it keeps failing, see Chapter 12.



1. Your organisation's name and your own name.
2. A work email you can read, then a password.
3. How you will work with AAICBI (nothing is charged here).
4. **Register** sends your application for review.

COMPUTER



PHONE

1. Your organisation's name and your own name.
2. A work email you can read, then a password.

Figure 2. The registration form. On a phone the form is split into three short steps (Your account, How you will work with us, Optional details); on a computer it is one page.

> **TIP**
> Use an email address that more than one person at your organisation can reach, for example a shared team address, so that the approval message is never missed.

After you apply: approval

The AAICBI team reviews every organisation. When your account is approved you receive an email. Until then, trying to sign in shows: "Your account is still pending approval. We'll email you once it's reviewed." This is expected and does not mean anything is wrong.

TASK Sign in

Purpose Open your organisation workspace.

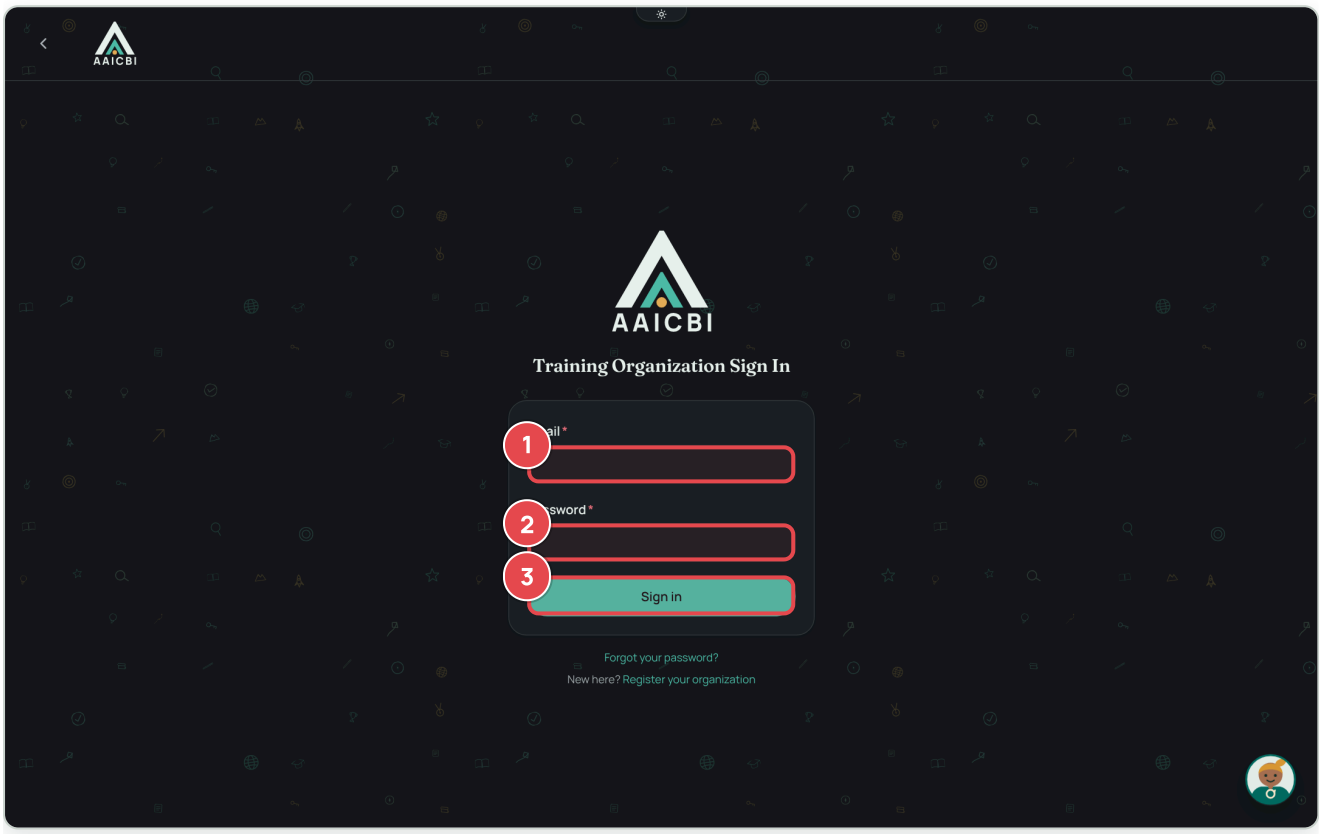
Before you begin Your organisation has been approved.

Steps

1. Open `/org/login`, or choose **Sign in** from the **Join** page and pick the organisation option. The page is titled **Training Organization Sign In**.
2. Enter your **Email** and **Password**.
3. Select **Sign in**.

Expected result You arrive in your organisation workspace. The left menu shows your name and your organisation with your role, for example “Northwind Academy · Owner”.

If it does not work Read the message under the form: **Invalid email or password** means one of them is wrong (check Caps Lock); **Too many login attempts** means wait a few minutes before trying again; **pending approval** means the AAICBI team has not yet approved the account.



1. Your **Email**.
2. Your **Password**.
3. **Sign in**.

COMPUTER

PHONE

1. Your **Email**.
2. Your **Password**.
3. **Sign in**.

Figure 3. The Training Organization Sign In page.

If you cannot sign in

- Check the email address and password carefully, then try again after a minute.
- If the page says your account is pending approval, wait for the approval email.
- If you are a team member rather than the owner, use the link in your invitation email to choose your own password first. Team members sign in with their own email and password.
- If you have forgotten your password, reset it yourself as described below.

TASK Reset a forgotten password

Purpose Get back into your organisation account without waiting for anyone. It works for the owner and for every team member.

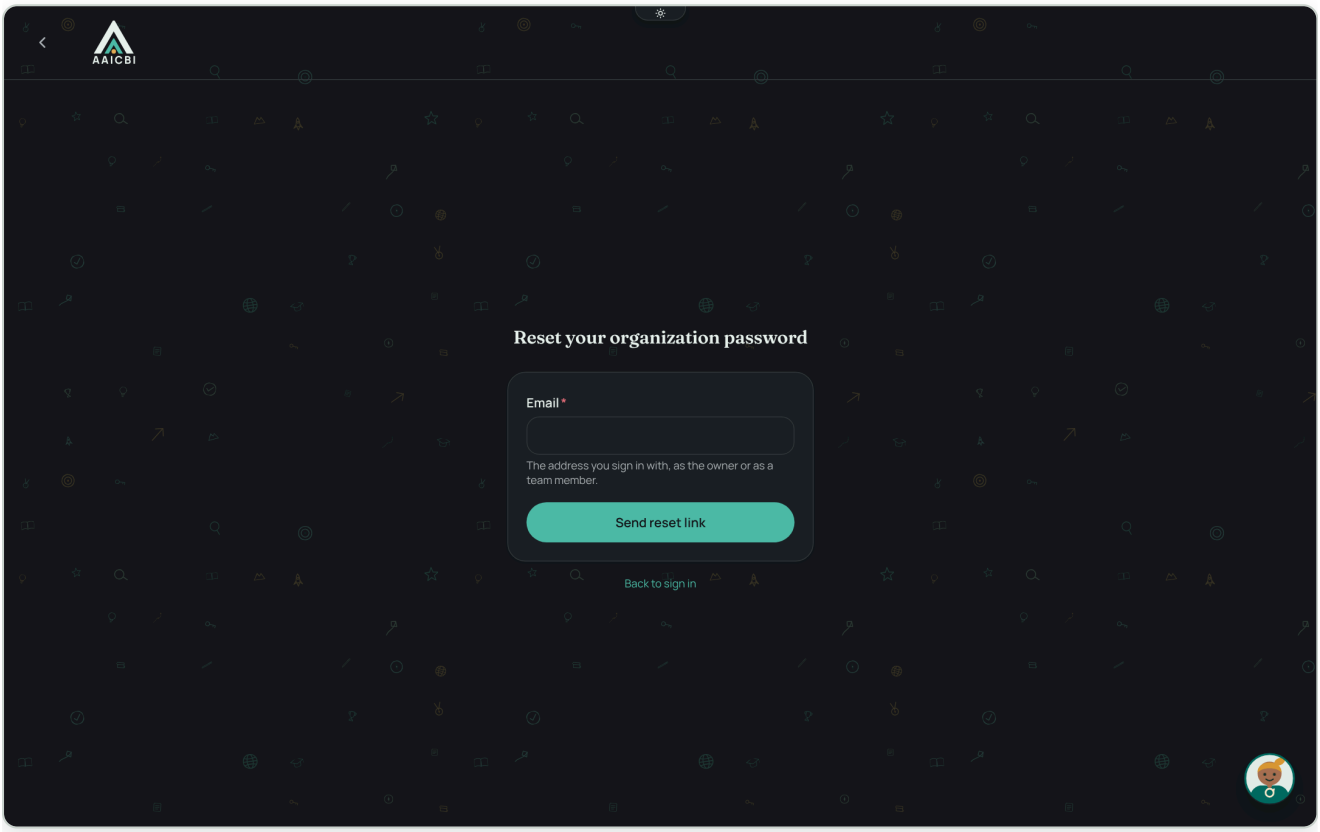
Before you begin You can open the email inbox of the address you sign in with.

Steps

1. On the **Training Organization Sign In** page select **Forgot your password?** (under the **Sign in** button).
2. Type the **Email** you sign in with — the owner's address or your own team address — and select **Send reset link**.
3. Open the email from AAICBI and select **Reset Password**. The link works for one hour and only once.
4. Type a **New password** (at least 8 characters) and select **Save new password**.
5. Select **Go to sign in** and sign in with the new password.

Expected result The page shows **Password changed**, and your old password no longer works.

If it does not work The page always says “If an account exists for that email, we’ve sent a password reset link”, whether or not the address is registered — this protects your privacy. If no email arrives, check spam, check you typed the right address, and wait a few minutes. A disabled team member does not receive a link; ask an Owner or Manager. If the link says it is invalid or expired, select **Ask for a new link**.



COMPUTER

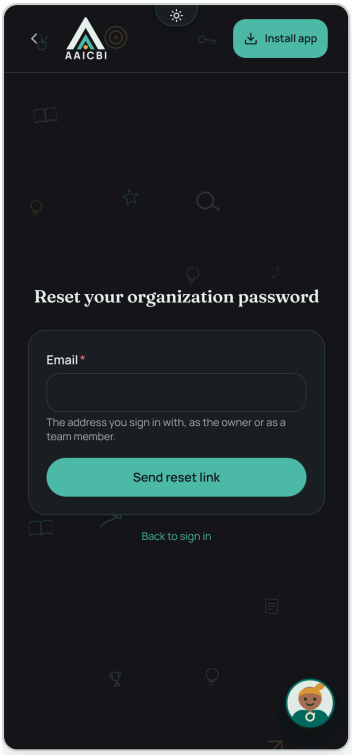


Figure 4. Reset your organization password: enter your email, then follow the link we send.

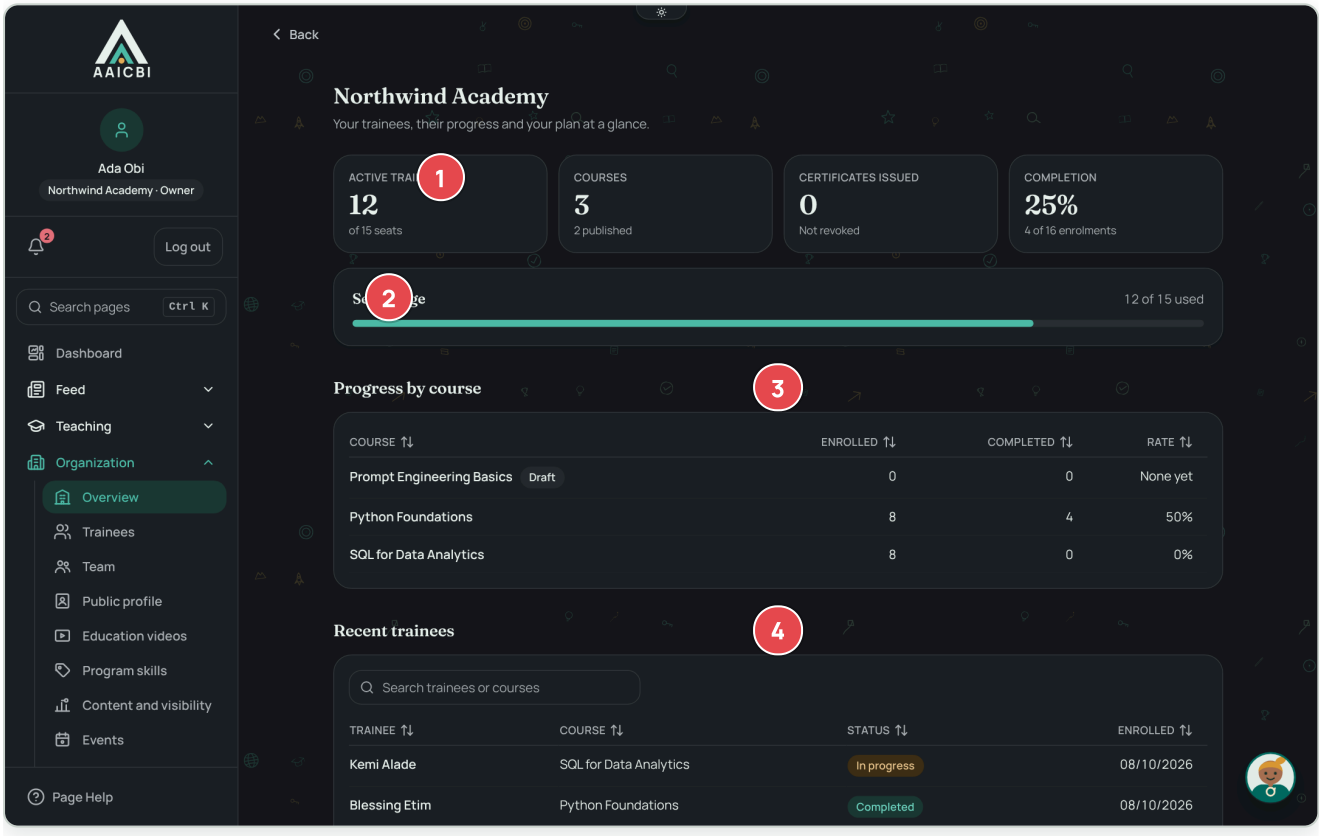
A3 Understanding the Training Organisation Dashboard

A tour of the left menu, the Overview page and the controls you will use every day.

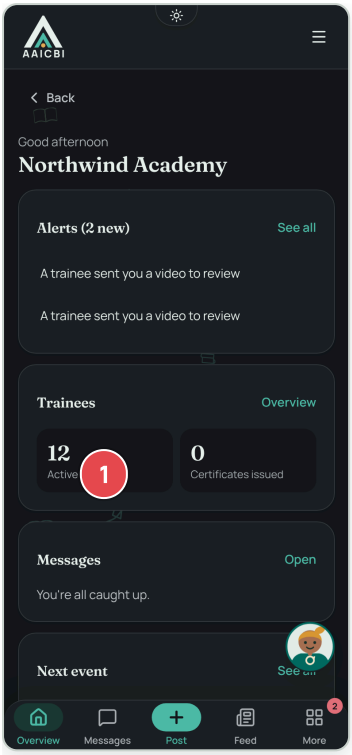
Two home pages: Dashboard and Overview

After signing in you land in your workspace. The first item in the left menu, **Dashboard**, shows notifications, your recent activity, **Quick actions** (Create Examination, Courses, Performance, Trainees, Messages) and your examinations. The first item under **Organization**, **Overview**, is the page most organisation teams use every day: it answers "how is my cohort doing?" in one screen.



1. Key numbers: trainees, courses, certificates and completion.
2. **Seat usage**: seats used out of your plan.
3. **Progress by course**: enrolled, completed and rate.
4. **Recent trainees** with a search box.

COMPUTER



PHONE

1 Key numbers: trainees, courses, certificates and completion.

Figure 5. Organization → Overview on a computer (left) and on a phone (right).

What is on the Overview page

Section	What it shows	Why it matters
Active trainees	How many trainees are active, out of the seats in your plan (for example “12 of 15 seats”).	Tells you how many places you have left before you need a larger plan.
Courses	How many courses you have and how many are published.	A course must be published before trainees can enrol.
Certificates issued	Certificates given to trainees that have not been revoked.	A quick measure of completed learning.
Completion	Enrolments that are completed, as a percentage of all enrolments.	Shows whether trainees are finishing what they start.
Seat usage	A bar showing seats used against seats available.	Warns you before you reach your limit.
Progress by course	For each course: enrolled, completed and completion rate. Headings can be clicked to sort.	Shows which courses need attention.
Recent trainees	The newest enrolments with their course, status (for example In progress or Completed) and date. Use the search box to find a trainee or course.	The fastest way to check on individual trainees.

The left menu on a computer

The left menu is grouped. Groups open and close when you select their heading. At the top are your name and your role in your organisation, a **bell** for notifications, **Log out**, and a **Search pages** box (press **Ctrl + K**) that jumps to any page. **Page Help** at the bottom explains the page you are on.

Group and item	What you do there	Who may change things
Dashboard	Notifications, activity and quick actions.	Everyone
Feed → Feed, Write a post, My posts	Read the community feed, publish posts as your organisation, and see the status of your posts.	Everyone who is signed in
Teaching → Courses, Examinations, Assignments, Certificates	Build and manage learning content and the certificate trainees receive.	Owner and Manager; Editors build and edit but cannot publish, unpublish or delete
Organization → Overview, Trainees, Team, Public profile, Education videos, Program skills, Content and visibility, Events, Member posts, Games	Run your organisation: people, public page, events, videos, posts about you, and game results and moderation.	Depends on the page; Viewers see everything and change nothing
Insight → Performance, Growth report, Ads report, Messages	See how trainees are doing, campaign reports and your conversations.	Read mostly
Payments	Payments for your programmes.	Depends on your role; billing belongs to the Owner
Settings	Account and security settings.	Everyone for their own account

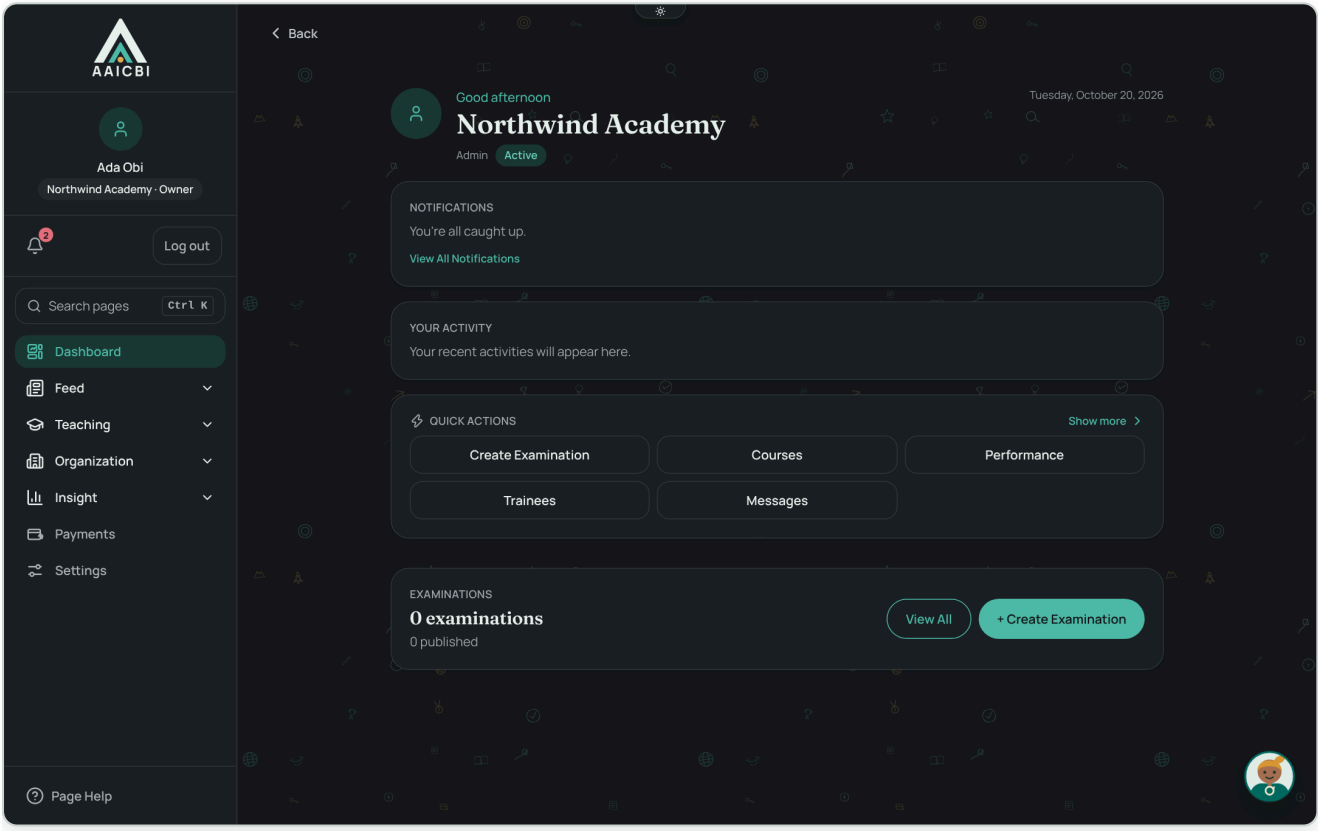
Each organisation team member has a role, shown under their name in the menu:

Role	What they can do
Owner	Everything, including billing and the team.
Manager	Everything except billing.
Editor	Build and edit courses, examinations, assignments and posts. Cannot publish, unpublish, delete, change the public profile, billing or the team.
Viewer	Look at everything; change nothing.

> **TIP**
> If a menu item you expect is missing, or a page says you do not have access, your role probably does not allow it. Ask an Owner or Manager. The platform always checks your role on the server, so hiding a button is never the only protection.

The menu on a phone

On a phone the left menu becomes a bar along the bottom with **Overview**, **Messages**, a round **Post** button, **Feed** and **More**. **More** opens the full list of pages. The page itself is rearranged into stacked cards (Alerts, Trainees, Messages) instead of tables. A **hamburger** button at the top right of the screen also opens the menu.



COMPUTER

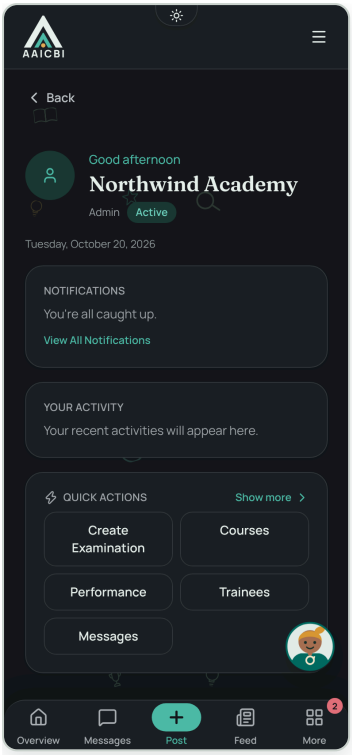


Figure 6. The Dashboard page on a computer and on a phone. On a phone the pages are shown as stacked cards and the menu moves to the bottom bar.

Controls that appear on every page

- **Back** (top left) returns to the previous page.
- The **sun** at the top switches between light and dark appearance.
- The round **Loop** button (bottom right) opens the guide: type a question and Loop can take you to the right page.
- **Page Help** explains the page you are on.

A4 Setting Up the Organisation Profile

Your public profile is what visitors, trainees, employers and investors see about your organisation. Everything you enter on this page can become public, so write it for visitors.

What the profile contains

Field	What to enter	Notes
Show my organization page publicly	A switch. When it is on, your page can be seen by visitors.	Off by default. Your page also needs the platform's public pages to be switched on by AAICBI.
Page address	The short name in your page's web address, for example `northwind-academy`.	Required. Shown under the field as the full address of your page.
Tagline	One line about what you do, for example "Practical data skills".	Shown in search results and on cards.
Location	Your city or country.	Optional.
Organization picture	Your logo or profile picture.	JPG, PNG or WEBP, up to 5 MB. Shown on your page, your profile, search and the feed. You can drag and zoom the picture before it is added.
Cover picture	A wide picture across the top of your page.	JPG, PNG or WEBP, up to 5 MB. You can drag and zoom to place it.
About	A short description of your organisation and training.	Only the fields on this page are ever shown publicly.

TASK Edit your public profile

Purpose Present your organisation clearly so the right trainees and partners find you.

Before you begin You are signed in as an Owner or Manager. Editors and Viewers cannot change the public profile.

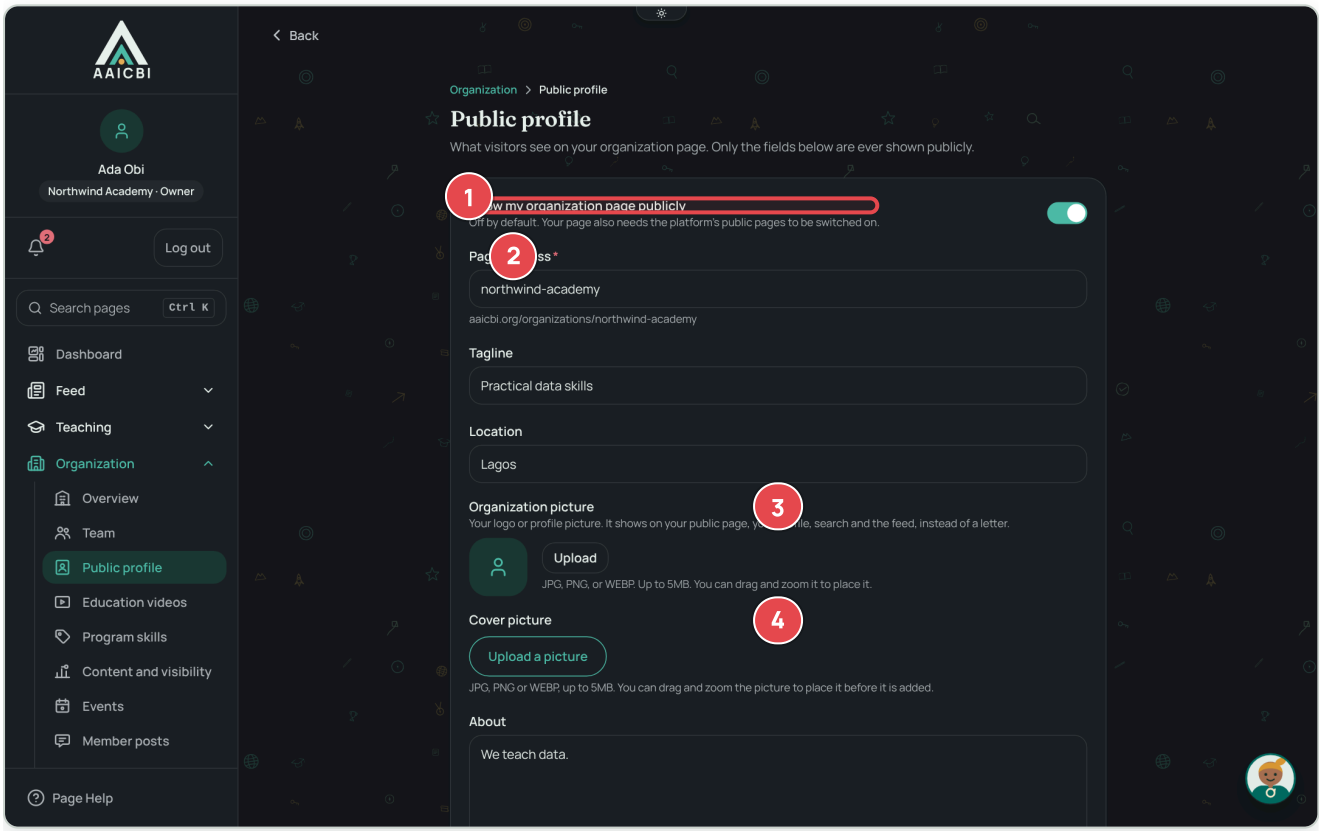
Steps

1. In the left menu open **Organization**, then select **Public profile**. On a phone, open **More** and choose **Public profile**.
2. Turn on **Show my organization page publicly** when you are ready for visitors to see the page.
3. Check the **Page address**. Use lowercase letters, numbers and hyphens.

4. Type a **Tagline** and a **Location**.
5. Under **Organization picture** select **Upload**, choose your logo, adjust it if asked and confirm. Do the same for **Cover picture** with **Upload a picture**.
6. Write your description in **About**.
7. Select **Save** at the bottom of the form.

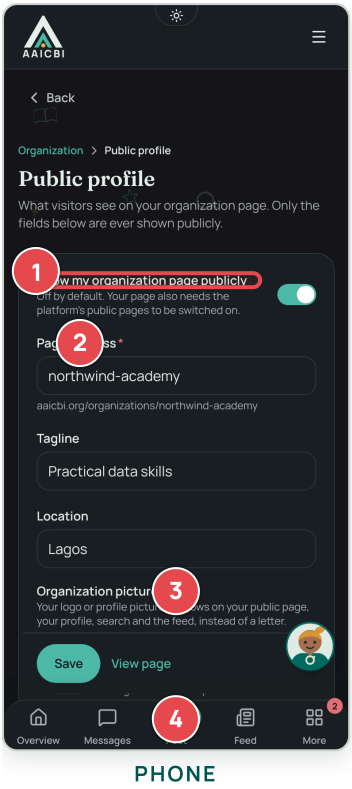
Expected result A confirmation appears and the changes are kept. Opening the page again shows what you saved.

If it does not work If a picture is refused it is usually larger than 5 MB or not a JPG, PNG or WEBP file. Make it smaller or save it in one of those formats. If **Save** does nothing, check that **Page address** is filled in.



1. Switch your public page on or off.
2. The short address of your page.
3. Your logo; **Upload** adds it.
4. A wide cover picture.

COMPUTER



PHONE

1. Switch your public page on or off.
2. The short address of your page.
3. Your logo; **Upload** adds it.
4. A wide cover picture.

Figure 7. The Public profile page on a computer and on a phone.

Previewing your public page

TASK **See your page as a visitor does**

Steps

1. Open **Organization → Public profile**.
2. Select **View page**.

Expected result Your public page opens in the same window, showing the tagline, location, pictures and About text, and the **Events** and programmes you have published.

If it does not work If the page says it is not available, the **Show my organization page publicly** switch is off, or the AAICBI team has not yet switched on public pages.

Other things that affect how you appear

- **Program skills** (Organization → Program skills): list the skills each course teaches, separated by commas, for example “SQL, Power BI, Excel”, then select **Save skills**. People who watch a video about a skill are shown matching programmes.
- **Events** (Organization → Events): see Chapter 9.
- **Certificates** (Teaching → Certificates): the certificate trainees receive carries your logo.

> **TIP**
> Review your page on your phone as well. Most visitors will see it there first.

A5 Managing Trainees

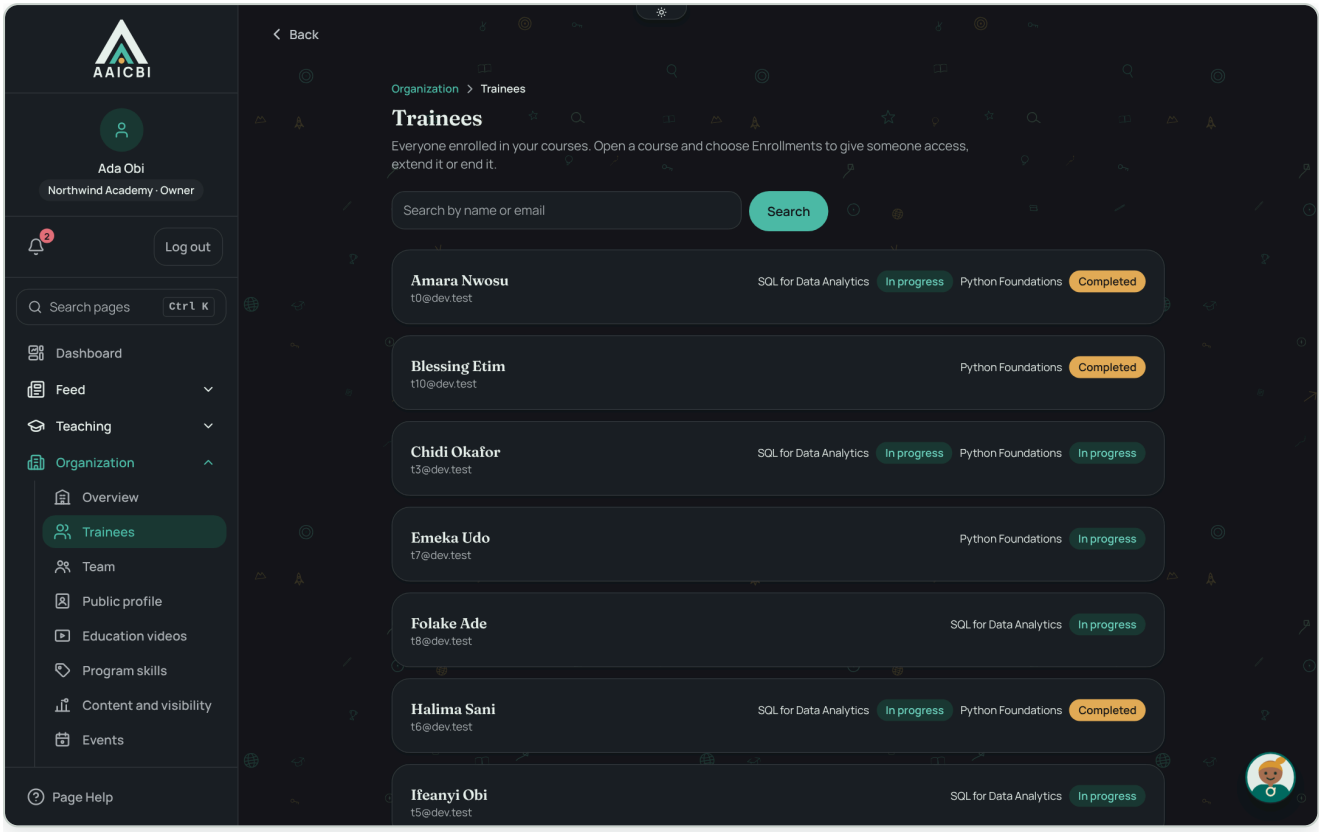
What you can do with the trainees on your courses, and what needs a different role or the AAICBI team.

Who counts as your trainee

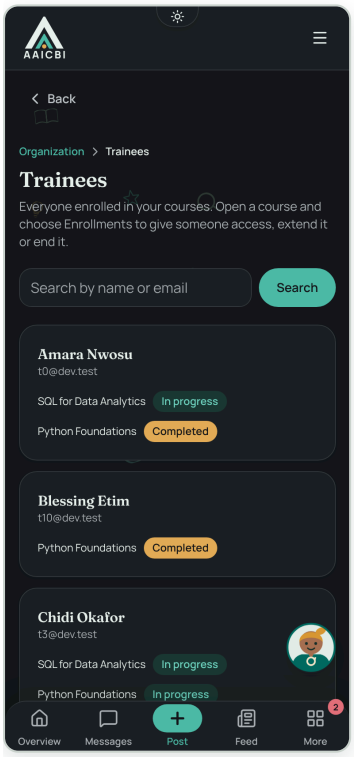
Your trainees are the people **enrolled in your courses**. You only ever see your own trainees, never another organisation's. Seats in your plan limit how many can be active at once; the **Seat usage** bar on the Overview shows how many are used.

Where to find trainees

I want to…	Go to	You will see
Find any of my trainees by name or email	**Organization → Trainees**	Everyone enrolled in your courses, each with their courses and a status (**In progress**, **Completed** or **Access ended**). Type in the search box and select **Search**. Select a course next to a name to open that course's Enrollments.
See the newest enrolments and who has finished	**Organization → Overview → Recent trainees**	Trainee, course, status (In progress, Completed) and enrolment date. Use the search box to find a name or course.
See everyone in one course	**Teaching → Courses** → your course → **Enrollments**	Each person enrolled, with their status (for example **Active** or **Completed**), and **Revoke** and **Extend Access** controls.
See scores and progress of everyone in a course	**Insight → Performance**, then choose a course	Each trainee's performance in that course.
See who needs help early	A course's **Early Warnings** page	Trainees who crossed an inactivity or failed-attempts threshold you set for the course.
Write to a trainee	**Insight → Messages**	Your conversations with trainees.



COMPUTER



PHONE

Figure 8. Organization → Trainees: your own trainees only, with search.

Enrolling a trainee

TASK

Give a trainee access to a course

Purpose Add a trainee to a course yourself, including a paid course, for example after an offline payment or a support case.

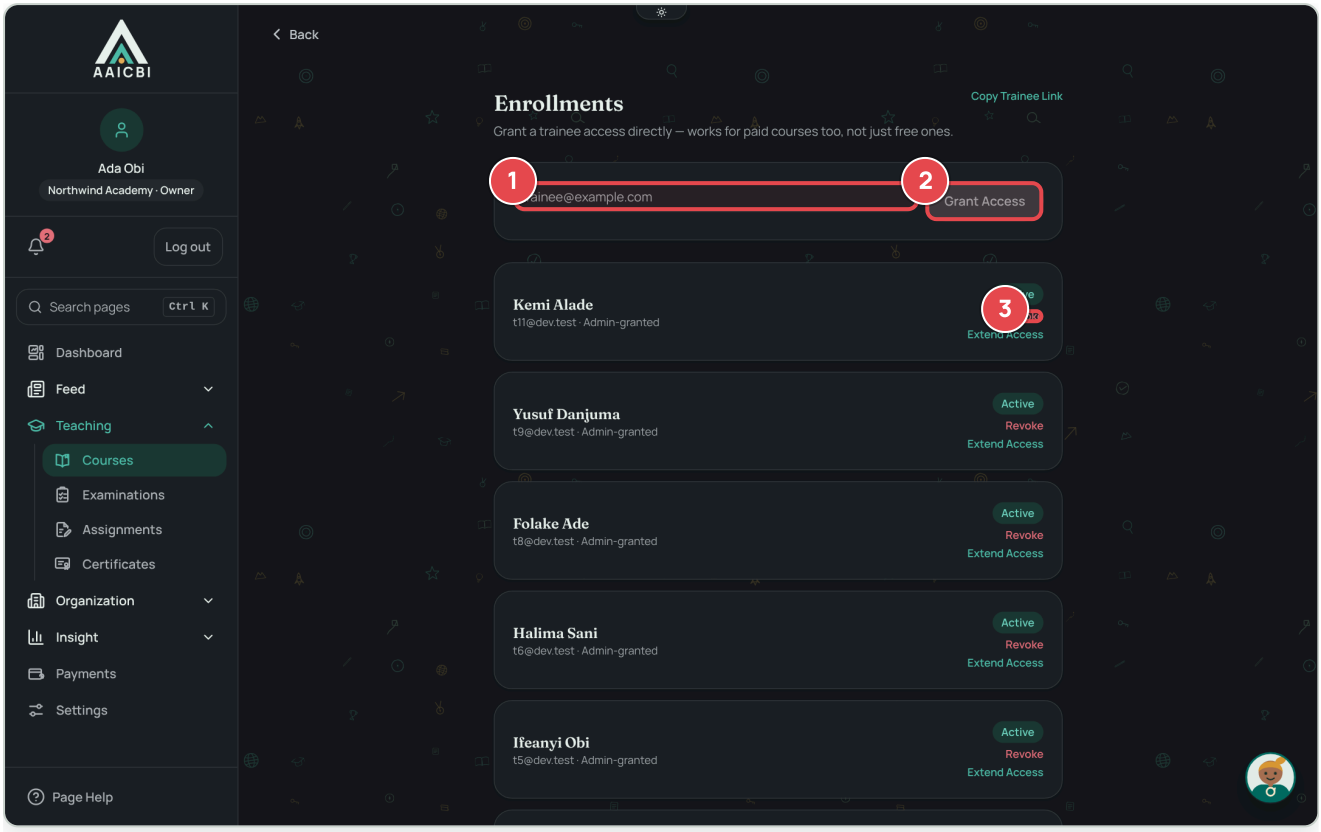
Before you begin The trainee already has an AAICBI trainee account and you know the email address they registered with.

Steps

1. Open **Teaching → Courses** and select **Manage** on the course.
2. In the list of links at the top right of the course page, select **Enrollments**.
3. Type the trainee's address into the box that shows **trainee@example.com**.
4. Select **Grant Access**.

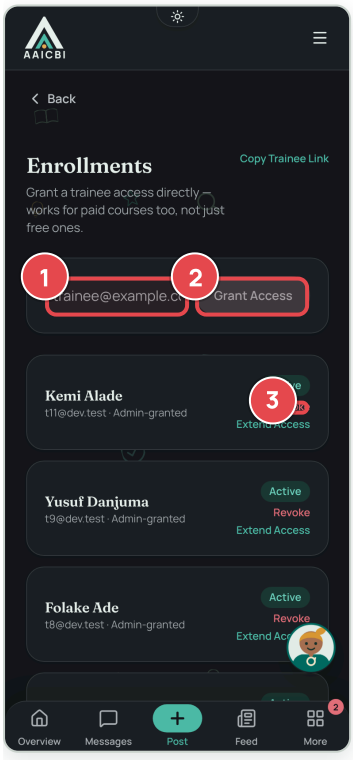
Expected result The trainee appears in the list below with the status **Active**, and the course shows in their **My courses**.

If it does not work A red message under the box tells you why (for example that no trainee account exists for that address — ask them to create one first). Trainees can also enrol themselves in a free course from the course page; **Copy Trainee Link** on the page copies the link to share.



1. The trainee's registered email.
2. **Grant Access**.
3. **Revoke** and **Extend Access** for each person.

COMPUTER



PHONE

1. The trainee's registered email.
2. **Grant Access**.
3. **Revoke** and **Extend Access** for each person.

Figure 9. The Enrollments page of a course: grant access by email, copy the trainee link, and **Revoke** or **Extend Access** for each person.

TASK

Extend or revoke a trainee's access

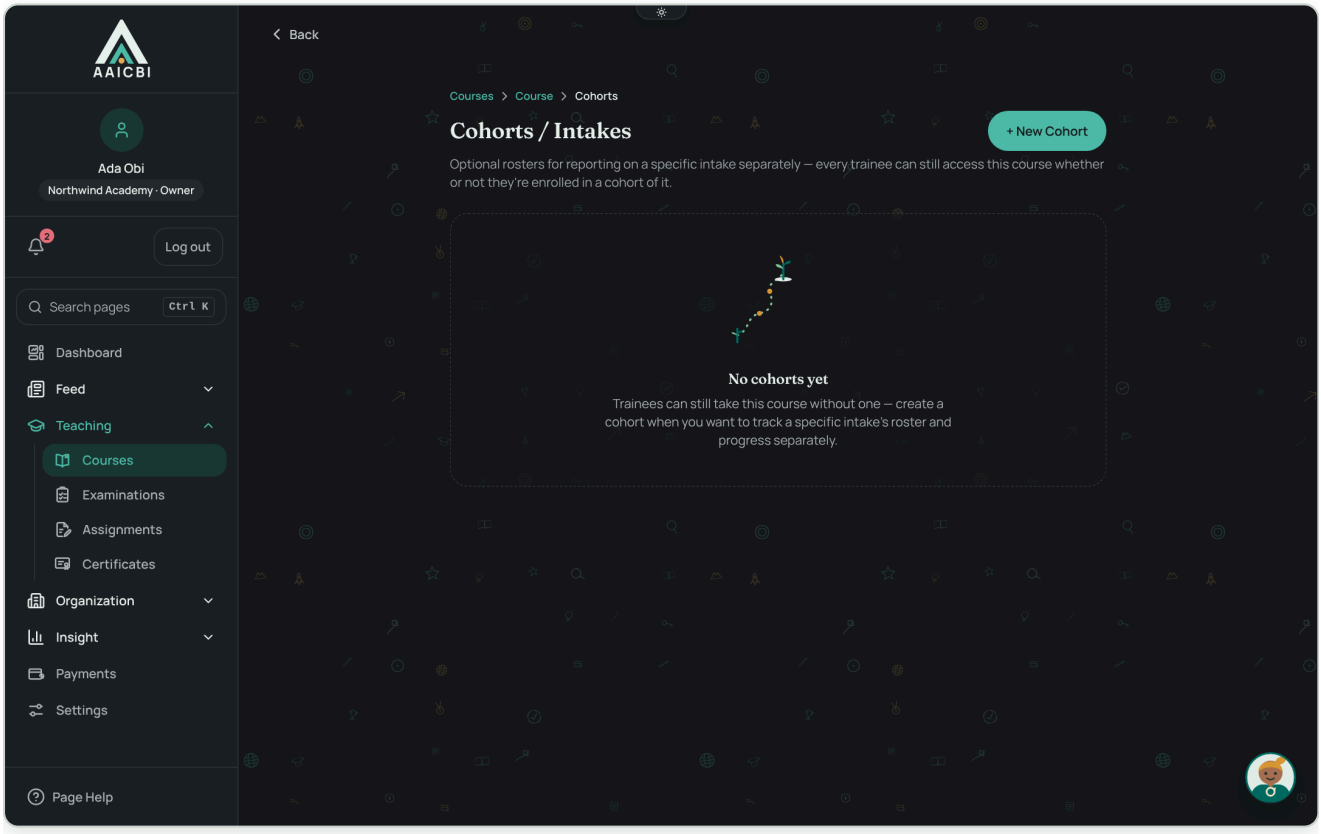
Steps

1. Open the course's **Enrollments** page.
2. Find the trainee. To end their access select **Revoke**. To give more time select **Extend Access**, enter the number of days and a **reason** (it is kept in the audit trail), then confirm.

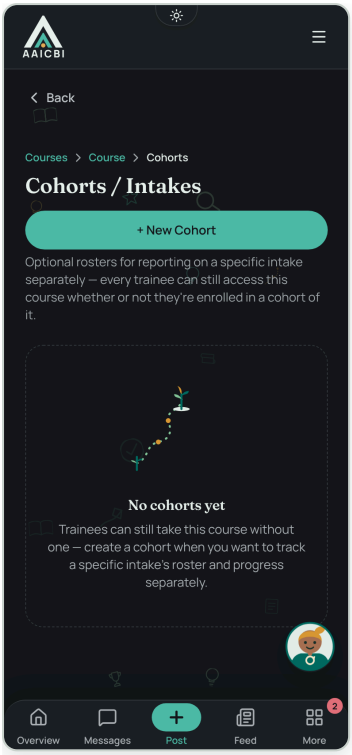
Expected result The status changes (**Expired / Revoked** after a revoke) and the change is recorded with your reason.

Cohorts

A **cohort** (also called an intake) is an optional roster for reporting on one group of trainees separately. Every trainee can still use the course whether or not they are in a cohort. Open a course and choose **Cohorts / Intakes**, then **+ New Cohort**. Cohorts also appear as a filter on the **Performance** page.



COMPUTER



PHONE

Figure 10. Cohorts / Intakes for a course. A new course has none until you create one.

Account or enrolment problems

- A trainee cannot find a course: check the course is **Published** (Courses list) and that they are enrolled.
- You have no seats left: the Overview shows “n of n seats used”. Contact AAICBI to change your plan.
- A trainee cannot sign in or has lost a password: the trainee uses **Forgot your password?** on their own sign-in page. You cannot reset a trainee’s password for them.
- A trainee’s profile or messages contain something wrong: see Chapter 8 for moderation and reporting.

What is not available to organisations

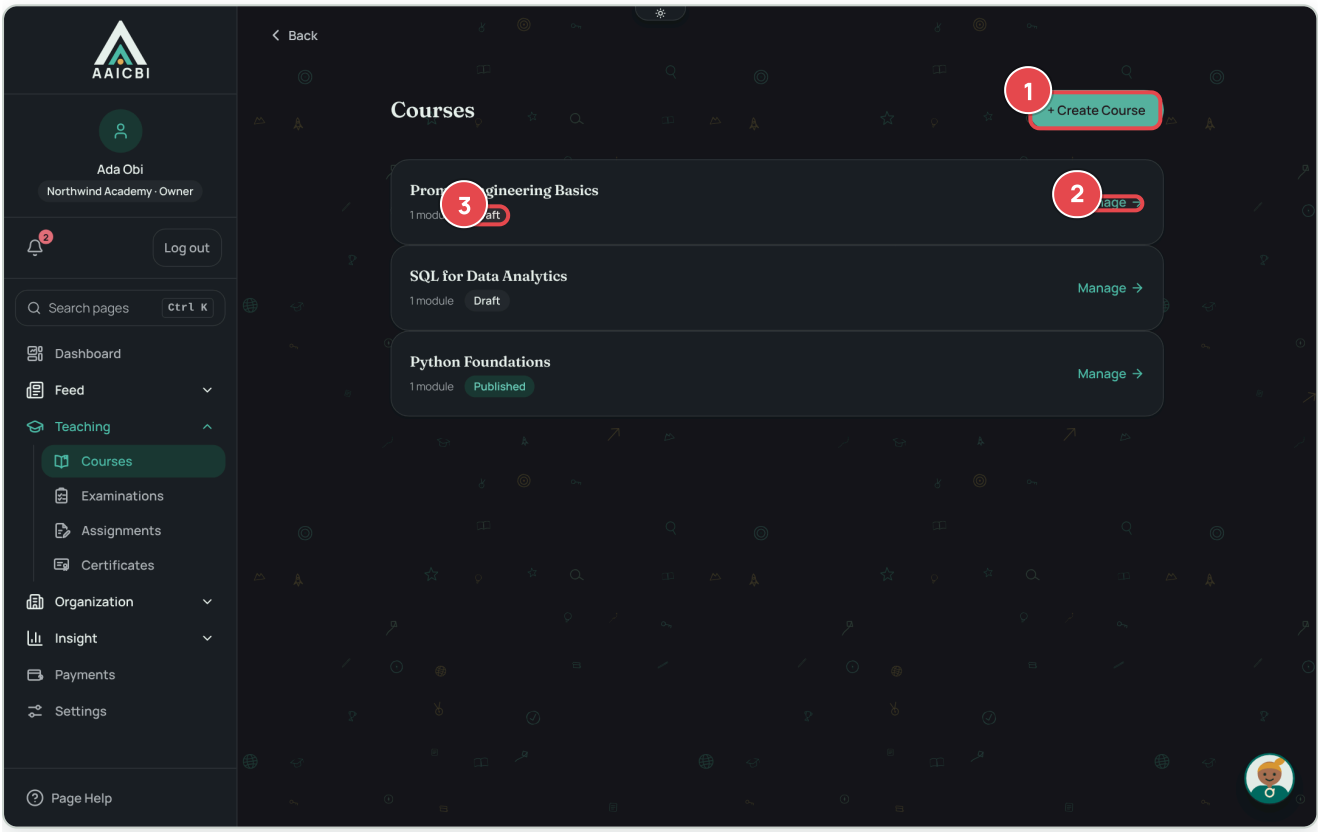
Organisation accounts cannot see trainees of other organisations and cannot change a trainee’s email or password. Where an action needs the AAICBI team, the page says so or the control is not shown.

A6 Managing Courses and Training Activities

Everything you need to create a course, publish it, follow it and issue certificates.

The Courses list

Open **Teaching → Courses**. Each course is a card with its title, the number of modules and a status: **Draft** (only your team sees it) or **Published** (trainees can find and join it). Select **Manage** to open a course, or **+ Create Course** to start a new one.



1. **+ Create Course** starts a new course.
2. **Manage** opens a course.
3. The status: **Draft** or **Published**.

COMPUTER

PHONE

1. **+ Create Course** starts a new course.
2. **Manage** opens a course.
3. The status: **Draft** or **Published**.

Figure 11. The Courses list on a computer and on a phone.

TASK

Create a course

Purpose Start a new programme that trainees can enrol in.

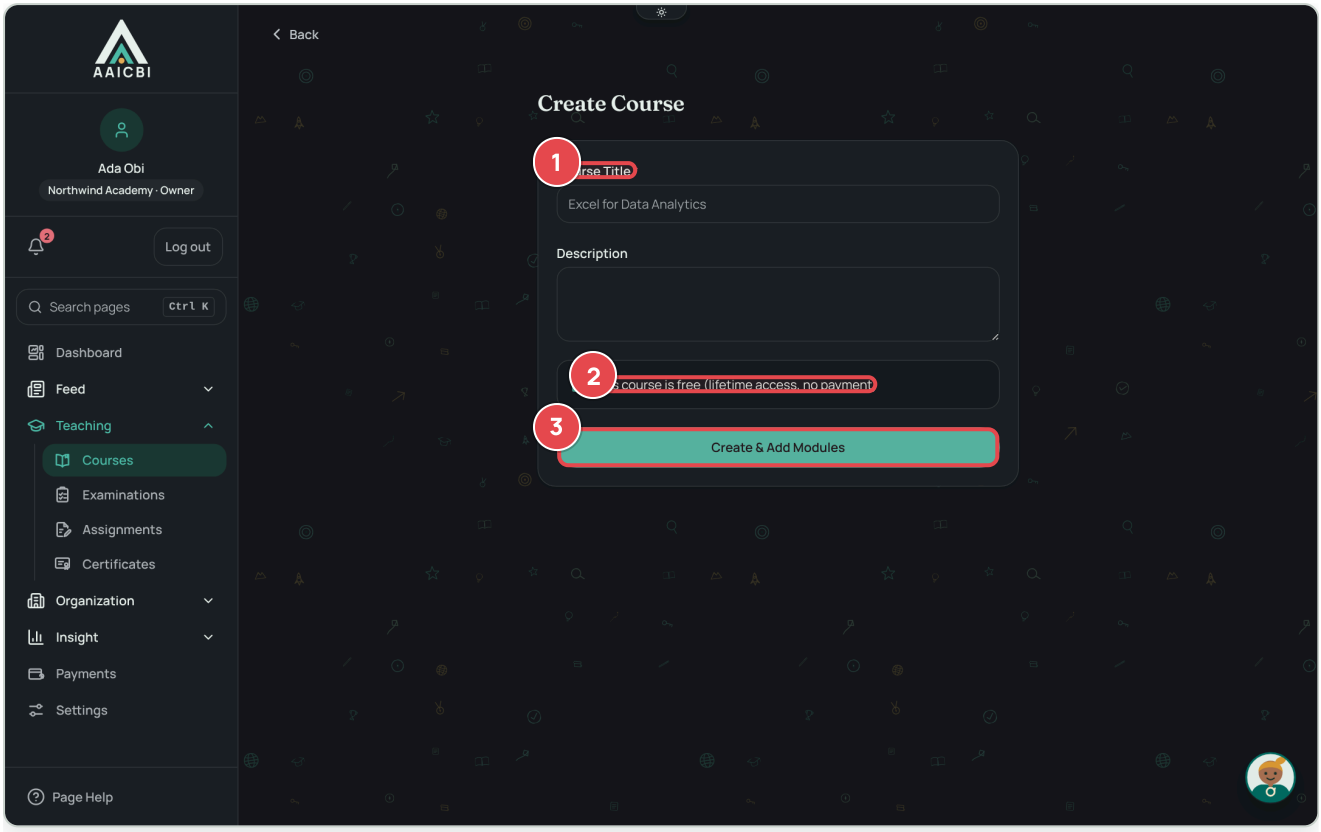
Before you begin You are an Owner, Manager or Editor.

Steps

1. Open **Teaching → Courses** and select **+ Create Course**.
2. Type the **Course Title** (required) and a **Description**.
3. Leave **This course is free (lifetime access, no payment)** ticked for a free course, or untick it if you will set a price later.
4. Select **Create & Add Modules**.

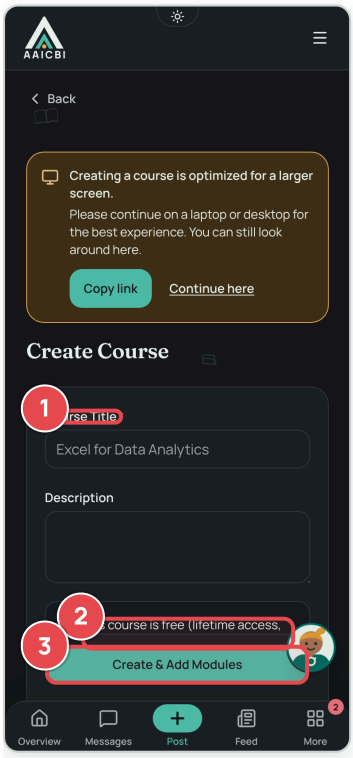
Expected result The new course opens as a **Draft**, ready for modules and lessons.

If it does not work If nothing happens, check that the title is filled in.



1. The **Course Title** is required.
2. Free or paid.
3. **Create & Add Modules**.

COMPUTER



PHONE

1. The **Course Title** is required.
2. Free or paid.
3. **Create & Add Modules**.

Figure 12. Create Course. Only a title is required; everything else can be added afterwards.

Inside a course

A course page gathers everything about one course. A row of links at the top right opens the related pages: **Copy Trainee Link**, **Certificates Issued**, **Q&A**, **Enrollments**, **Cohorts / Intakes**, **Early Warnings**, **Performance**, **Course Examination** and **Preview as Trainee**. The **Status** menu switches between Draft and Published. Below that the page has these sections:

Section	What you do there
Work on this together	Make an **invite link** so a colleague, instructor or another organisation can help build the course as an editor, or a **copy link** that gives another organisation their own independent copy. Editors change content; the owner keeps publishing, pricing, deleting and sharing.
Pricing & Access	Free or paid access.
Certificate Template	Choose which of your approved certificate templates this course uses.
Early-Warning Thresholds	Set when a trainee counts as inactive or at risk of failing.
Q&A Scope	Who can see and post in a lesson's question thread: everyone, or only the trainee's cohort.
WhatsApp Study Group	Paste a group invitation link; enrolled trainees then see a **Join WhatsApp Group** button.
Schedule & Registration	Start and end dates, registration deadline, capacity and location, for courses announced in advance.
Ayakbi Arena rules and the moderation panels	Rules of play and tools for chat and games on this course (Chapter 7).
Course Information & Marketing Materials	The details shown on the public course page: category, level, duration, instructors, prerequisites, what trainees will learn. Switches choose what is visible; you can upload a flyer and a curriculum.
Modules and lessons	Each module has lessons and materials. Use **+ Add Lesson**, **+ Add Material** and **+ Add Module**, and the **Assessment**, **Edit** and **Delete** links. The arrows reorder items.

PHONE

Figure 15. Assignments, with the two ways to create one.

Following a course

- **Performance** for a course shows total trainees, average completion, average assessment score, at-risk trainees and certification rate, with a table per trainee (Chapter 10).
- **Early Warnings** lists trainees who crossed an inactivity or failed-attempts threshold.
- **Q&A** lists every question thread across the course, most recent first.
- **Certificates Issued** shows certificates; they are issued automatically when a trainee completes every module.
- **Preview as Trainee** shows the course exactly as a trainee sees it before you publish it.

> **TIP**
> Open **Preview as Trainee** and check the course on your phone before you publish it. Then set the **Status** to **Published**.

A7 Managing Educational Games

How to follow your trainees' game results, watch live games and keep play fair on your own courses.

Managing games is not developing games

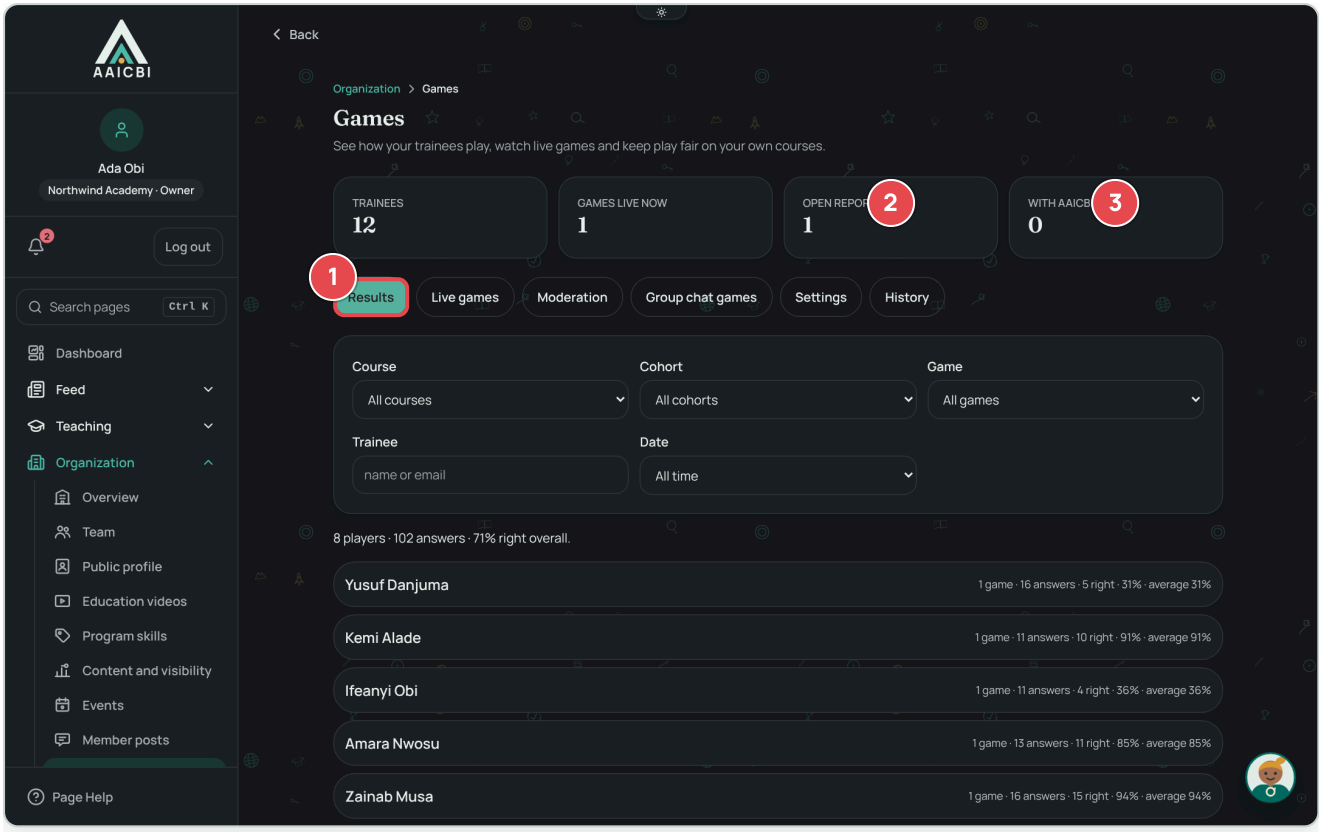
There are two different jobs around games. **Developing** games — building the questions, formats and rules of play for the whole platform — is done by the AAICBI team in a tool called the **Gaming Studio**. **Managing** games on your courses — seeing results, watching live games and keeping play fair — is what this chapter covers, and it is what your **Games** page is for.

> IMPORTANT
> Training organisations do **not** have access to the Gaming Studio or to platform-wide game settings. You will not see them in your menu. If you need a game changed or switched on, ask the AAICBI team.

Games appear on a course only when the AAICBI team has switched them on for the platform and the course. The AAICBI team also decides, for each organisation, which of the abilities below your account may use. If a button or tab described here is missing or says "not switched on for your organization", that ability is off for your account.

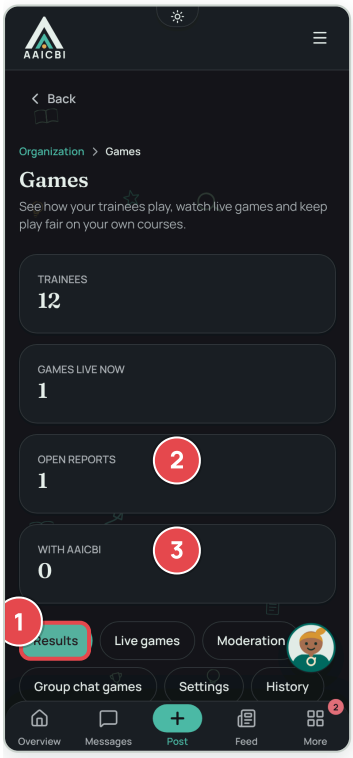
The Games page

Open **Organization → Games**. At the top, four counters summarise your courses: **Trainees**, **Games live now**, **Open reports** and **With AAICBI** (incidents you passed up). Six tabs sit underneath. Everything on this page is limited to **your own courses and trainees**.



1. Tabs: Results, Live games, Moderation, Group chat games, Settings, History.
2. **Open reports** waiting for you.
3. Incidents you passed to AAICBI.

COMPUTER



PHONE

1. Tabs: Results, Live games, Moderation, Group chat games, Settings, History.
2. **Open reports** waiting for you.
3. Incidents you passed to AAICBI.

Figure 16. The Games page. The tabs (1) switch between results, live games, moderation, group chat games, settings and history.

Tab	What it is for
Results	How trainees are doing in games and practice: players, answers and accuracy.
Live games	Games being played right now by your trainees.
Moderation	Open reports, restrictions, and your decisions.
Group chat games	Fastest Fingers questions, challenges started in the chat and recent chat messages for one course.
Settings	Switch supported games on or off for a course and set rules of play, within what the platform allows.
History	Every moderation decision with its reason, who made it and when.

Seeing results and scores

TASK

Review game results for a course

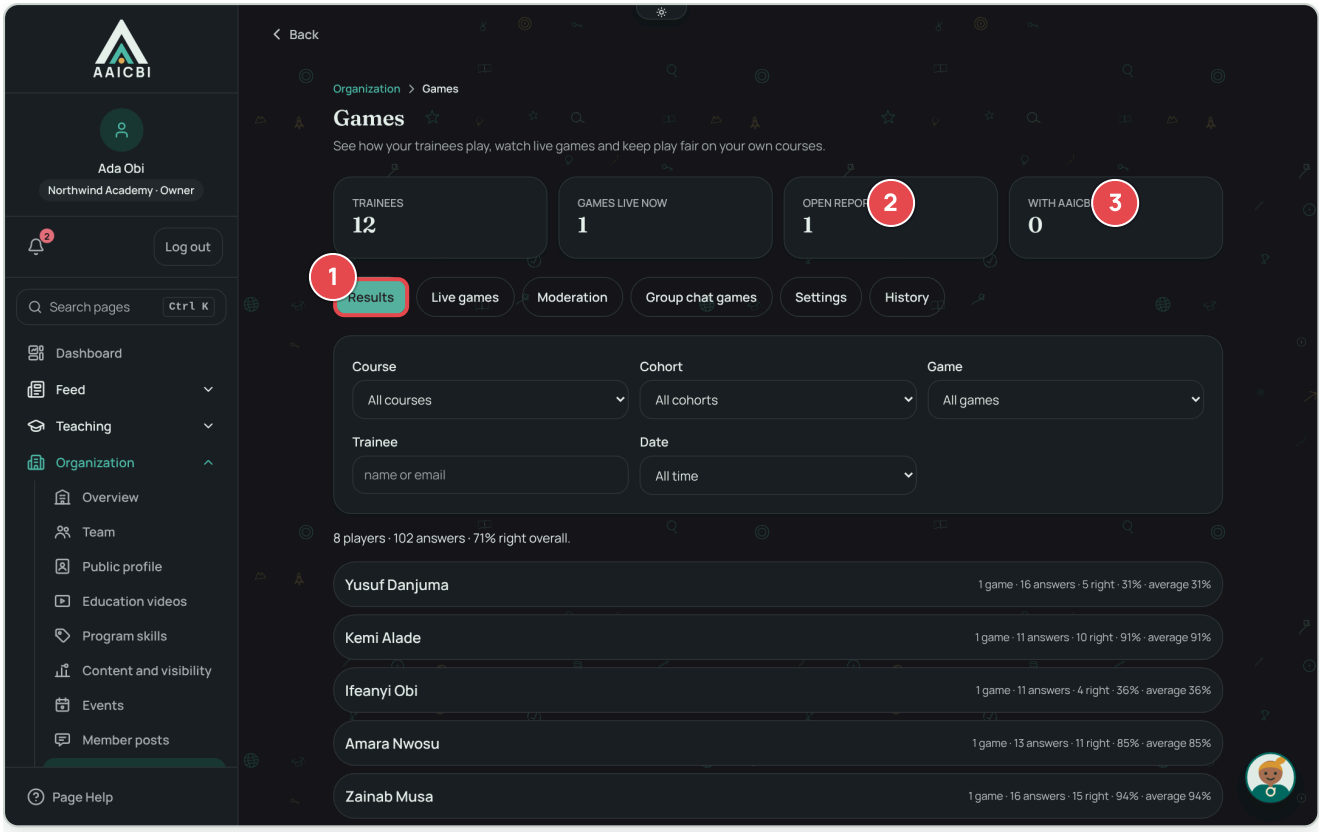
Purpose See who plays, how often and how well, so you can encourage the right people and spot problems.

Steps

1. Open **Organization → Games**. The **Results** tab is shown first.
2. Narrow the list with **Course**, **Cohort**, **Game**, **Trainee** (name or email) and **Date** (All time, Last 7 days, Last 30 days or Last 90 days).
3. Read the summary line (for example “8 players · 96 answers · 70% right overall”) and the table beneath.
4. Select a player’s row to open **latest answers** for that trainee.
5. To keep a copy select **Download spreadsheet** (shown only if your organisation is allowed to export results).
6. To see rankings open the **leaderboards for this course**: the **Ladder** and the **Fastest Fingers credits**.

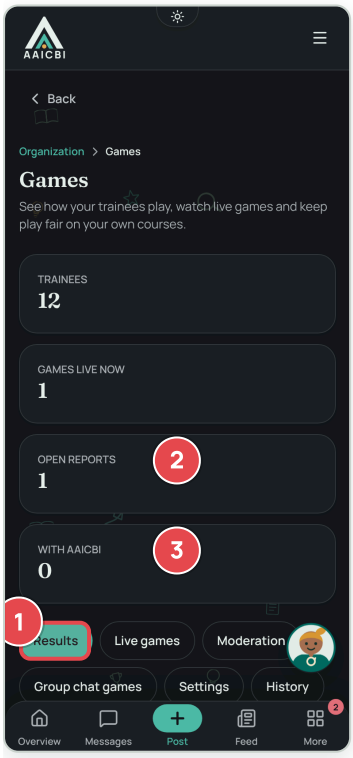
Expected result The table lists only your trainees. The filters change the numbers straight away.

If it does not work An empty table with “No game activity for these filters yet” means nobody matching the filters has played yet; try **All time**. If **Download spreadsheet** is missing, export is not switched on for your organisation.



1. Tabs: Results, Live games, Moderation, Group chat games, Settings, History.
2. **Open reports** waiting for you.
3. Incidents you passed to AAICBI.

COMPUTER



PHONE

1. Tabs: Results, Live games, Moderation, Group chat games, Settings, History.
2. **Open reports** waiting for you.
3. Incidents you passed to AAICBI.

Figure 17. Results are the first tab. Use the filters, then open a player for their latest answers.

Watching live games and ending them

TASK

See and end a live game

Purpose Stop a game that is being abused or was left open.

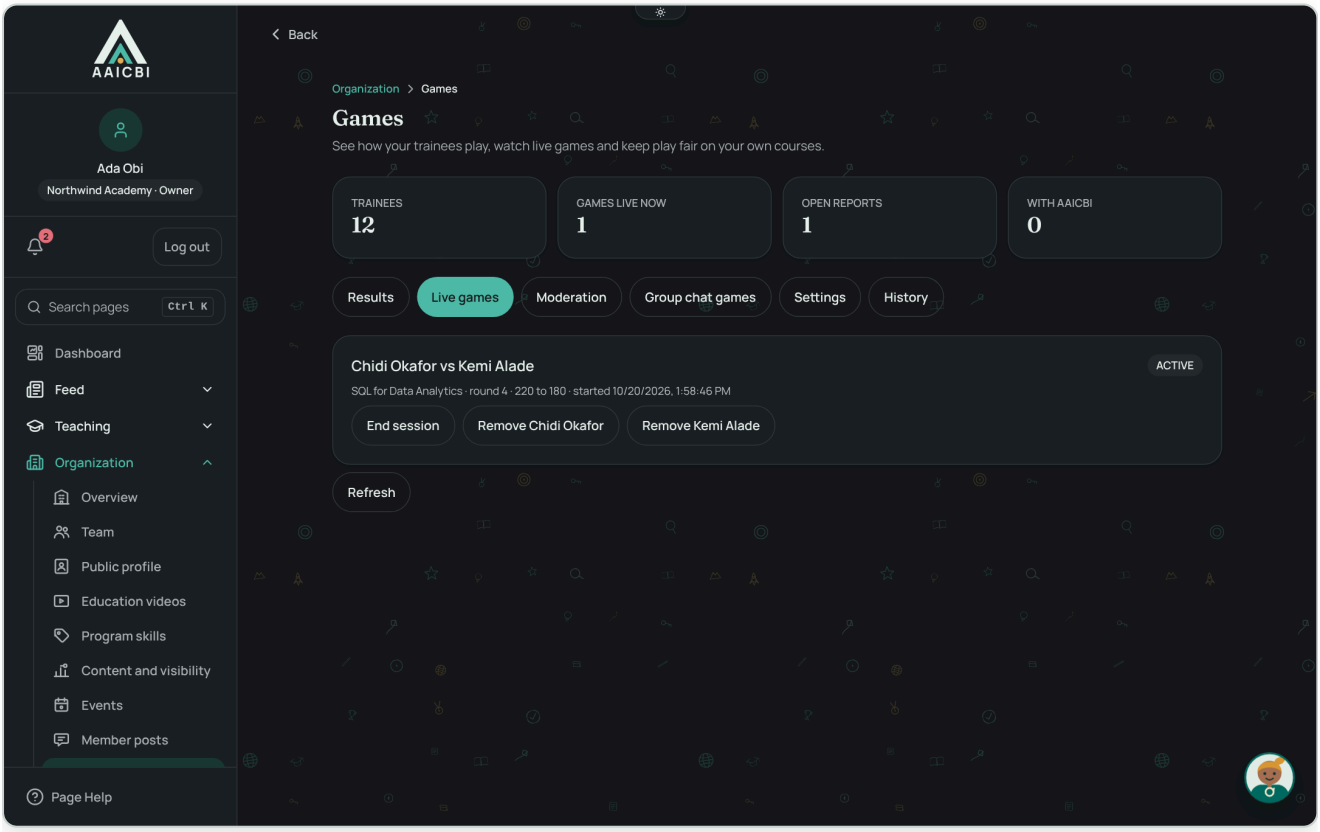
Before you begin You can end sessions and your organisation's policy allows it.

Steps

1. Open the **Live games** tab. Each game shows the two players, the course, round, score and when it started. Warnings such as "Possibly abandoned" or "1 open report" appear beside it.
2. Select **End session**. A box asks for a **Reason (kept with the decision)**.
3. Type a clear reason of at least five characters and confirm.
4. To remove one player instead, select **Remove** followed by the player's name. The game ends for both players and the person removed is kept out of that course's games for 24 hours unless you lift it.

Expected result The game leaves the list and the decision, with your reason, appears in **History**.

If it does not work If the tab says watching live games is not switched on, your account does not have that ability. Use **Refresh** to update the list.



COMPUTER

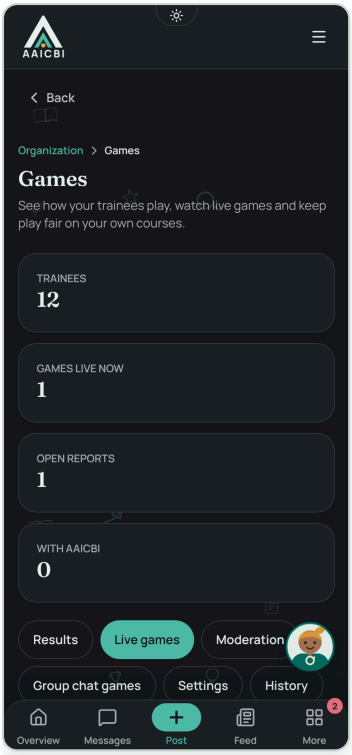


Figure 18. Live games. Each row has **End session** and **Remove** controls.

Reviewing reports and moderating

Trainees can report cheating or abuse in a match. Reports for your courses appear on the **Moderation** tab under **Open reports**, each with the reason, who reported whom and when.

TASK

Decide on a reported incident

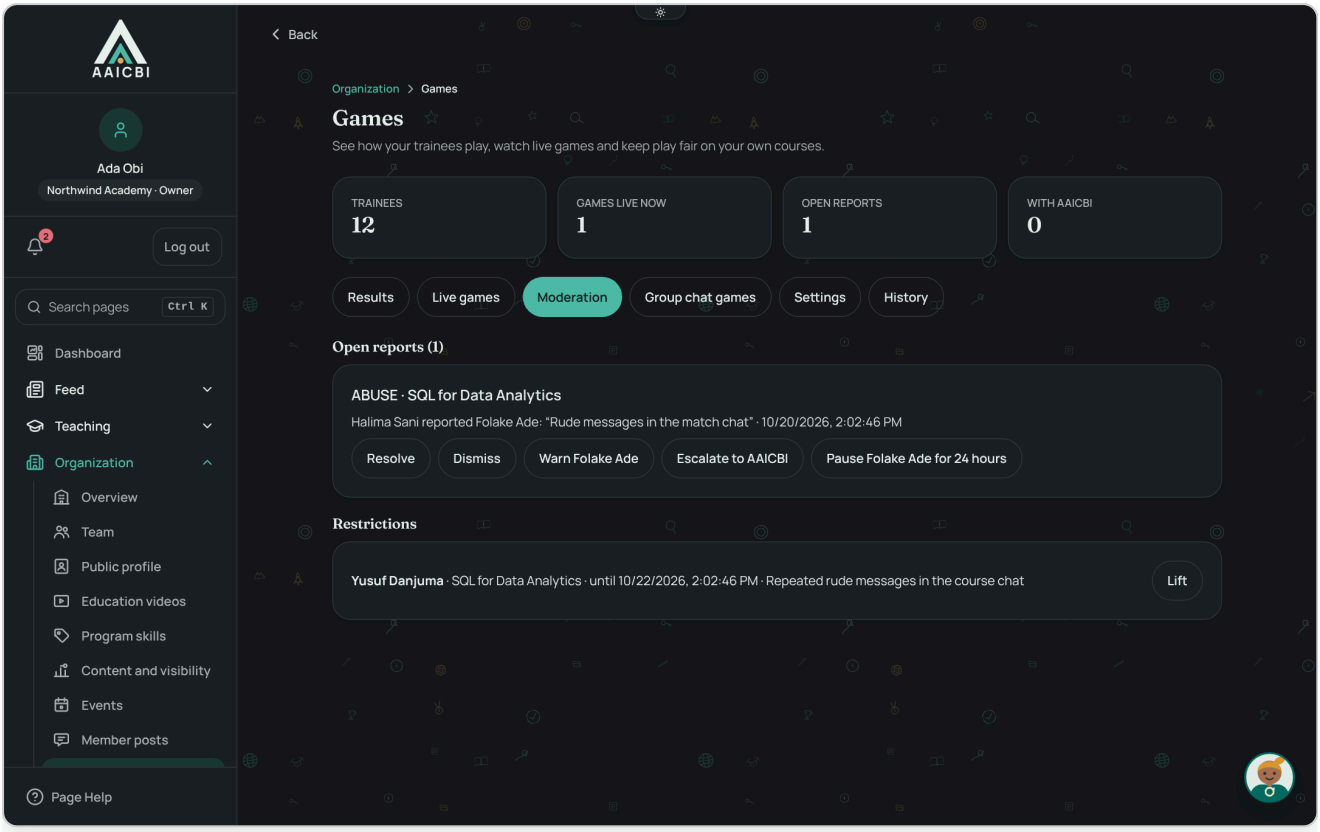
Purpose Keep games fair, with every decision explained and recorded.

Steps

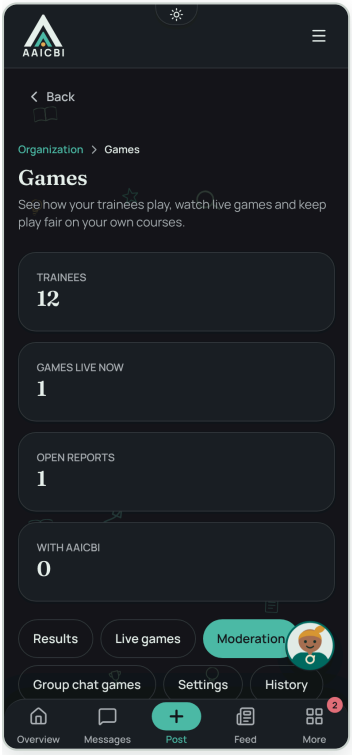
1. Open the **Moderation** tab and read the report.
2. Choose what to do: **Resolve** (the report was valid and is handled), **Dismiss** (no action needed), **Warn** followed by the trainee's name, **Pause** the trainee **for 24 hours**, or **Escalate to AAICBI**.
3. In the box that opens, write the **Reason (kept with the decision)** and confirm.

Expected result The report leaves **Open reports**, any restriction appears under **Restrictions**, and the decision is listed in **History**.

If it does not work A decision cannot be saved without a reason. If a button is missing, your role or your organisation's policy does not allow it (see "Who can do what" below).



COMPUTER



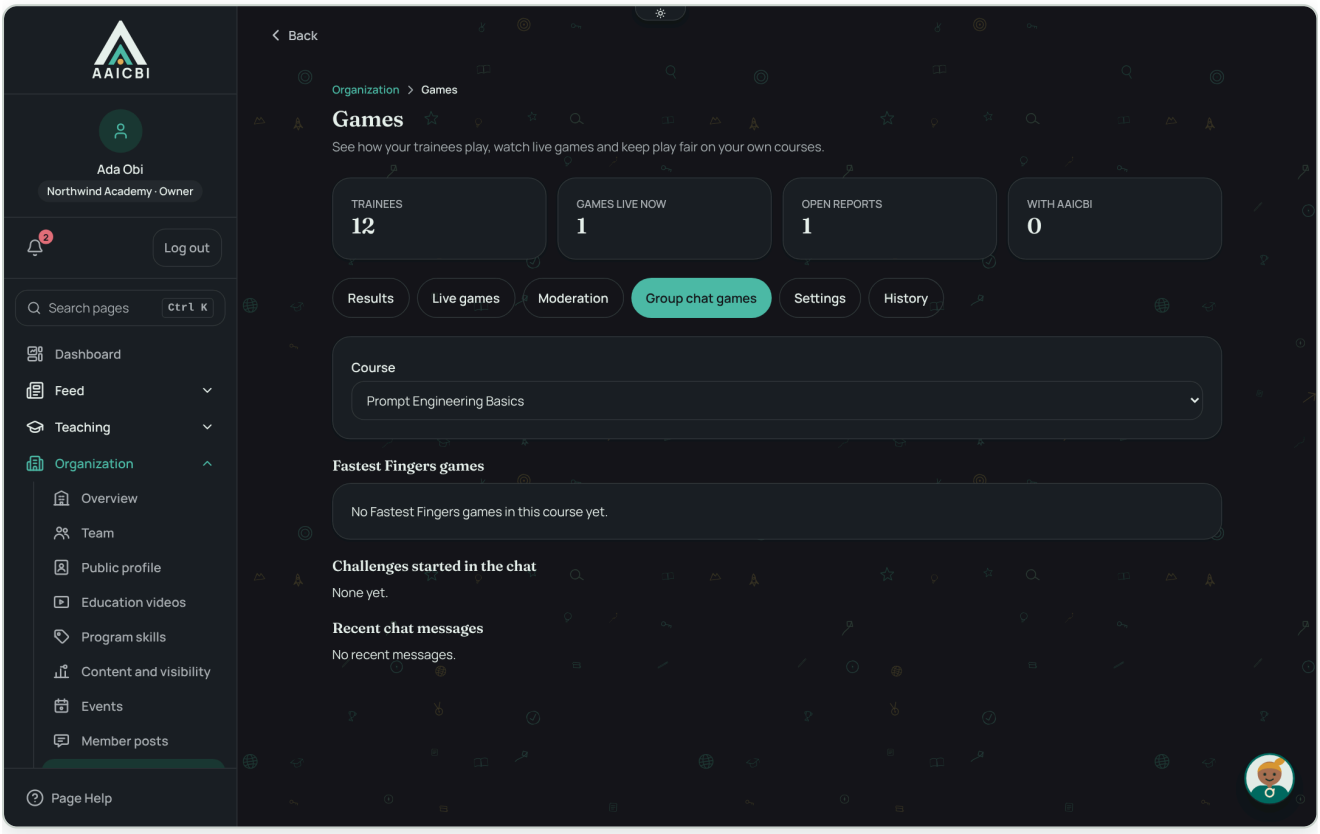
PHONE

Figure 19. Moderation: open reports, active restrictions and the buttons for each decision.

To end a restriction early select **Lift** beside the person under **Restrictions**. A lift also needs a reason.

Group chat games

The **Group chat games** tab is for one course at a time. Choose the **Course**, then you can see the **Fastest Fingers games** (quick questions posted in the course chat; select **Stop this game** to close one), **Challenges started in the chat** and **Recent chat messages**. Select **Remove** beside a message that breaks the rules; removed messages are listed under **Recently removed** and the removal needs a reason.



COMPUTER

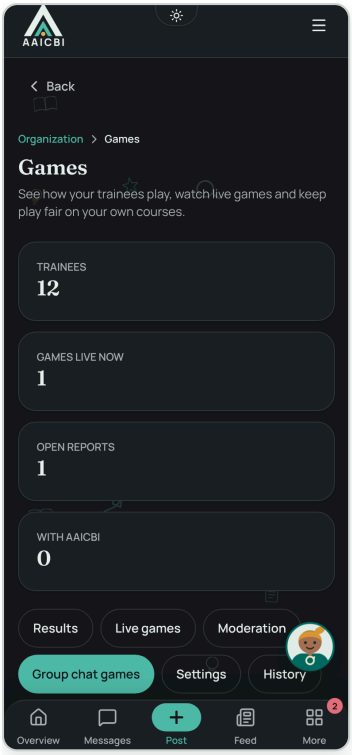


Figure 20. Group chat games for one course.

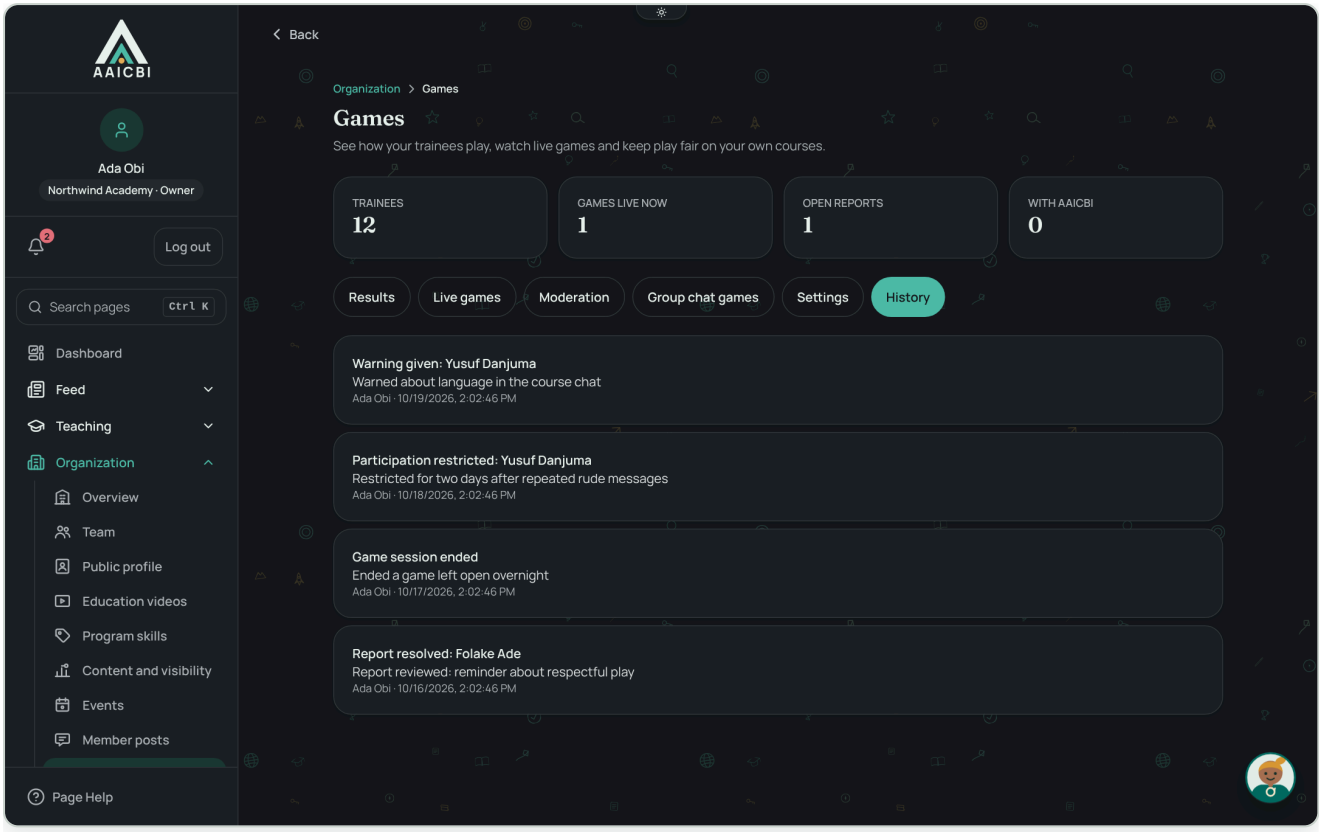
Escalating to the platform administrators

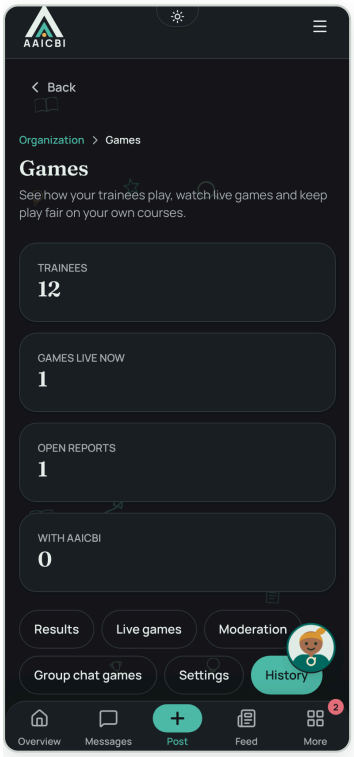
Some cases are bigger than your team should settle alone, such as suspected cheating you cannot confirm. Select **Escalate to AAICBI** on a report and give the reason. A Super Admin on the AAICBI team is notified and decides. The incident stays in your **History** and the **With AAICBI** counter at the top of the page goes up until they close it.

Settings and history

Settings lists each of your courses with the games and chat that are on for it. You can switch a supported game or the course chat **on** only where the platform setting already allows it, and you can always switch one **off**. You can also set the rules of play, such as **Seconds per question**. If your account is not allowed to change settings the tab says “Switching games on or off is not enabled for your organization.” **History** shows every moderation decision with its reason, who made it and when — your team’s record of fair play.



COMPUTER



PHONE

Figure 21. History: the permanent list of decisions and their reasons.

Older tools on each course page

Each course page also contains the arena panels **Ayakbi Arena rules**, **Chat moderation**, **Fastest Fingers**, **Champion ladder**, **Live events** and **Game moderation**. They work on that one course and

follow the same switches. The Games page is the single place that brings them together for all your courses.

Who can do what

Team role	Games page
Owner and **Manager**	View results and live games, and moderate (warn, pause, end sessions, resolve or escalate), subject to your organisation's policy.
Editor and **Viewer**	View only.

LIMITATION

The AAICBI team can switch each ability on or off for your organisation (results, export, live monitoring, ending sessions, restricting trainees, removing players, chat game moderation, changing settings). A switched-off ability disappears from the page or is refused with a plain message.

TIP

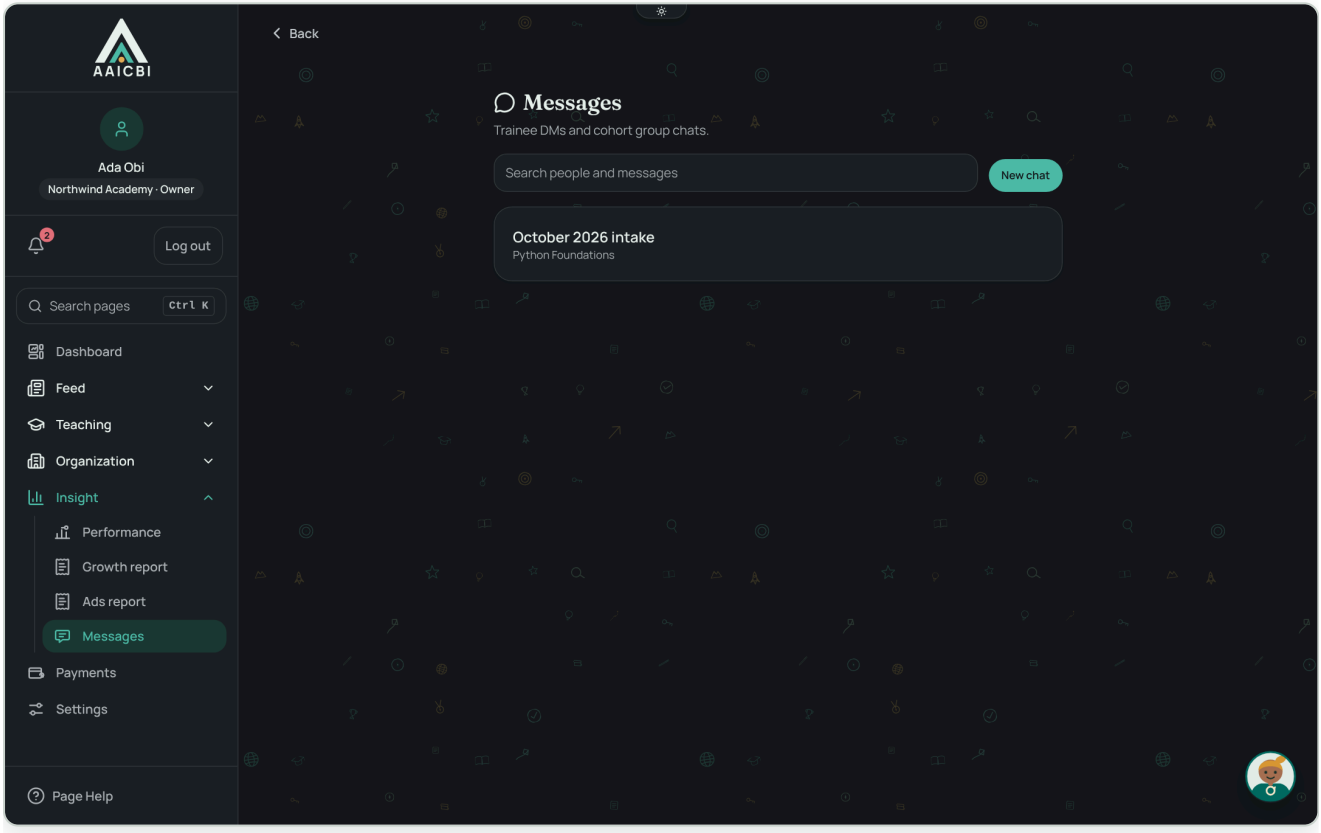
Write reasons you would be comfortable showing the trainee. Reasons are kept with every decision.

A8 Communication and Community Features

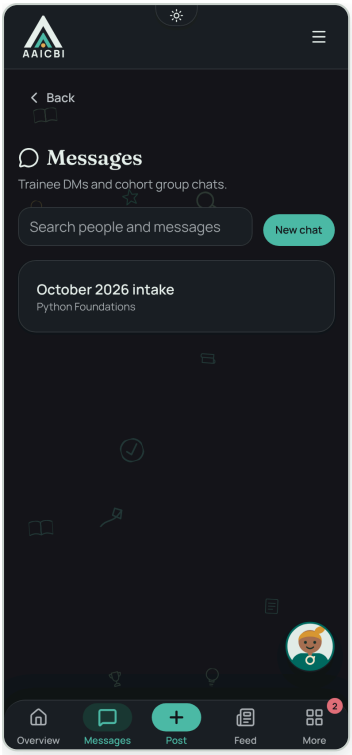
How to talk with trainees and the community, and how to handle behaviour that is not acceptable.

Messages

Open **Insight → Messages** (on a phone **Messages** is on the bottom bar). Conversations with trainees are listed; open one to read and reply. New messages appear in your bell and as a number on the Messages button. Only people you are allowed to talk to appear.



COMPUTER

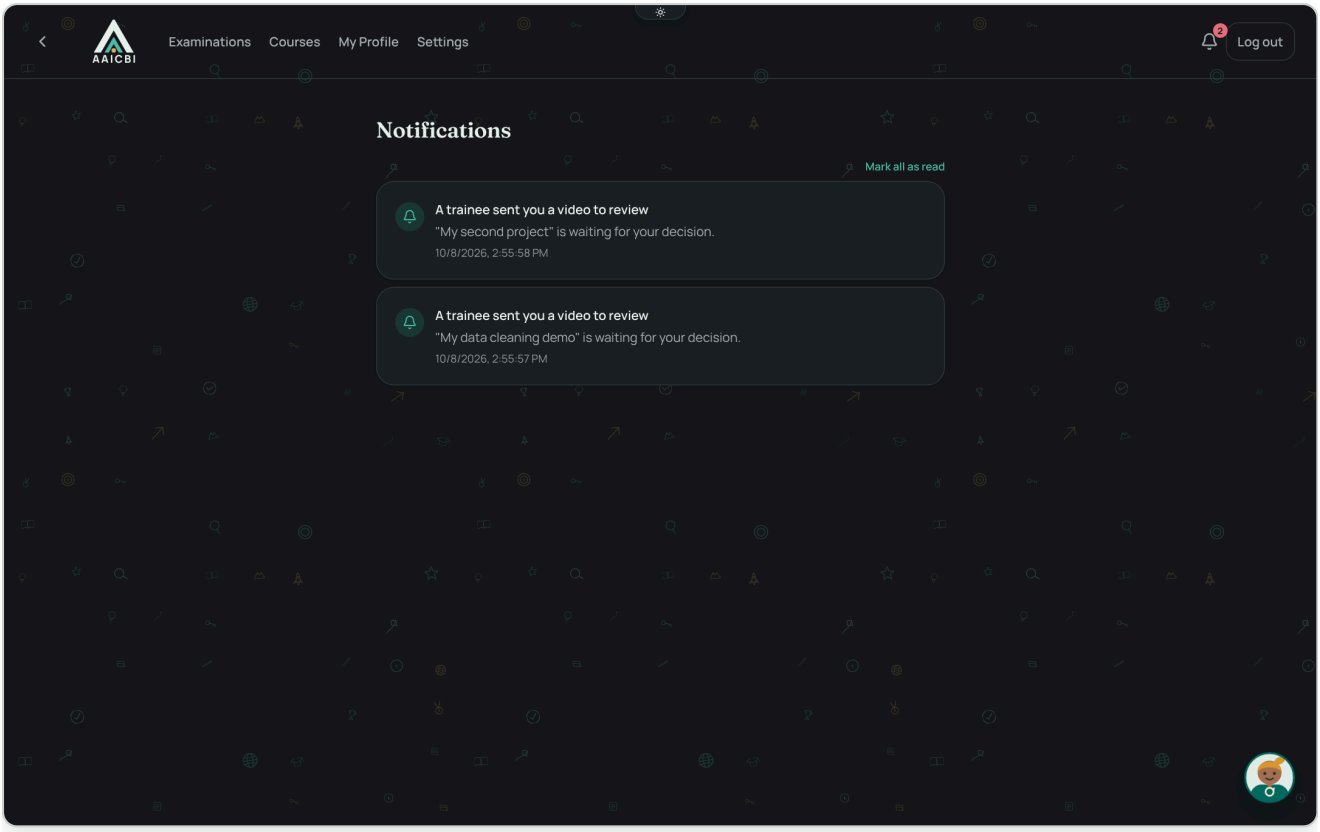


PHONE

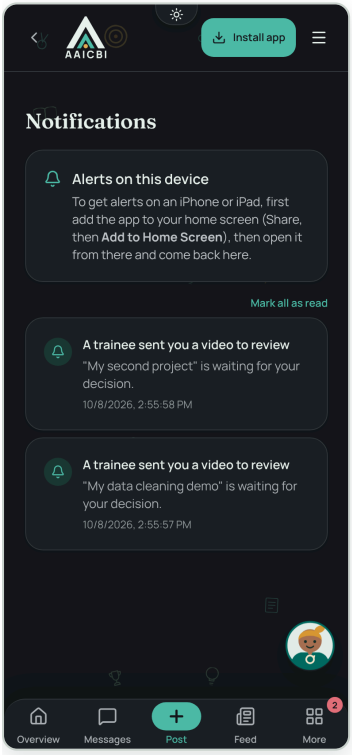
Figure 22. Messages on a computer and on a phone.

Notifications

The **bell** (top of the left menu; on a phone under **More** or at the top of Overview) lists alerts such as courses added to your organisation, replies and decisions. Select an alert to go to the page it is about, and use **See all** or **View All Notifications** for the full list.



COMPUTER



PHONE

Figure 23. Notifications.

Announcing events

TASK

Announce an event

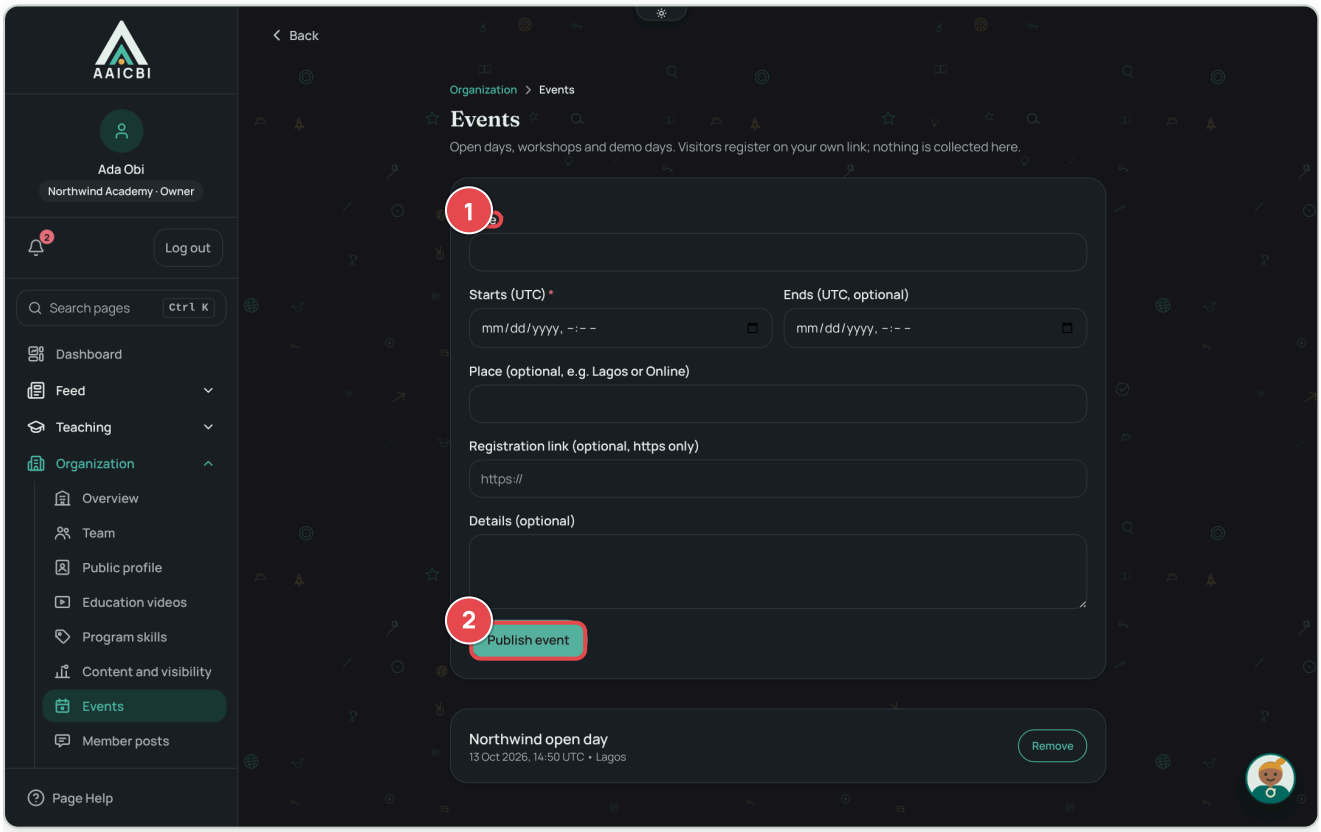
Purpose Tell visitors about open days, workshops and demo days on your public page.

Steps

1. Open **Organization → Events**.
2. Fill in **Title** (required), **Starts (UTC)** and, if you wish, **Ends (UTC)**, **Place**, **Registration link** (a web address starting with https) and **Details**.
3. Select **Publish event**.

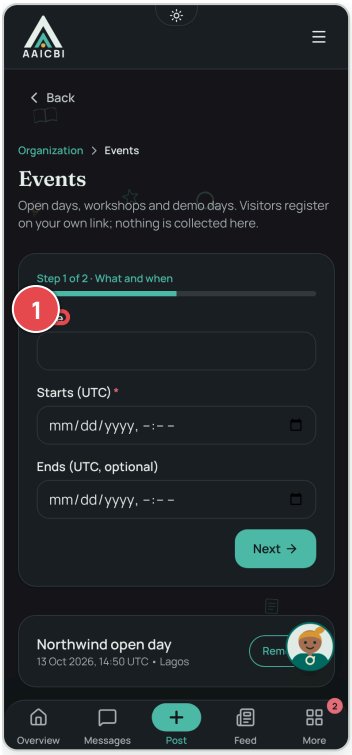
Expected result The event appears under the form and on your public page. To take it down select **Remove**.

If it does not work Times are in UTC, so check the conversion for your location. A registration link must start with https.



1. **Title** is required.
2. **Publish event**.

COMPUTER



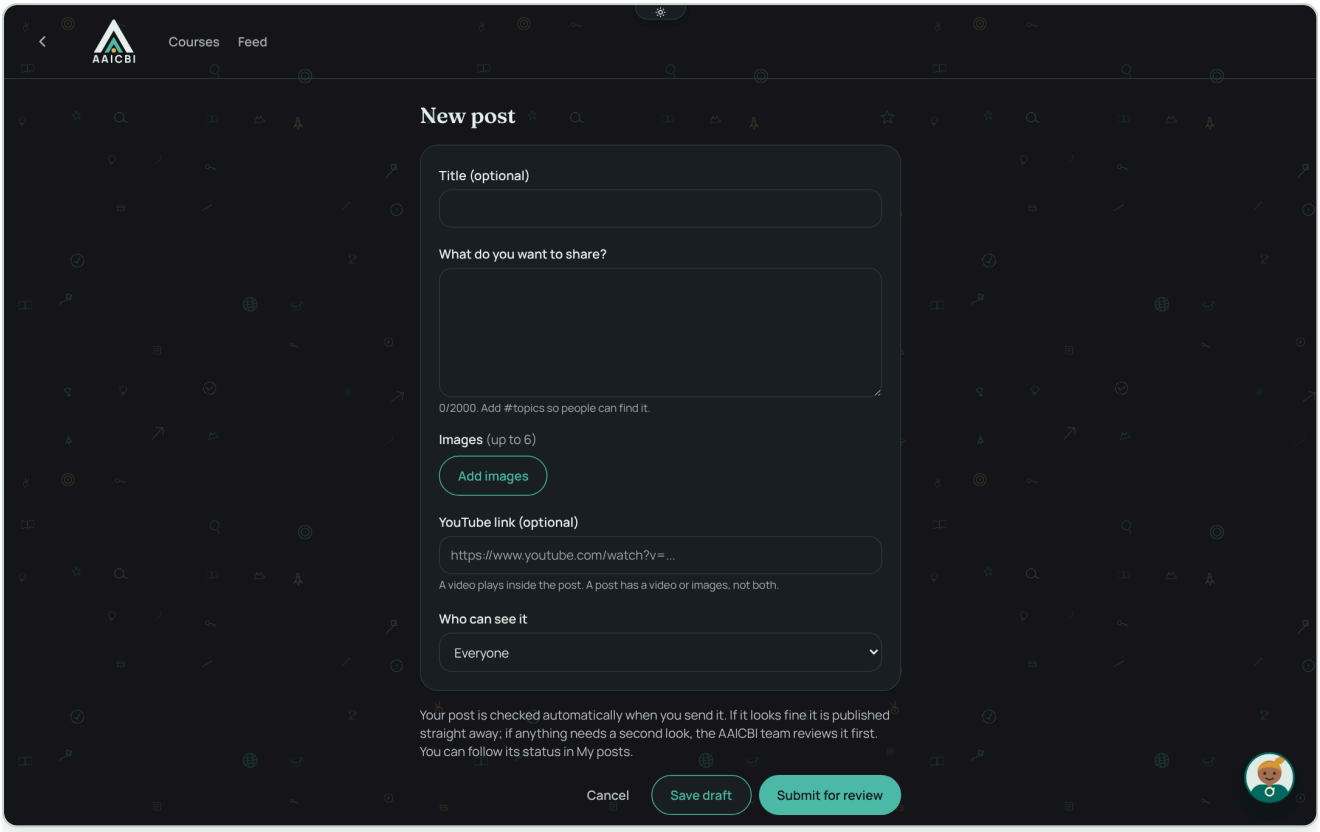
PHONE

1 **Title** is required.

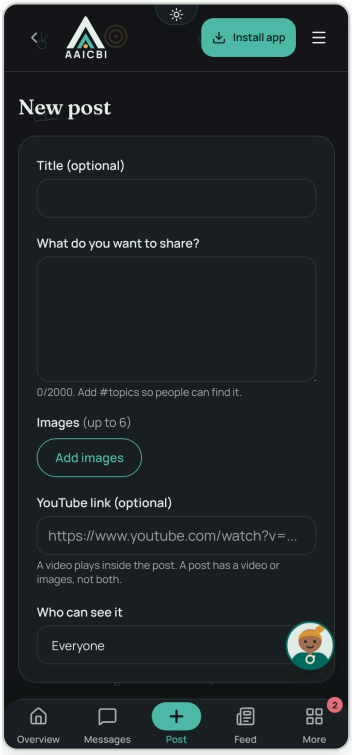
Figure 24. Events. Visitors register on your own link; nothing is collected on the platform.

Posting to the community feed

Open **Feed → Write a post** to share an update as your organisation: a title (optional), your text, up to six images or a YouTube link. Posts are checked automatically; a clean post is published straight away, and anything that needs a second look is held for the review team. **Feed → My posts** shows each post's status and lets you edit, withdraw or delete it.



COMPUTER



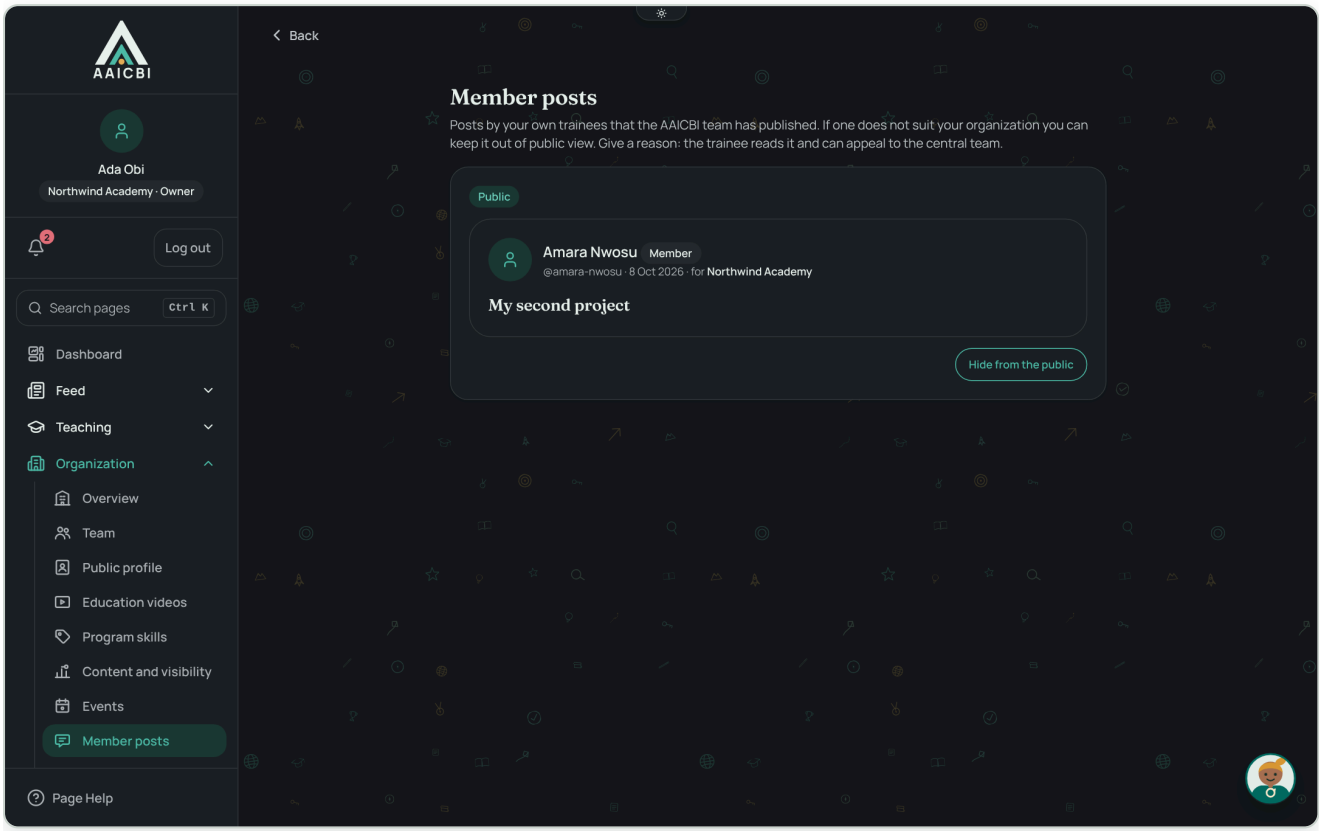
PHONE

Figure 25. Write a post.

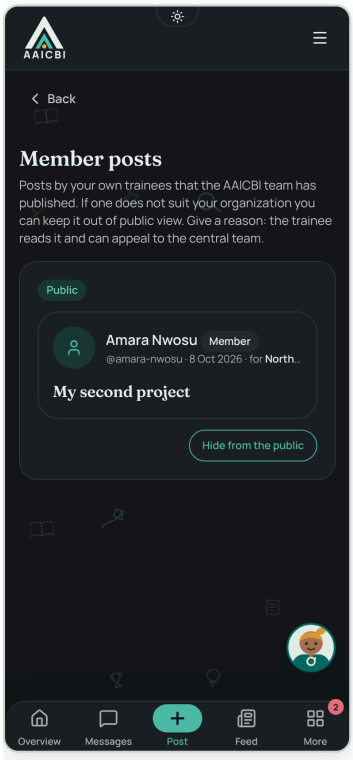
Member posts about your organisation

Organization → Member posts lists posts by trainees that mention your organisation and that the AAICBI team has already published. If one does not suit your organisation you can **Hide from the**

public; you must give a reason, the trainee reads it and can appeal to the central team. This keeps your public page safe without silently removing anyone's work.



COMPUTER



PHONE

Figure 26. Member posts.

Group chats and game behaviour

Course group chats belong to trainees and their courses. You do not read private direct messages between trainees. For chat inside the games, use the **Group chat games** tab (Chapter 7) to see recent messages, remove messages that break the rules and restrict a player, always with a reason.

Reporting inappropriate behaviour

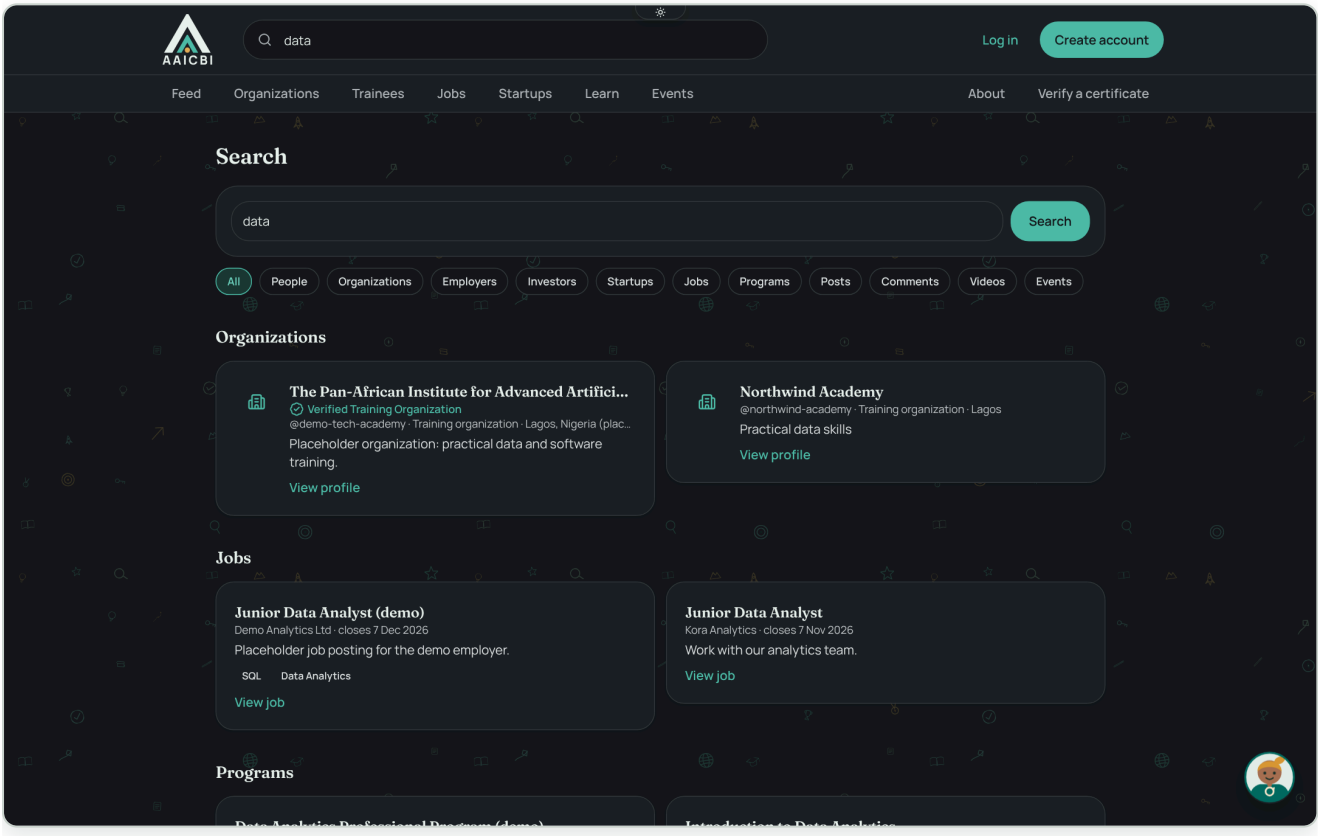
- In a game or its chat: use **Moderation** on the Games page; escalate to AAICBI if needed.
- A member post about your organisation: **Hide from the public** with a reason.
- Anything else — a profile, a person, a message: tell the AAICBI team using Messages or your support contact (see **Getting help**).

A9 Search, Discovery, and Public Visibility

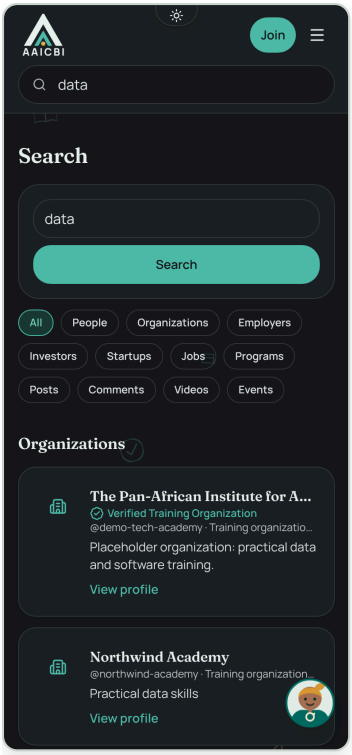
How people find you, how you find others, and what you control about what the public sees.

Searching the ecosystem

The search box at the top of every public page (and **Search pages** in your menu for pages inside your workspace) finds people, organisations, employers, investors, startups, jobs, programmes, posts, comments, videos and events. Type a word and select **Search**, then narrow with the buttons **All**, **People**, **Organizations**, **Employers**, **Investors**, **Startups**, **Jobs**, **Programs**, **Posts**, **Comments**, **Videos**, **Events**.



COMPUTER

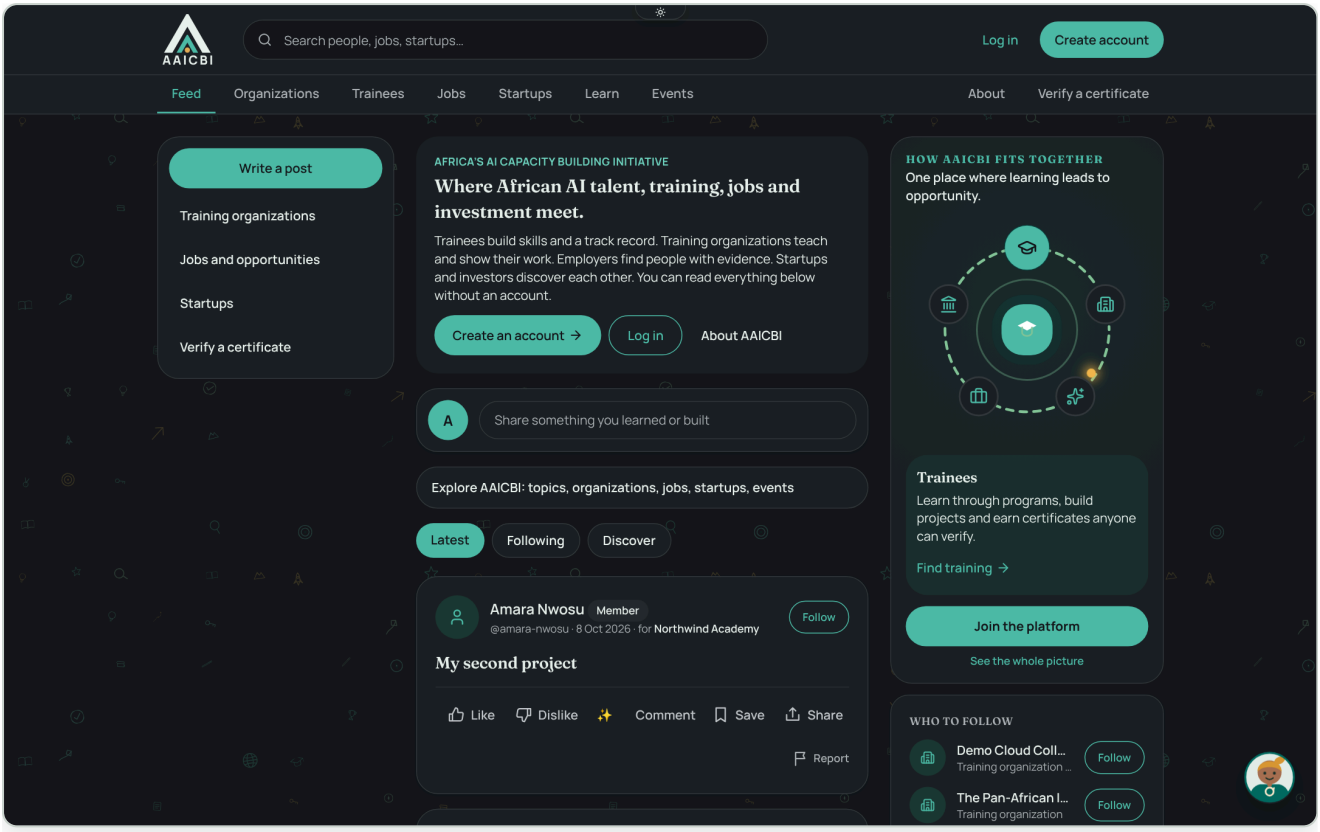


PHONE

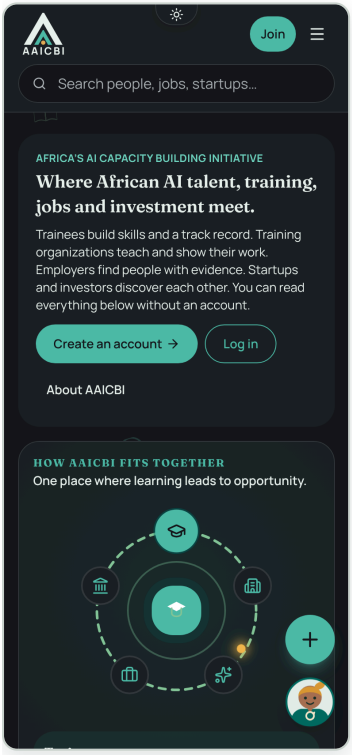
Figure 27. Search results for “data”: organisations, jobs and programmes appear in groups.

The home feed and public pages

The home page is the public feed, with links to **Organizations**, **Trainees**, **Jobs**, **Startups**, **Learn** and **Events**. Visitors can read much of it without an account; creating posts, following and messaging need one.



COMPUTER



PHONE

Figure 28. The public home page and feed.

What affects your public visibility

What you change	Where	Effect
Show or hide your public page	**Organization → Public profile → Show my organization page publicly**	Controls whether visitors can see your page at all.
Tagline, location, logo, cover, About	**Organization → Public profile**	What appears on your page, search and cards.
Skills each programme teaches	**Organization → Program skills**	Lets people who watch a video about a skill be shown your matching programmes.
Events	**Organization → Events**	Shown on your public page.
Trainee videos	**Organization → Education videos**	Videos presented by trainees, published only after the trainee agrees and the AAICBI team reviews them.
Posts	**Feed → Write a post**	Appear in the feed under your organisation's name.

Publishing a trainee education video

TASK

Ask a trainee to present a video

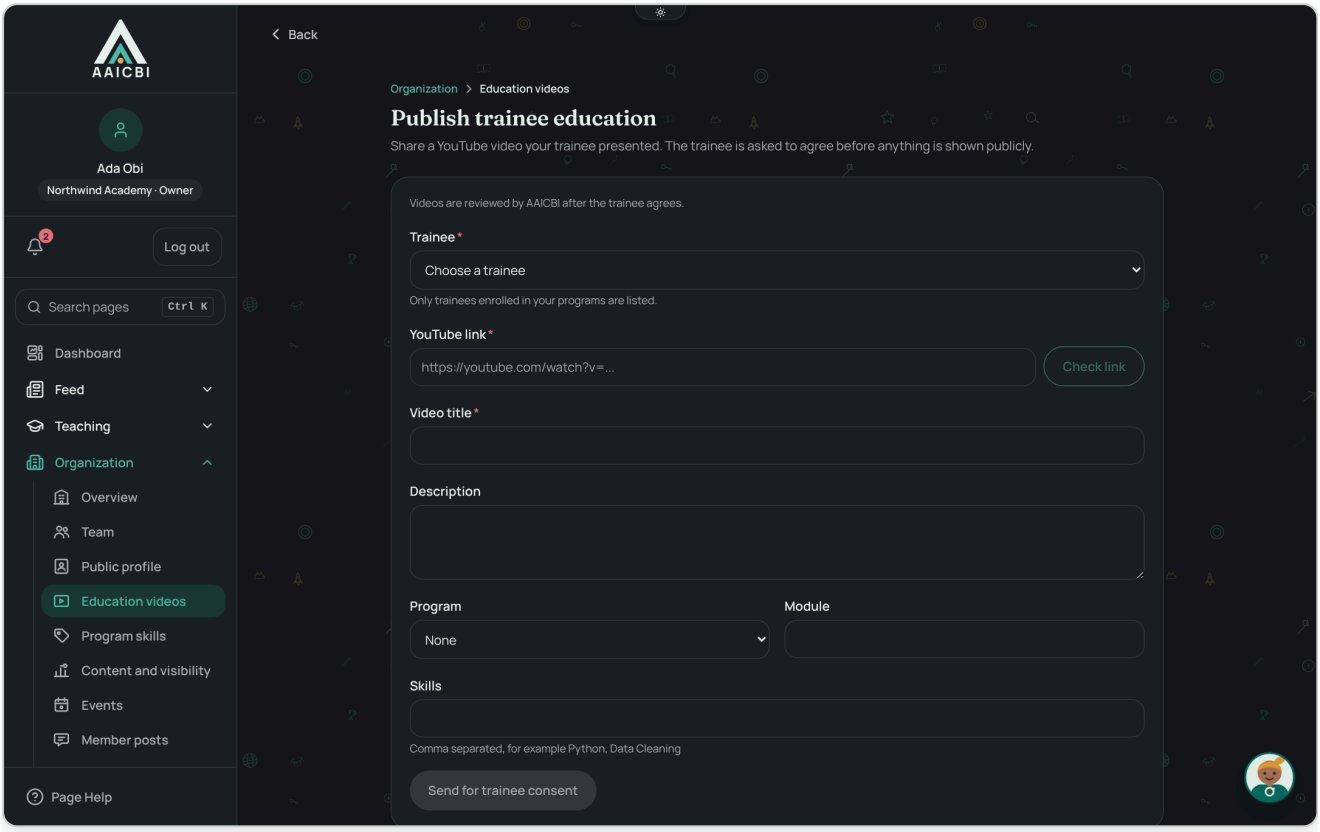
Purpose Show your trainees' work publicly, with their agreement.

Steps

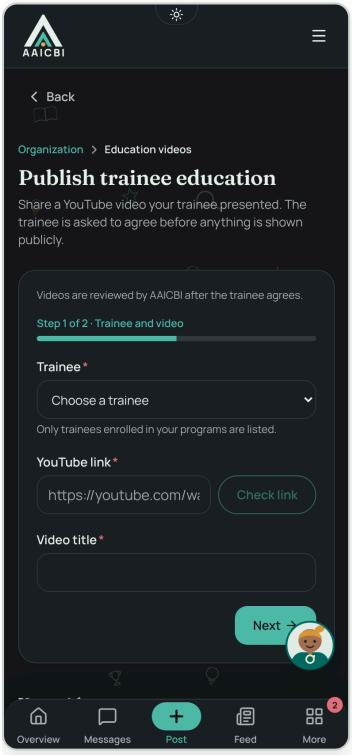
1. Open **Organization → Education videos**.
2. Choose the **Trainee** (only trainees enrolled in your programmes are listed).
3. Paste the **YouTube link** and select **Check link**.
4. Fill in **Video title**, and if you wish **Description**, **Program**, **Module** and **Skills**.
5. Select **Send for trainee consent**.

Expected result The trainee is asked to agree. Nothing is public until they agree and the AAICBI team has reviewed the video.

If it does not work If **Check link** rejects the address, make sure it is a normal YouTube link.



COMPUTER



PHONE

Figure 29. Publish trainee education: consent comes first.

LIMITATION

Employers and investors can browse training organisations and see the skills each programme teaches. The platform does not let an organisation contact them from this manual's pages; they reach you through your public page and Messages.

A10 Reports, Analytics, and Monitoring

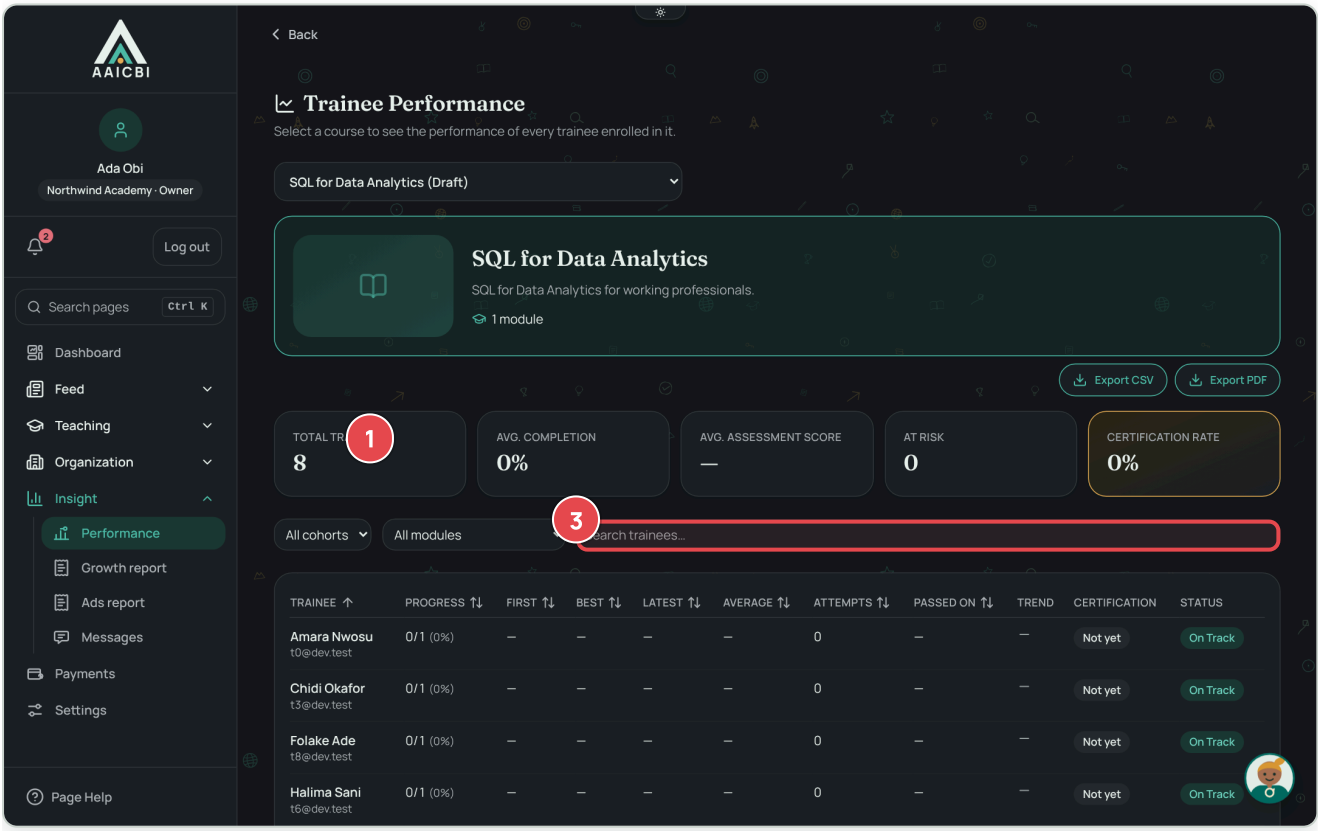
What each number means and how it can guide your training decisions.

Organization → Overview

Your starting point. **Active trainees** and **Seat usage** show how full your plan is; **Courses** shows how many are published; **Certificates issued** counts certificates not revoked; **Completion** is completed enrolments as a share of all enrolments. **Progress by course** shows, for each course, how many enrolled, how many completed and the rate. Use it to see which course needs attention first.

Insight → Performance

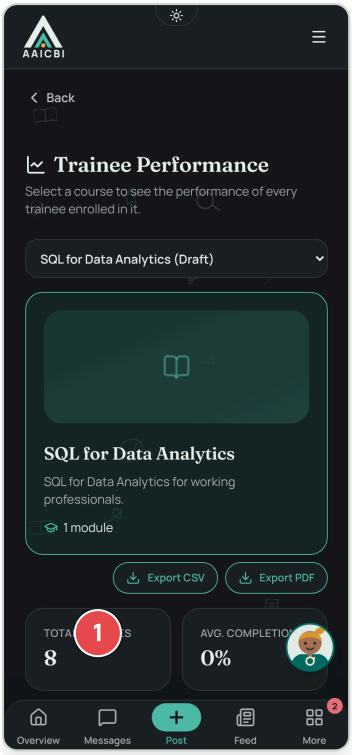
Choose a course to see **Trainee Performance**. Cards show **Total trainees**, **Avg. completion**, **Avg. assessment score**, **At risk** and **Certification rate**. The table lists each trainee with their progress, first, best, latest and average scores, attempts, modules passed, trend, certification and status (for example **On Track**). Filter by cohort or module and search by name. Select **Export CSV** or **Export PDF** to keep a copy.



1 Summary cards: trainees, completion, scores, at risk, certification.

3 Filters and search.

COMPUTER



1. Summary cards: trainees, completion, scores, at risk, certification.
3. Filters and search.

Figure 30. Trainee Performance for a course, with filters and exports.

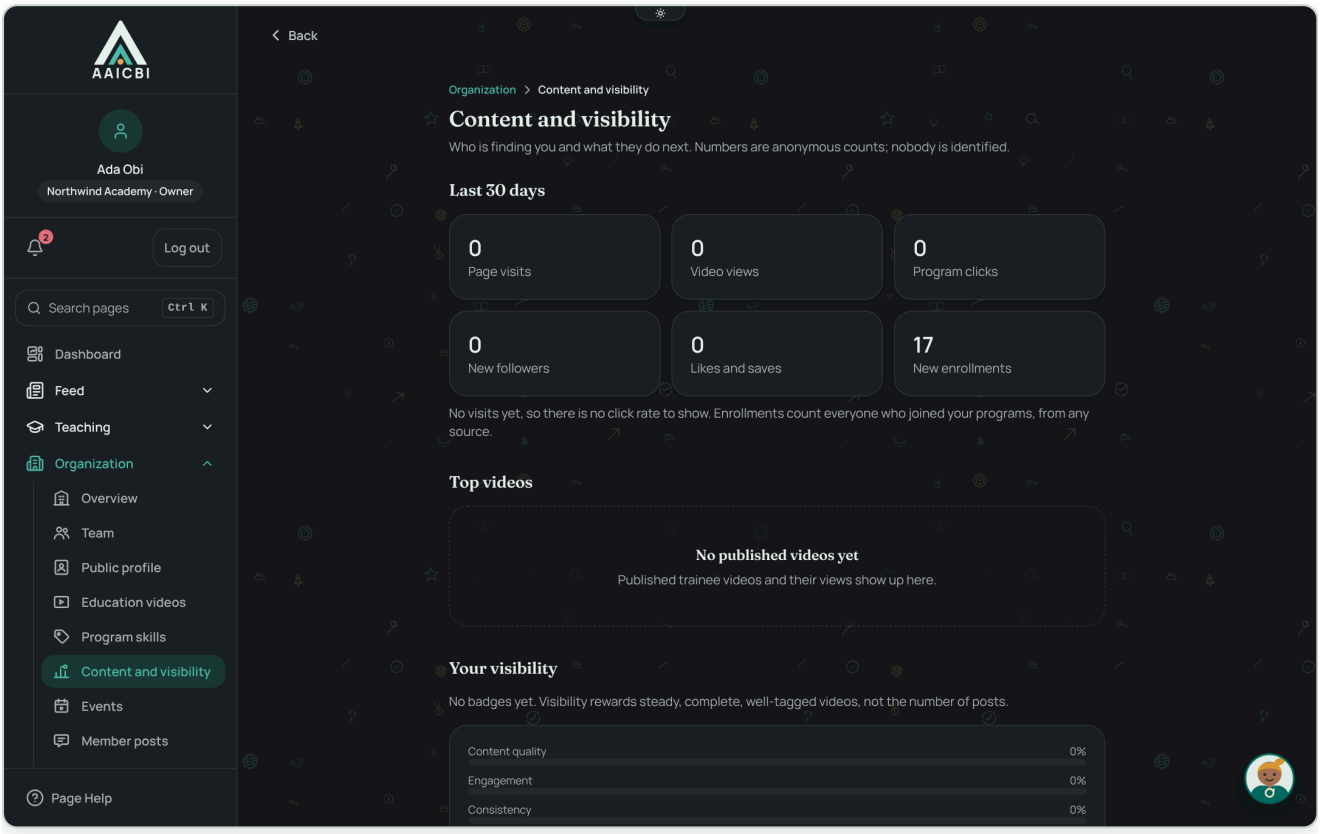
Indicator	What it means	What to do with it
Avg. completion	On average, how much of the course trainees have finished.	A low number early on is normal; a low number late suggests the course is too long or support is needed.
Avg. assessment score	The average score on module assessments.	A low average on one module often means the lessons for it need work.
At risk	Trainees who crossed an inactivity or failed-attempts threshold.	Message them early (see **Early Warnings**).
Certification rate	Share of trainees who earned a certificate.	Compare courses to see where trainees get stuck.
Trend	Whether a trainee's scores are rising or falling.	Encourage rising trainees; check on falling ones.

Course reports and other pages

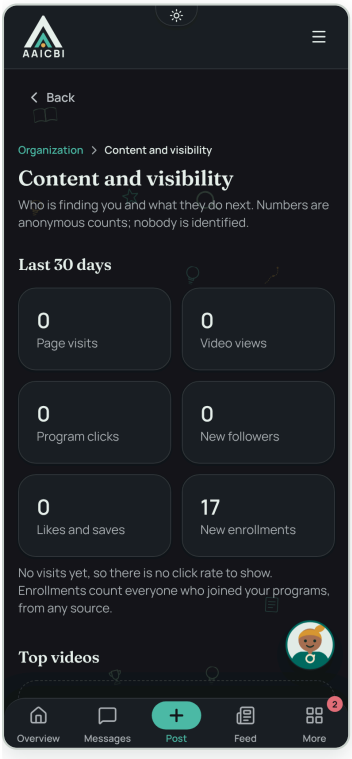
- **Early Warnings** (in each course): trainees who passed the inactivity or failed-attempts thresholds you set.
- **Certificates Issued** (in each course): certificates earned.
- **Games → Results**: game and practice results with accuracy; **Download spreadsheet** when allowed (Chapter 7).
- **Organization → Content and visibility**: for the last 30 days, **Page visits**, **Video views**, **Program clicks**, **New followers**, **Likes and saves** and **New enrollments**, plus your most-watched videos. The

counts are anonymous.

- **Insight → Growth report** and **Insight → Ads report**: campaign reports from the AAICBI team's growth and advertising tools. Where they show data they cover the free taster game and any ads booked for your organisation.



COMPUTER



PHONE

Figure 31. Content and visibility: anonymous counts of how your public content is seen.

LIMITATION

Reports show what the platform has recorded. A new course with no activity shows empty states or zeros. The numbers update as trainees learn.

Exports

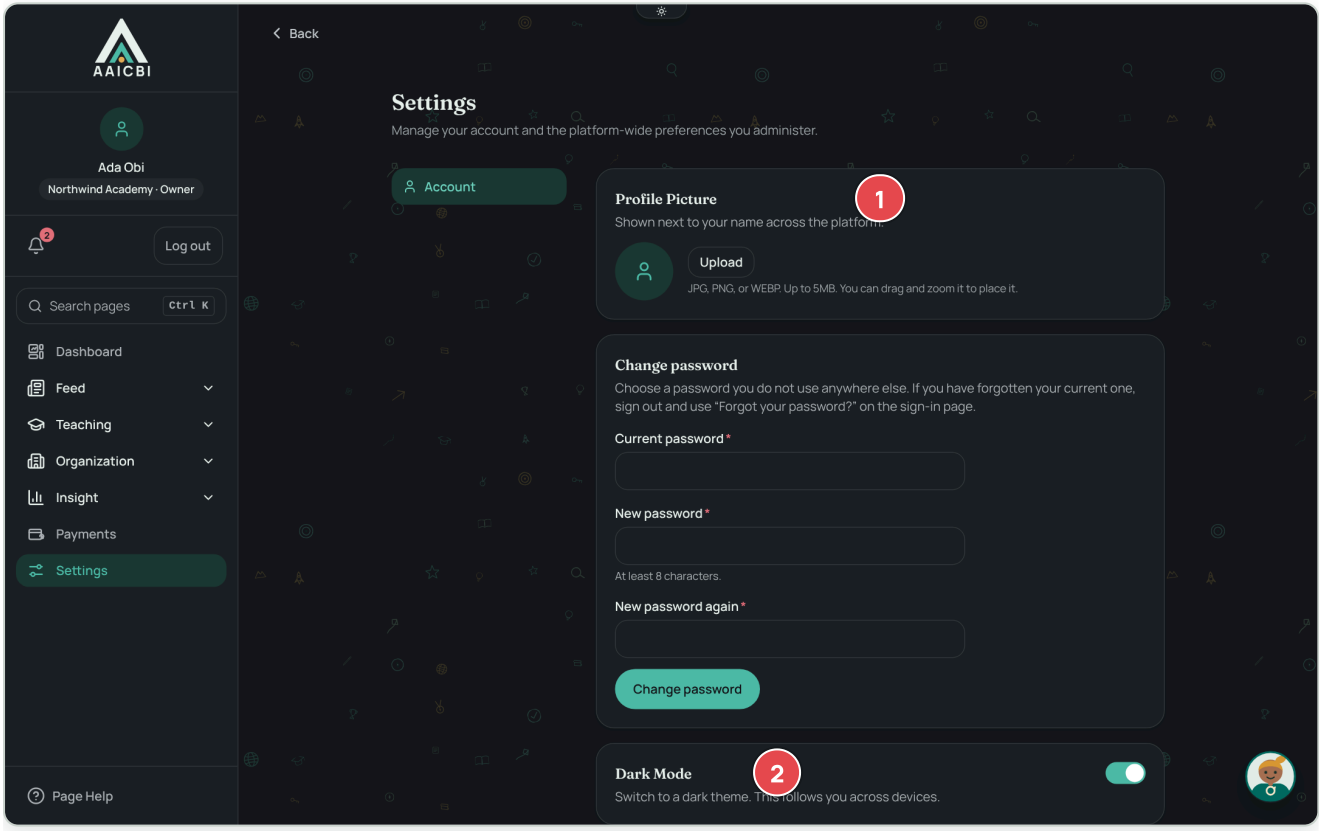
- Performance: **Export CSV** and **Export PDF**.
- Game results: **Download spreadsheet**, only when the AAICBI team has allowed exports for your organisation.
- Take care of exported files: they contain trainees' names and results.

A11 Account Settings and Security

Keep your account and your trainees' information safe.

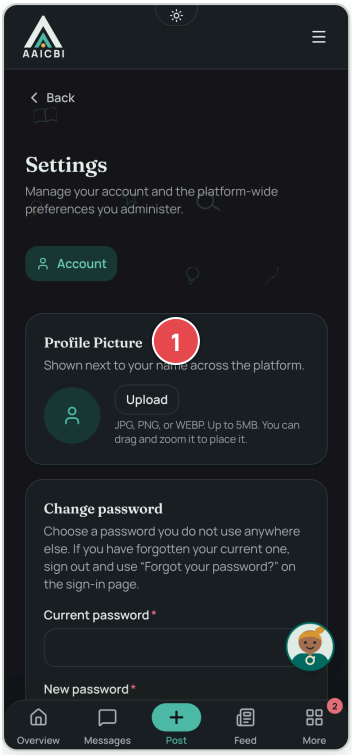
Your account

Open **Settings** (bottom of the left menu, or **More → Settings** on a phone). The **Account** page has your **Profile Picture** (**Upload**, JPG/PNG/WEBP up to 5 MB), **Change password** and **Dark Mode**. Under **Support**, **Message the Super Admin** lets you send a **Subject** and **Your message** straight to the AAICBI Super Admin's inbox — the in-platform way to ask for help. Your name and role are shown at the top of the left menu. Team members each have their own sign-in, and what each person changes is recorded under their own name in **Organization → Team → Recent activity** (visible to Owners and Managers).



1. **Profile Picture** with **Upload**.
2. **Dark Mode** switch.
3. **Support**: message the AAICBI Super Admin.

COMPUTER



PHONE

1. **Profile Picture** with **Upload**.
2. **Dark Mode** switch.
3. **Support**: message the AAICBI Super Admin.

Figure 32. Settings: profile picture, change password, dark mode and support.

TASK

Change your password

Purpose

Keep your account safe, for example after sharing a computer or if you think someone knows your password.

Before you begin

You are signed in and you know your current password. (If you have forgotten it, use **Forgot your password?** on the sign-in page instead.) Every team member, whatever their role, can change their own password.

Steps

1. Open **Settings**.
2. In **Change password** type your **Current password**.
3. Type the **New password** (at least 8 characters) and type it again under **New password again**.
4. Select **Change password**.

Expected result A message says your password has been changed. Use the new one next time you sign in.

If it does not work "Your current password is not right" means the first box is wrong. "The two new passwords do not match" means the second and third boxes differ. After several wrong attempts you must wait a few minutes.

Managing your team safely

TASK Invite a team member

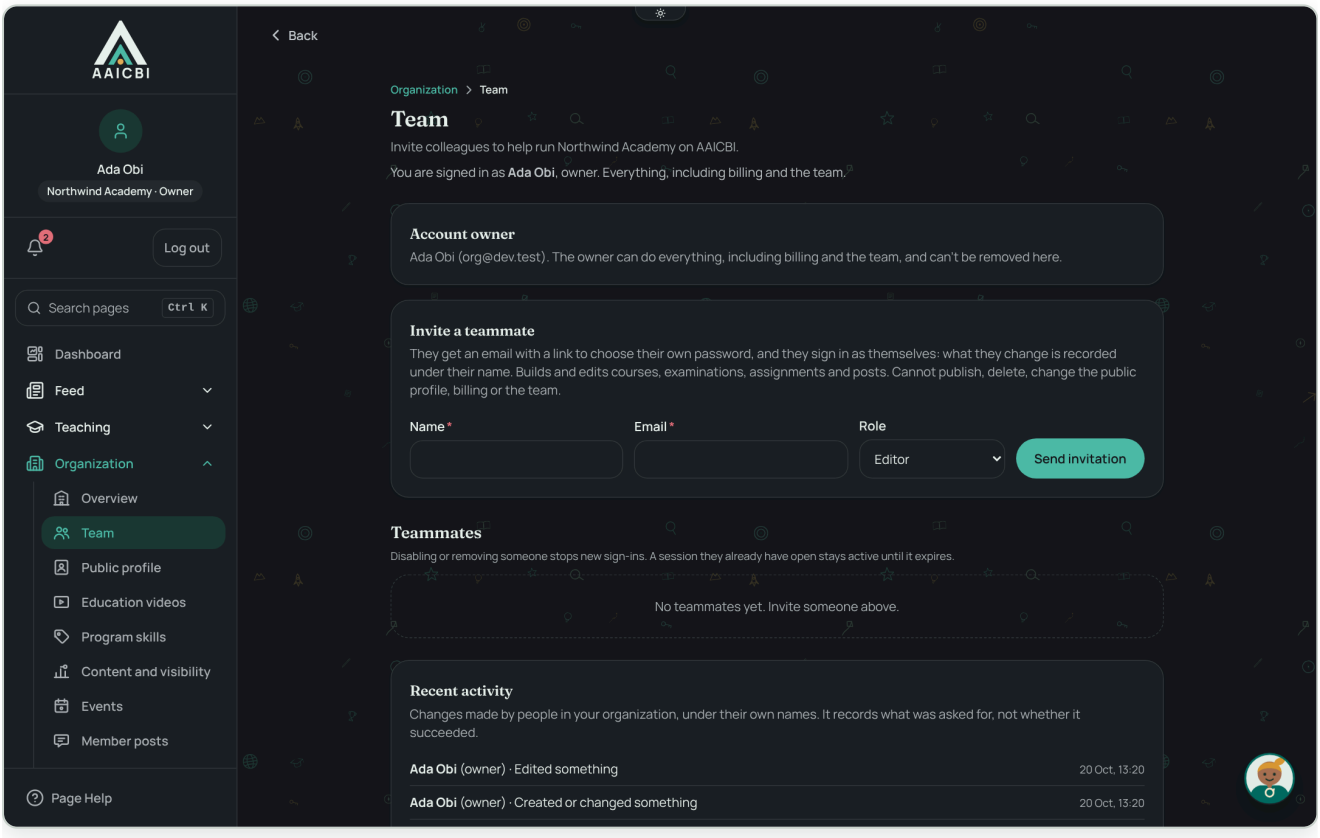
Before you begin You are an Owner or Manager.

Steps

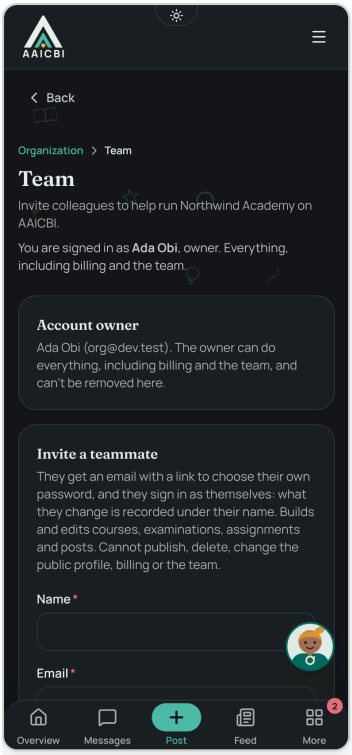
1. Open **Organization → Team**.
2. Under **Invite a teammate** enter **Name**, **Email** and choose a **Role**: Editor (the default), Manager or Viewer.
3. Select **Send invitation**.

Expected result The person receives an email with a link to choose their own password. They then sign in as themselves.

If it does not work To change someone's role, or to disable or remove them, use the controls under **Teammates**. Disabling or demoting takes effect on their next request.



COMPUTER



PHONE

Figure 33. Team: invite people, set roles and review recent activity.

Protecting your credentials

- Use a long password that you do not use anywhere else.
- Never share your password. Give colleagues their own invitation instead.
- Sign out on shared computers with **Log out** (top of the left menu; on a phone under **More**).
- Be careful with exported files that contain trainee names.
- Only sign in on the real AAICBI address, and be suspicious of messages that ask you to confirm your password.

Recognising suspicious activity

- **Team → Recent activity** shows changes you did not expect.
- A teammate you did not invite.
- Alerts about courses, payments or trainees you do not recognise.
- If you notice anything like this, change what you can, remove the person in **Team** and contact AAICBI at once (see **Getting help**).

Logging out safely

Select **Log out** at the top of the left menu. On a phone open **More** and choose **Log out**. Close the browser tab afterwards on a shared device.

Role-based access

What you see depends on your role (Chapter 3) and on what the AAICBI team has switched on for your organisation. If something is missing, that is by design, not a fault. The platform checks your permissions on the server for every action, so it is never enough to hide a button.

A12 Troubleshooting and Frequently Asked Questions

Safe things to try first, and when to contact support.

Problem	Try this	If it persists
I cannot sign in	Check the email and password. Wait a few minutes if you see “Too many login attempts”. If you see “pending approval”, wait for the approval email.	Contact AAICBI support.
I forgot my password	On the sign-in page select **Forgot your password?**, enter your email and follow the link we send (it works for one hour). This works for owners and team members.	Check spam; a disabled team member gets no link, so ask an Owner or Manager to check **Team**.
A dashboard feature is missing	Check your role (shown under your name). Editors and Viewers see fewer controls. Some tools are for the AAICBI team only.	Ask an Owner to review your role.
I cannot open a page or action	You may not have that permission, or the ability may be switched off for your organisation.	Ask an Owner; for games, ask AAICBI.
Trainees are missing from a list	Open **Organization → Trainees** and search by name or email. Check they are enrolled in one of **your** courses (a course’s **Enrollments** page). Clear the filters on Performance.	Check the course is published and has seats.
A course or enrolment looks wrong	Open the course’s **Enrollments** page: check the status, **Extend Access** or **Revoke**.	Contact AAICBI.
Game results are not showing	Try **All time**, clear the filters and check the right course is chosen. Games only count after trainees have played.	The games may not be switched on for the course; ask AAICBI.
Chat or game problems	Use **Refresh** on **Live games**. Check **Restrictions** in case a trainee is paused.	Escalate to AAICBI.
The page looks wrong on a phone	Rotate the phone, refresh, and try the **More** menu. Long pages such as the course page scroll down.	For complex tasks use a computer; the platform recommends it for course building.
Slow loading	Move to a stronger connection, close other tabs and refresh. The platform keeps pages light for slow connections.	Try again later.

Frequently asked questions

Can I see another organisation's trainees? No. You only ever see your own.

Can I use the Gaming Studio? No. It belongs to the AAICBI team. You manage results and moderation on the **Games** page.

Can I give a trainee access to a paid course? Yes, from the course's **Enrollments** page with **Grant Access**.

Who sees my public page? Anyone, if **Show my organization page publicly** is on and the AAICBI team has switched public pages on.

Where do I report a problem? See **Getting help** at the end of this manual.

Part B — Trainee User Manual

B1 Welcome to AAICBI

This guide helps you create an account, find your way around and make the most of your learning.

What the AAICBI Ecosystem is

The AAICBI Ecosystem is a learning and opportunity platform from Africa's AI Capacity Building Initiative, organised by Futybills Tech Community. Training organisations teach courses on it. Employers, investors and startups use it to find talent and ideas. You use it to **learn**, to **practise**, to **connect** with other learners and to **build a profile** that others can find.

What you can do after creating an account

- Study **courses** you are enrolled in, with lessons, practice and assessments.
- Take **examinations** and **assignments** and read your results and feedback.
- Earn **certificates** that anyone can verify.
- Play educational **games** and, where your course allows it, challenge a coursemate in the **Ayakbi Arena**.
- Chat with coursemates in the **course chat** and send **messages** to instructors and organisations.
- Complete a **profile** with your skills, education and projects, and choose who can see it.
- Read and write posts in the community **Feed**, and explore organisations, jobs and events.
- Ask **Loop**, the friendly guide, how anything works.

Using the platform responsibly

- Be kind and respectful in chats and posts. Moderators can remove messages and limit play when rules are broken.
- Keep your password private. Never share it, not even with someone who says they work for AAICBI.
- Share personal details carefully. Your profile can be public — see Chapter 4.
- Do your own work in examinations and assignments.

> **TIP**
> You can use AAICBI on a computer, tablet or phone. This manual shows the computer and the phone side by side wherever they differ.

B2 Creating Your Account

Choose the Trainee account, fill in the form, confirm your email and sign in.

TASK

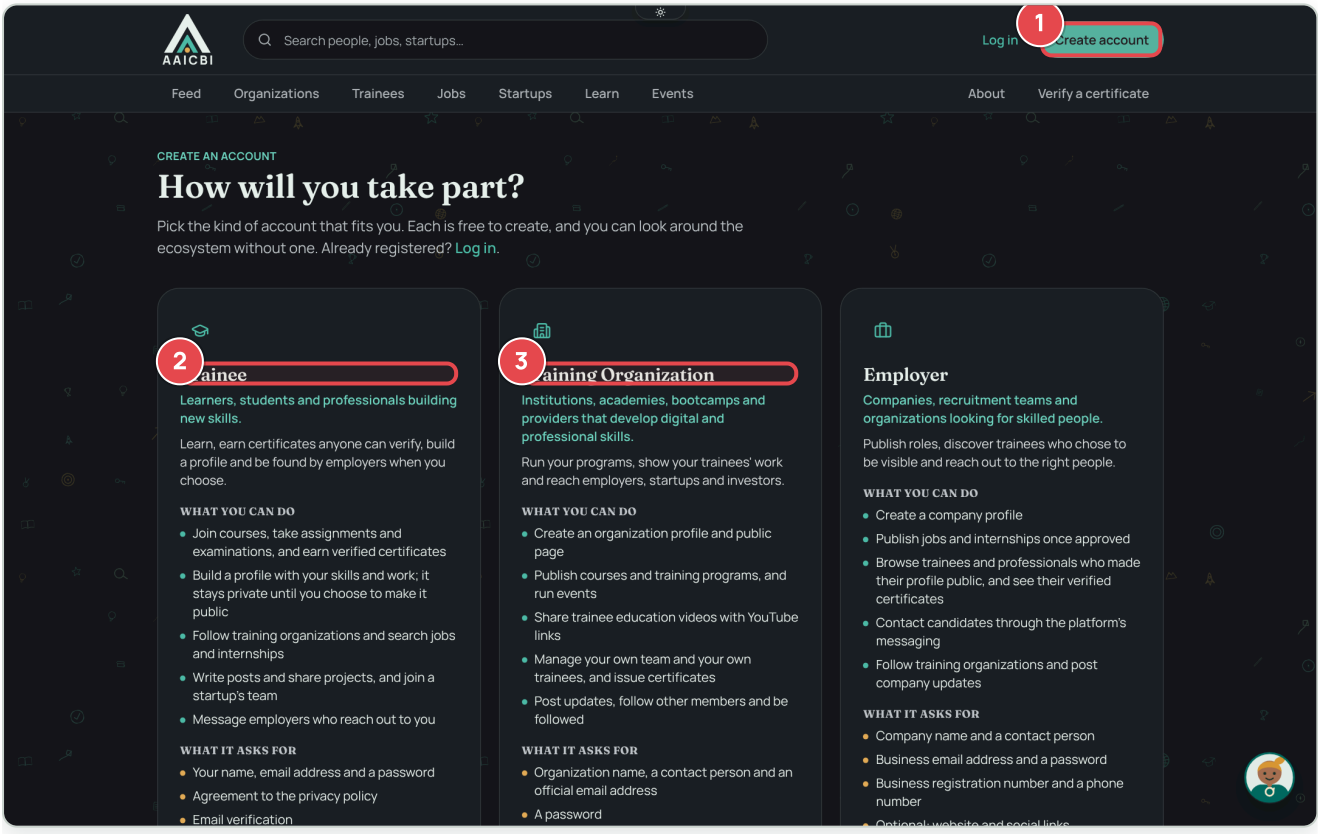
Choose the Trainee account type

Purpose Each kind of person has their own sign-up. The Trainee account is for people who learn.

Steps

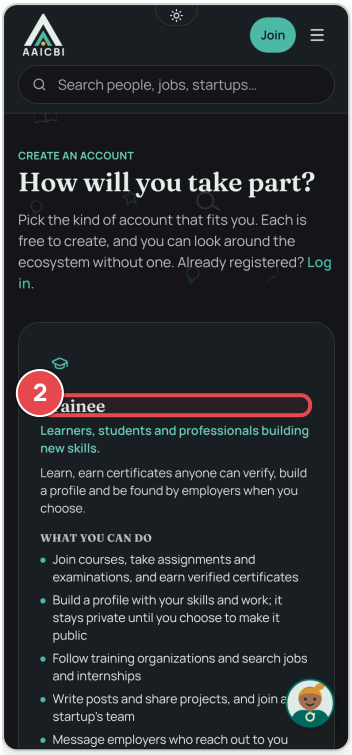
1. Open the AAICBI Ecosystem in your browser.
2. Select **Create account** at the top right of the page (or open the **Join** page).
3. Find the **Trainee** card (the first card) and select **Create a Trainee account**.

Expected result The **Create Your Account** page opens.



1. **Create account** opens the Join page from any page.
2. The **Trainee** card is for learners.
3. The **Training Organization** card is for organisations that run courses.

COMPUTER



PHONE

2 The **Trainee** card is for learners.

3 The **Training Organization** card is for organisations that run courses.

Figure 34. The Join page. Choose **Trainee** if you are a learner. The other cards are for training organisations, employers, investors and startup founders.

TASK Fill in the registration form

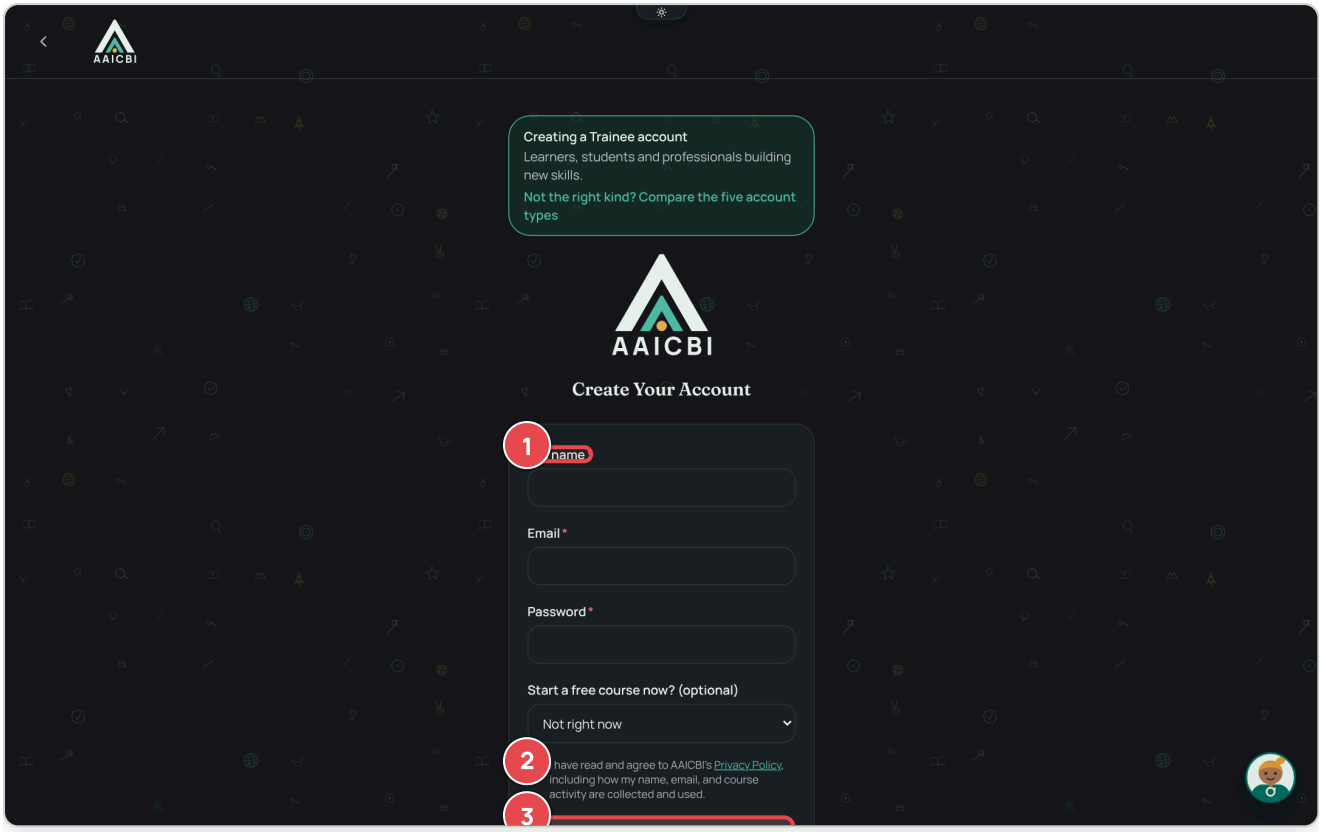
Before you begin You need an email address you can open right now, and a password of at least 8 characters.

Steps

1. Type your **Full name**.
2. Type your **Email**.
3. Choose a **Password** (at least 8 characters).
4. If you see **Start a free course now? (optional)**, pick a free course or leave it on **Not right now**.
5. Read the **Privacy Policy** (the link opens it) and tick the box **I have read and agree to AAICBI's Privacy Policy**. The **Create account** button stays grey until you do.
6. Select **Create account**.

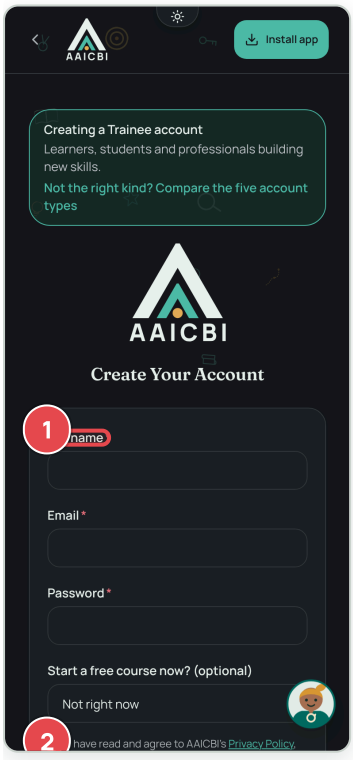
Expected result A **Check your email** page tells you a verification link has been sent.

If it does not work A red message under the form explains what to fix (for example an email that is already registered). If the button does not respond, make sure the Privacy Policy box is ticked. You can also choose **Sign up with Google** if that button is shown.



1. Your **Full name**, **Email** and **Password**.
2. Tick the Privacy Policy box.
3. **Create account**.

COMPUTER



PHONE

1. Your **Full name**, **Email** and **Password**.
2. Tick the Privacy Policy box.
3. **Create account**.

Figure 35. The trainee registration form.

TASK

Verify your email and sign in for the first time

Purpose Verification proves the address is yours and activates your account.

Steps

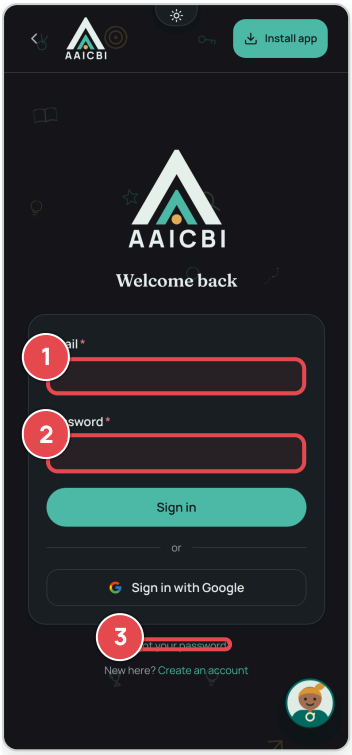
1. Open your email inbox and find the message from AAICBI.
2. Open the verification link in the message. A page confirms **Email Verified**.
3. Select **Sign in** (or open the trainee sign-in page).
4. Enter your **Email** and **Password** and select **Sign in**.

Expected result You arrive on your trainee dashboard.

If it does not work No email? Check your spam or junk folder. Right after you register you are taken to the sign-in page, which shows **Your account is created. Verify your email to finish.** with a **Send the link again** button — select it. If **Verification Failed** appears the link may have expired; use **Send the link again**. Still stuck? See Chapter 12.

1. Your **Email**.
2. Your **Password**.
3. **Forgot your password?**

COMPUTER



PHONE

1. Your **Email**.
2. Your **Password**.
3. **Forgot your password?**

Figure 36. The trainee sign-in page. **Forgot your password?** is under the form.

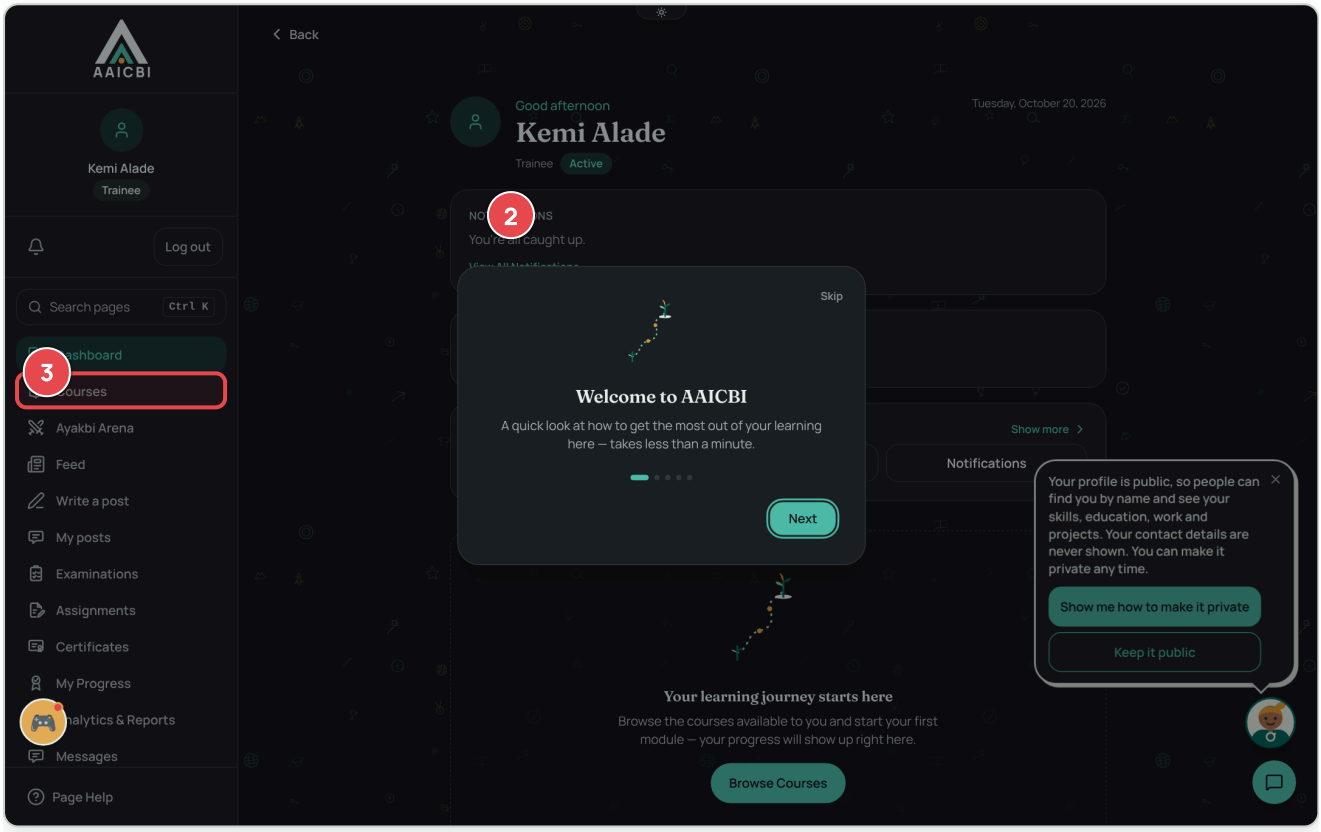
IMPORTANT

Use only the real AAICBI address in your browser, and never type your password into a page you reached from an unexpected message.

B3 Exploring the Trainee Dashboard

Your dashboard is the first page you see after signing in. It shows what to do next.

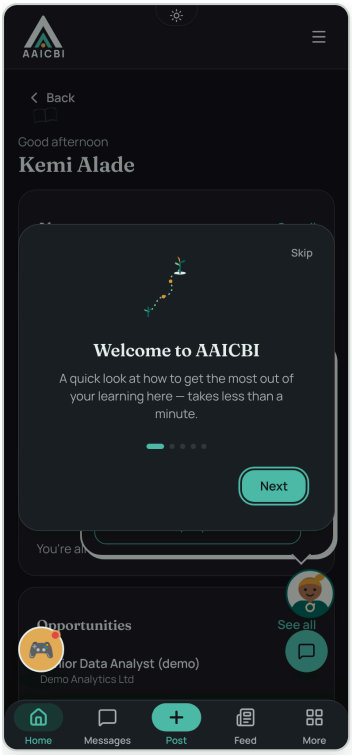
What is on your dashboard



2 **Notifications** with **View All Notifications**.

3 The menu: **Courses** and the other sections.

COMPUTER



PHONE

Figure 37. The trainee dashboard on a computer (left) and on a phone (right).

Part of the page	What it shows	What you can do
Chat is live cards	A course group chat with new messages, with a short preview and a count such as "4 new".	Select **Open chat** to read and reply, or **Later** to dismiss the card for now.
Continue learning / course card	The course you were studying, a progress bar such as "1 of 1 module complete", and a tag such as **PAID** or **FREE**.	Select **Resume** to continue where you stopped.
Your examinations	How many examinations are **Available**, **In progress** and **Passed**.	Select **View all** to open the full list.
Notifications	Your latest alerts and a count of new ones.	Select an alert to go to the page it is about, or **View All Notifications**.
Your certificates	Certificates you have earned.	Open one to download or share it.
Also in progress	Other courses you have started.	Select a course to continue.

The left menu on a computer

Menu item	What it opens
Dashboard	This page.
Courses	The courses you are enrolled in (Chapter 6).

Menu item	What it opens
Ayakbi Arena	Challenge a coursemate and join the course chat, where it is switched on (Chapters 7 and 8).
Feed, **Write a post**, **My posts**	The community feed and your own posts (Chapter 10).
Examinations	Your examinations and results.
Assignments	Written work from your instructors.
Certificates	Certificates you earned.
My Progress	How far you are in each course and what to work on next.
Analytics & Reports	Your learning activity over time.
Messages	Conversations with instructors and organisations.
Page Help	Help for the page you are on.

At the top of the menu are your name and **Trainee**, the **bell** for notifications, **Log out** and **Search pages** (press **Ctrl + K**). Some further pages are reached from other places: **Explore**, **My profile**, **Settings**, **Job board**, **My videos**, **Introductions**, **My startups** and **Report a concern**.

Using the dashboard on a phone

On a phone the left menu becomes a bar at the bottom of the screen with your most-used items and a **More** button that opens everything else. The bell and **Log out** are in the top area. Tables become stacked cards, and the **Post** button is a round button in the middle of the bar.

TASK

Open your dashboard from anywhere

Steps

1. Open the AAICBI Ecosystem and sign in.
2. On a computer select **Dashboard** at the top of the left menu. On a phone choose the first button of the bottom bar.
3. Use **Back** (top left of the page) to return to the previous page at any time.

Expected result Your name, your courses and your notifications appear.

Notifications and activity indicators

A red number on the **bell** (and on the **Messages** button) shows new items. Selecting the bell lists alerts such as challenges, replies, decisions and course updates. Reading them clears the number. If you allow phone notifications, the same alerts reach your phone even when AAICBI is closed.

> **TIP**
> The round **Loop** button at the bottom right opens a guide. Ask it a question such as “where are my certificates?” and it can take you there.

B4 Completing Your Profile

Your profile is how organisations, employers and other members get to know you. You decide who can see it.

What your profile contains

Part	What to add
Name, photo and handle	Your name, a profile picture and your **Username (your handle)**, which becomes your public address, for example `@your-name`.
Details	**Location**, **LinkedIn**, **GitHub**, **Portfolio website**, **Current employment status** and an **Open to work** switch.
Skills	Add a skill (for example Python) and choose a **Skill level**.
Education	**Institution**, **Field of study**, **Credential** and dates.
Work experience	**Job title**, **Employer**, **Description** and dates.
Projects	**Project title**, **Description**, a **Link**, and an option to **List in Community Showcase**.
Profile visibility	Who may see your profile.

TASK

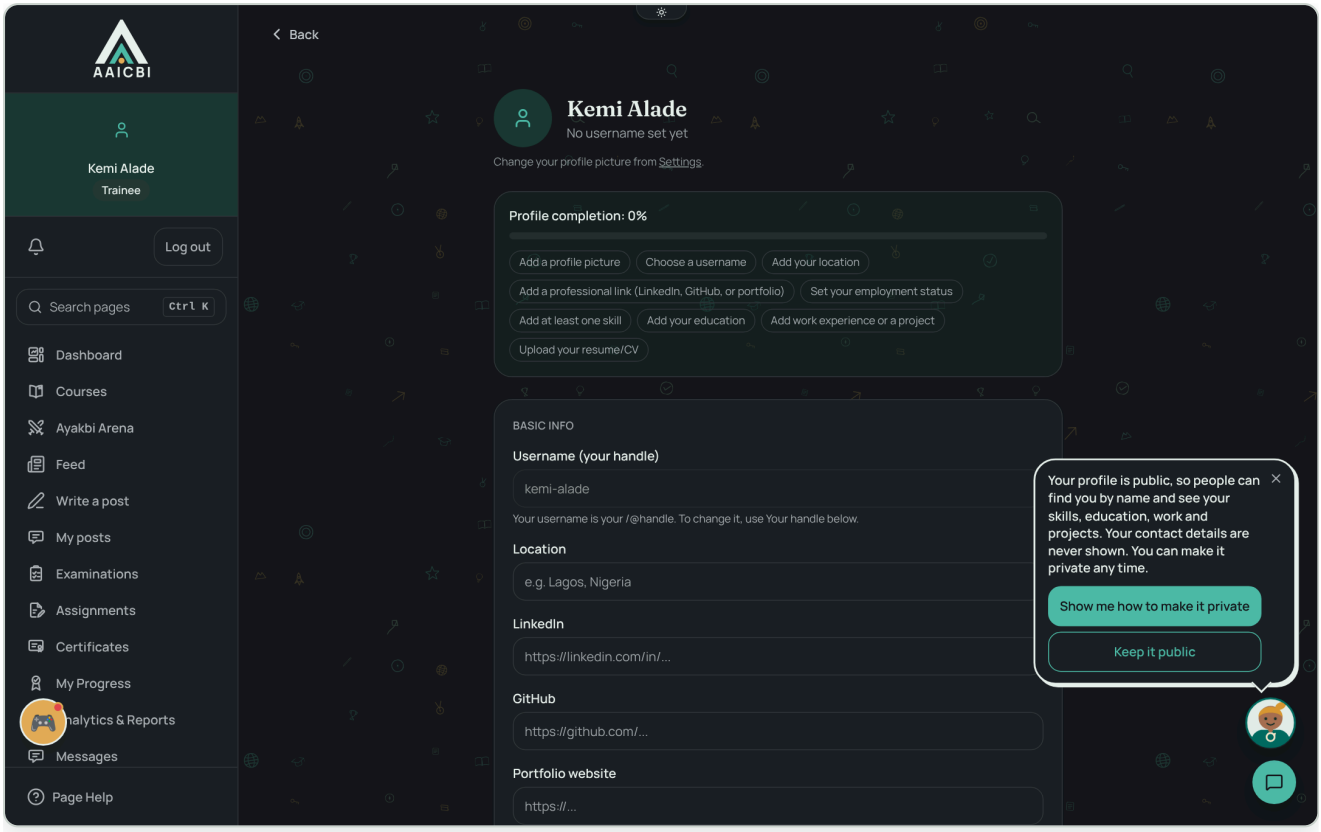
Edit your profile

Steps

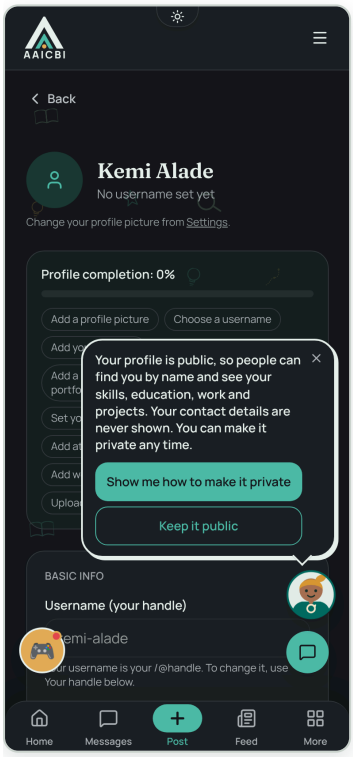
1. Open **My profile** (from **More** on a phone, or from the account menu on a computer).
2. Update your details and select the save button of each section.
3. To add a skill type it under **Add a skill**, choose a **Skill level** and add it.
4. To add education, experience or a project use the **Add** button of that section.

Expected result The new information appears on your profile straight away.

If it does not work If a handle is refused it may already be taken or contain characters that are not allowed; try another.



COMPUTER



PHONE

Figure 38. My profile.

TASK **Upload a profile picture**

Steps

1. Open **Settings**.

2. Find **Profile Picture**.
3. Choose a picture from your device and confirm.

Expected result Your picture shows next to your name across the platform.

Choosing who can see your profile

Under **Profile visibility** choose who may see your profile: **Public**, signed-in members only, employers only or **Private**. A new account starts as **Public** so that people can find you. You can change this at any time.

IMPORTANT

Think before you share. Do not put your home address, phone number, passwords, identity-document numbers or bank details in your profile, posts or chats.

Keeping personal information safe

- Share only what you are comfortable with strangers seeing if your profile is public.
- Use **Private** or **employers only** if you prefer.
- Never share your password with anyone.
- Use **Report a concern** if someone asks you for private information.

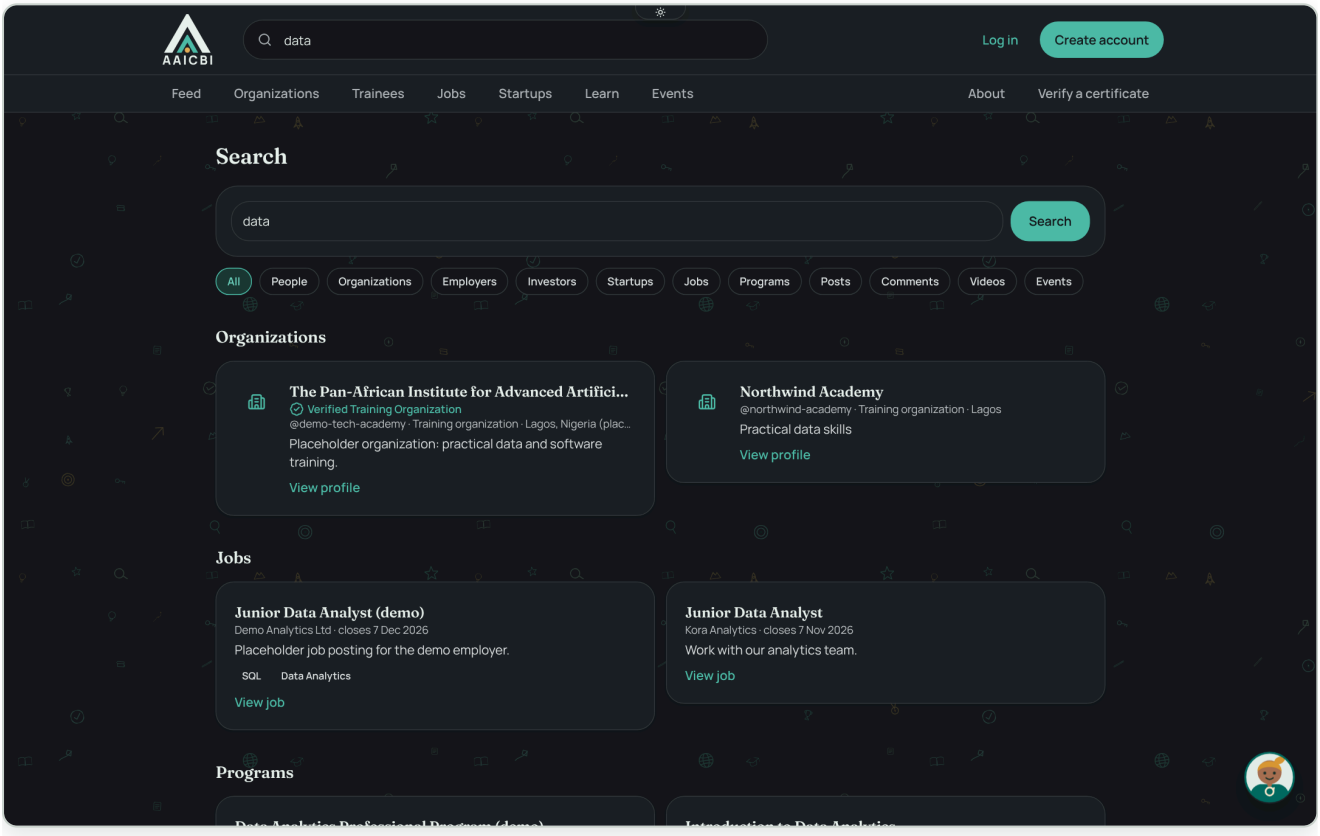
In **Settings** you can also turn on **Employer discoverability** (let employers find you, with a headline and certificates you choose), see your **Public Profile Link**, and set **Low-bandwidth mode**.

B5 Finding Organisations, Courses, and Opportunities

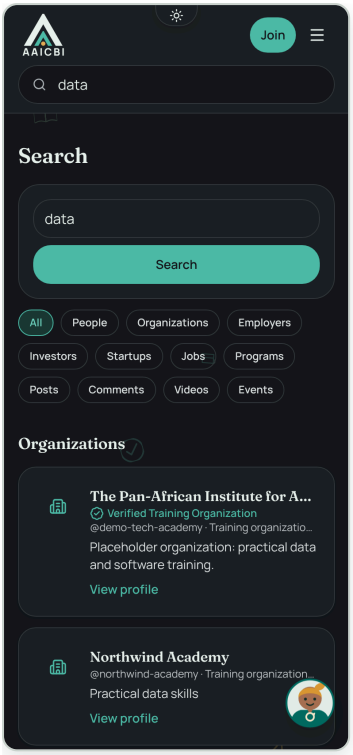
How to search, how to look at profiles, and how joining a course really works.

Searching

Use the search box at the top of public pages, or **Search pages** (**Ctrl + K**) inside your dashboard. Type a word and select **Search**. Use the buttons **All**, **People**, **Organizations**, **Employers**, **Investors**, **Startups**, **Jobs**, **Programs**, **Posts**, **Comments**, **Videos** and **Events** to narrow the results. Select a result to open its profile.



COMPUTER

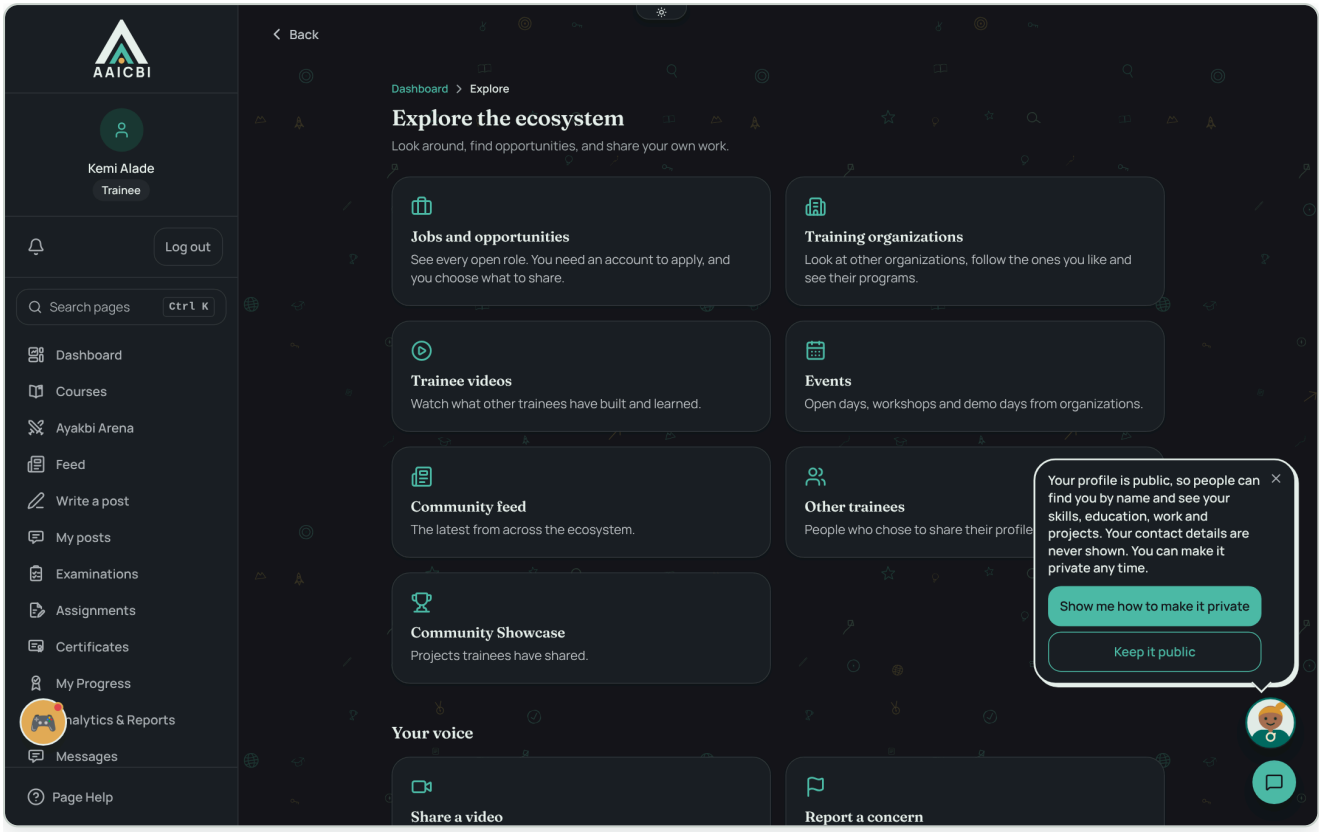


PHONE

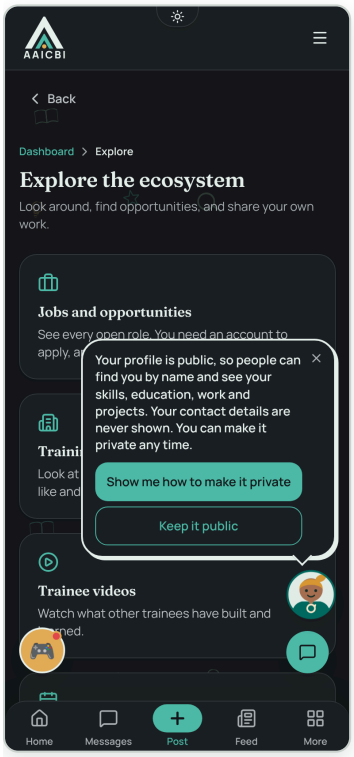
Figure 39. Search results for “data”.

Finding training organisations, jobs and events

- **Explore** (trainee menu) puts organisations, jobs and events in one place.
- **Organizations** (public pages) lists training organisations; open one to see its tagline, programmes and events, and to follow it.
- **Job board** lists open jobs from the platform’s employers, with apply buttons.
- **Events** lists events announced by organisations.



COMPUTER



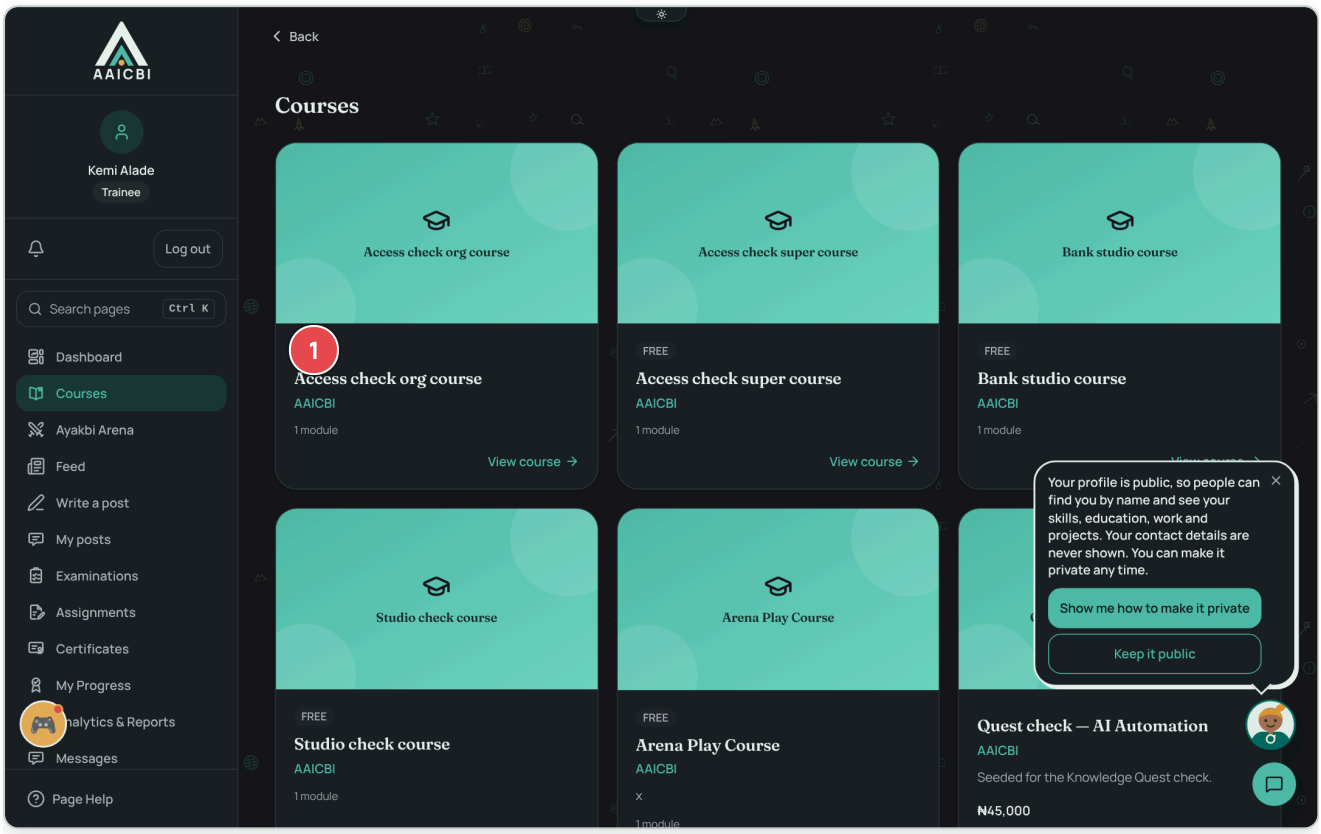
PHONE

Figure 40. Explore: organisations, jobs and events in one place.

Finding courses

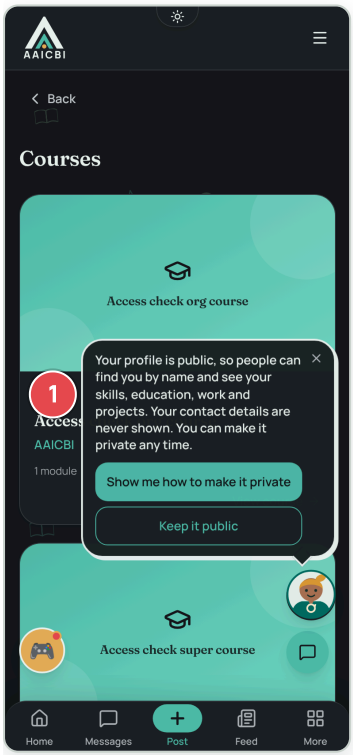
Open **Courses** in your menu. It lists the courses available to you as cards. Each card shows a picture, **FREE** or **PAID**, the organisation that runs it and the number of modules. A course you are already in

shows **Continue learning**; any other shows **View course**.



1 **FREE** or **PAID** tag.

COMPUTER



PHONE

1 **FREE** or **PAID** tag.

Figure 41. Courses. Cards for courses you are in say **Continue learning**.

How joining a course works

TASK

Join a course

Purpose Get access to the lessons, practice and assessments of a course.

Steps

1. Open **Courses** and select **View course** on a course that interests you.
2. Read the course page. If the page says “You’re not enrolled in this course yet”, look at the line beneath it.
3. For a **free** course the page says it is free: select the enrol button to get started.
4. For a **paid** course the page shows the price and says you will pay securely through Paystack. Some courses also offer a free preview of the first modules.
5. If your training organisation has arranged access for you, ask them to **Grant Access** using the email address you registered with. The course then appears for you.

Expected result The course page changes to show your lessons and a progress bar, and the course appears on your dashboard.

If it does not work If you cannot pay or the button shows an error, read the red message under it. Do not pay twice; contact your organisation or support (see **Getting help**).

LIMITATION

Joining is not always automatic. Free courses can be joined by you; paid courses need payment; and some access is granted by your training organisation. The platform does not let you join an organisation just by clicking — its courses are how you take part.

Other opportunities

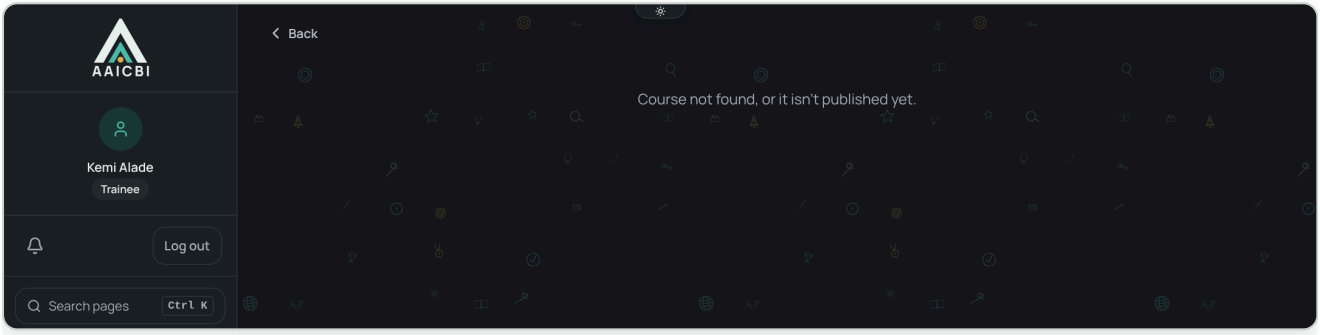
- **Introductions**: employers who want to meet you send requests here; you can accept or decline.
- **My videos** and **Video requests**: organisations may ask to present your project in a video; you approve or decline.
- **My startups** and pitches: for founders and trainees with a startup idea.

B6 Participating in Training Activities

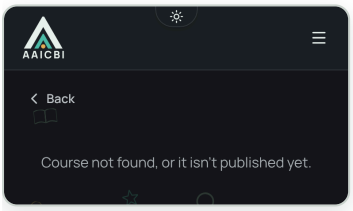
Studying a course, practising, taking assessments and reading your results.

Opening a course

From **Courses** or from the course card on your dashboard, select **Continue learning**. The course page lists its **modules**. Each module has **lessons** (reading materials and videos), **practice** and an **assessment**. Complete the lessons to move on; some modules unlock one after another.



COMPUTER



PHONE

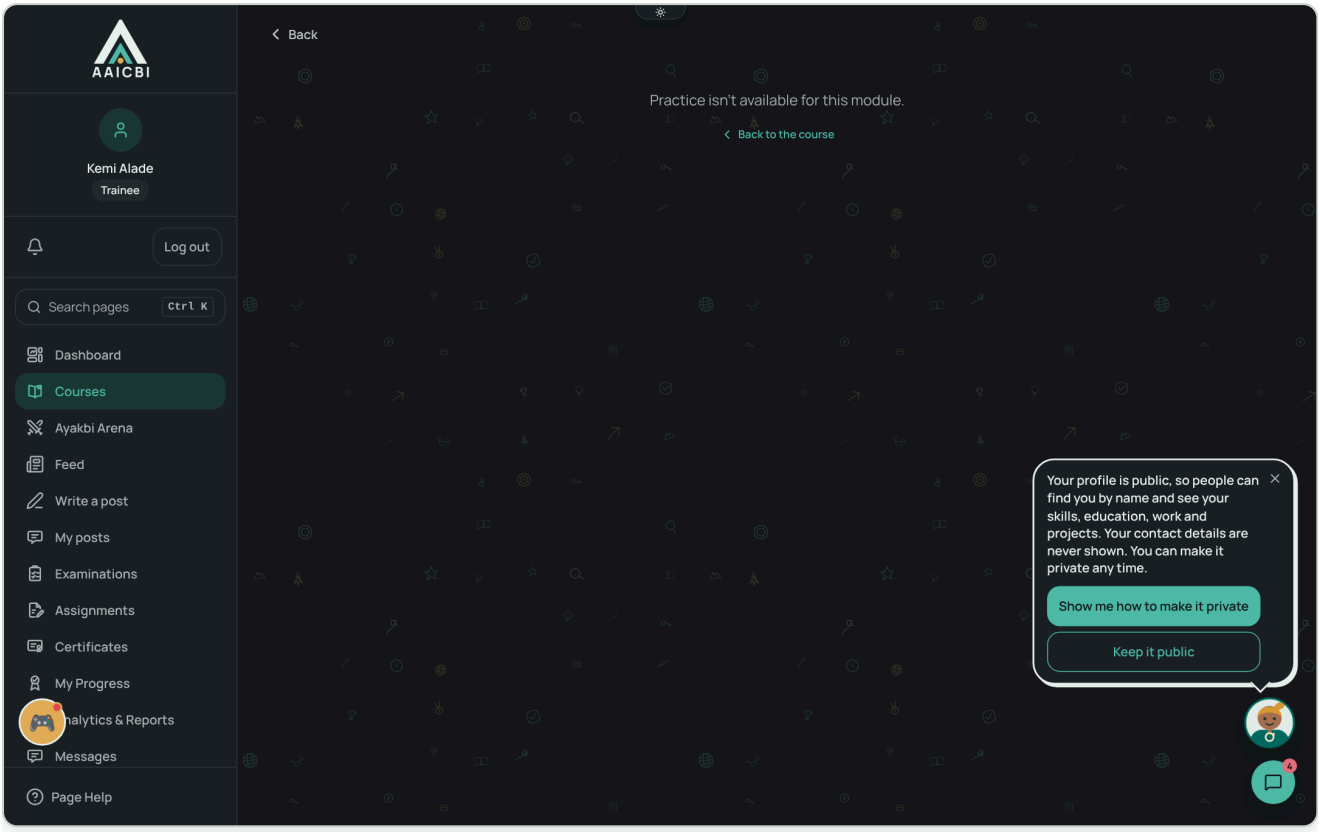
Figure 42. The top of a course page with its modules (the page continues further down).

Lessons and resources

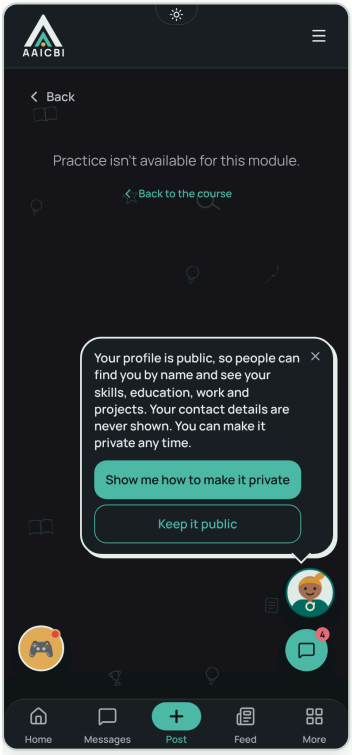
Open a lesson to read or watch it. Videos play inside the page. Materials you can save for offline study appear under **My downloads**. On each lesson you can use **Q&A** to ask a question; your instructor and coursemates can reply.

Practice

Practice lets you answer questions without any pass or fail. It plays in short rounds with encouraging messages, and shows the correct answer and an explanation after each question. Nothing in practice counts against you.



COMPUTER



PHONE

Figure 43. Practice for a module.

Assessments and examinations

TASK Take a module assessment

Before you begin You have finished the lessons of the module and the assessment is available.

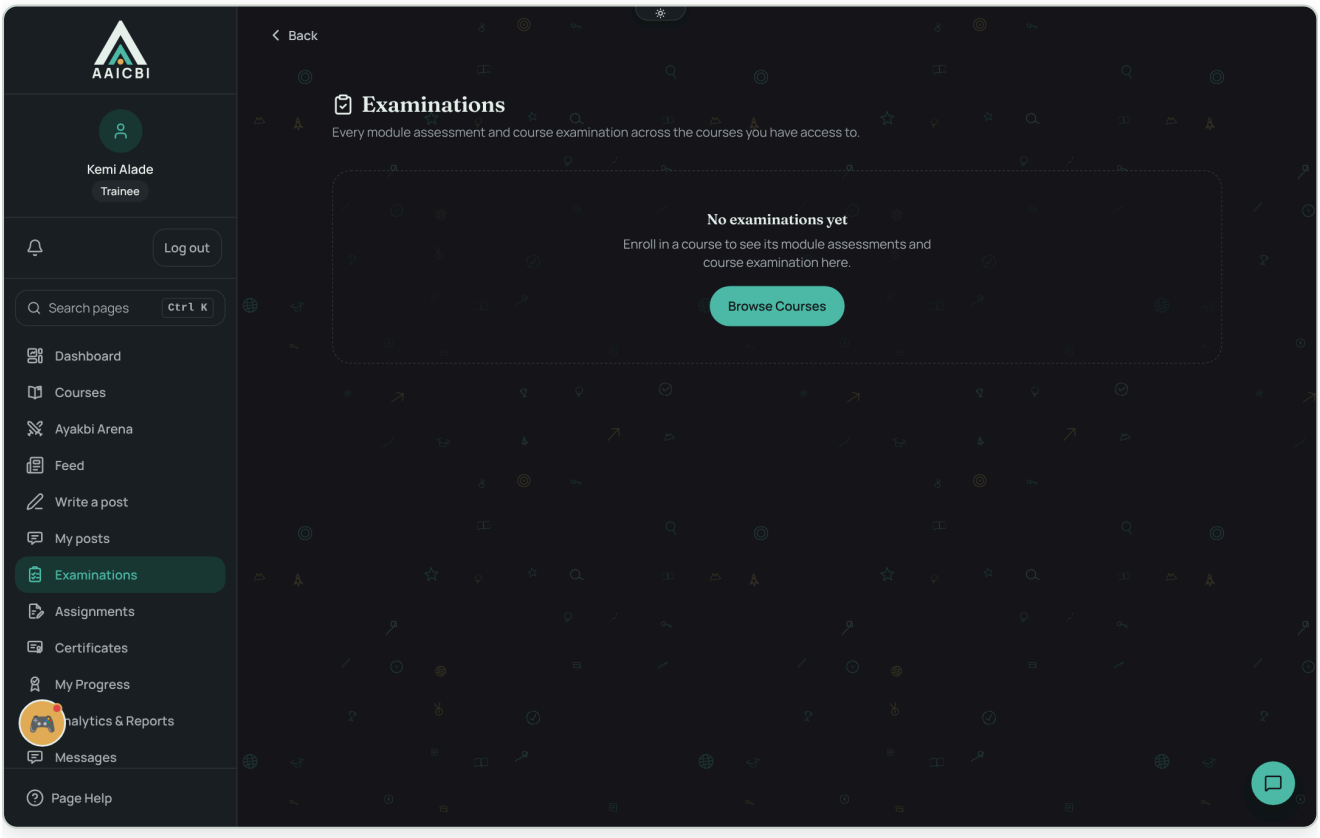
Steps

1. Open the course and the module, then select **Assessment**.
2. Read the instructions: the number of questions, time allowed, attempts and the **pass mark**.
3. Select **Start** and answer each question.
4. Submit when you finish.

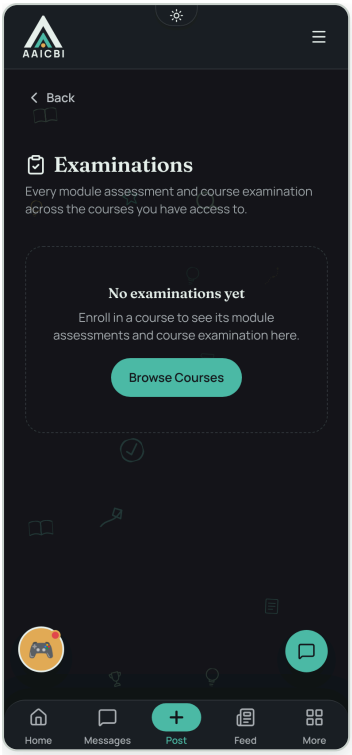
Expected result You see a result page with your score and whether you passed.

If it does not work If the timer ends the attempt is submitted automatically. If you lose your connection, reconnect and reopen the assessment from **Examinations**.

Examinations in the menu lists every module assessment and course examination you have access to, with the number of questions, duration, attempts, pass mark and your status (for example **Available** or **Passed**). Select **Start** to begin or **View result** to see a past result.



COMPUTER

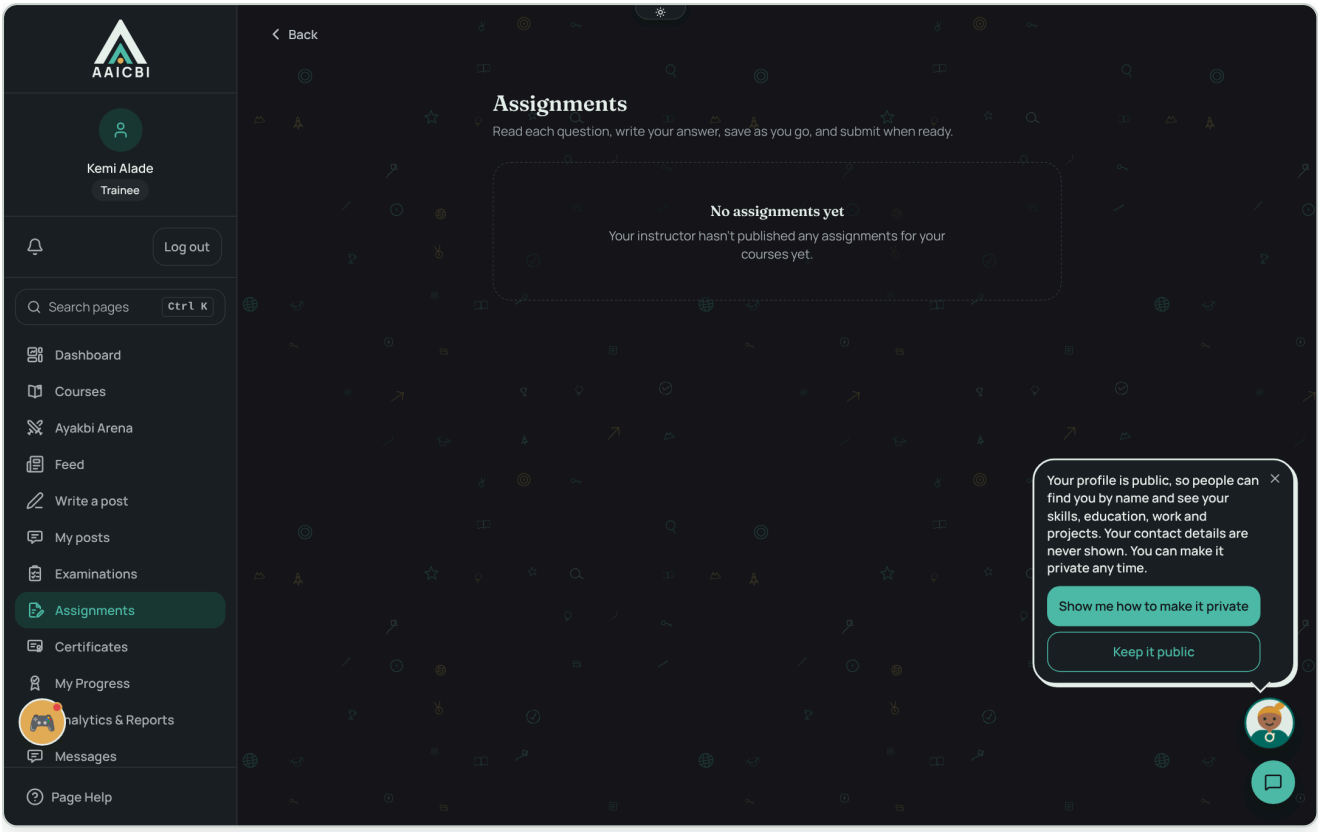


PHONE

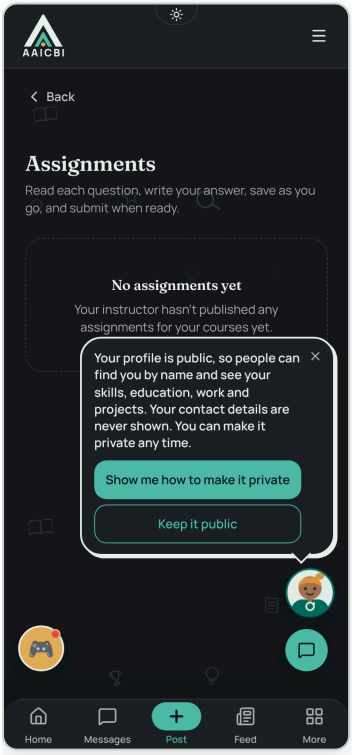
Figure 44. Examinations: your assessments and results in one table.

Assignments and certificates

- **Assignments** shows written work set by your instructors. Submit your answer and read the feedback afterwards. Pasting text into answers is blocked, so write your own words.
- **Certificates** lists certificates you earn when you complete a course. Each has a link anyone can use to verify it.



COMPUTER



PHONE

Figure 45. Assignments.

Progress, announcements and messages

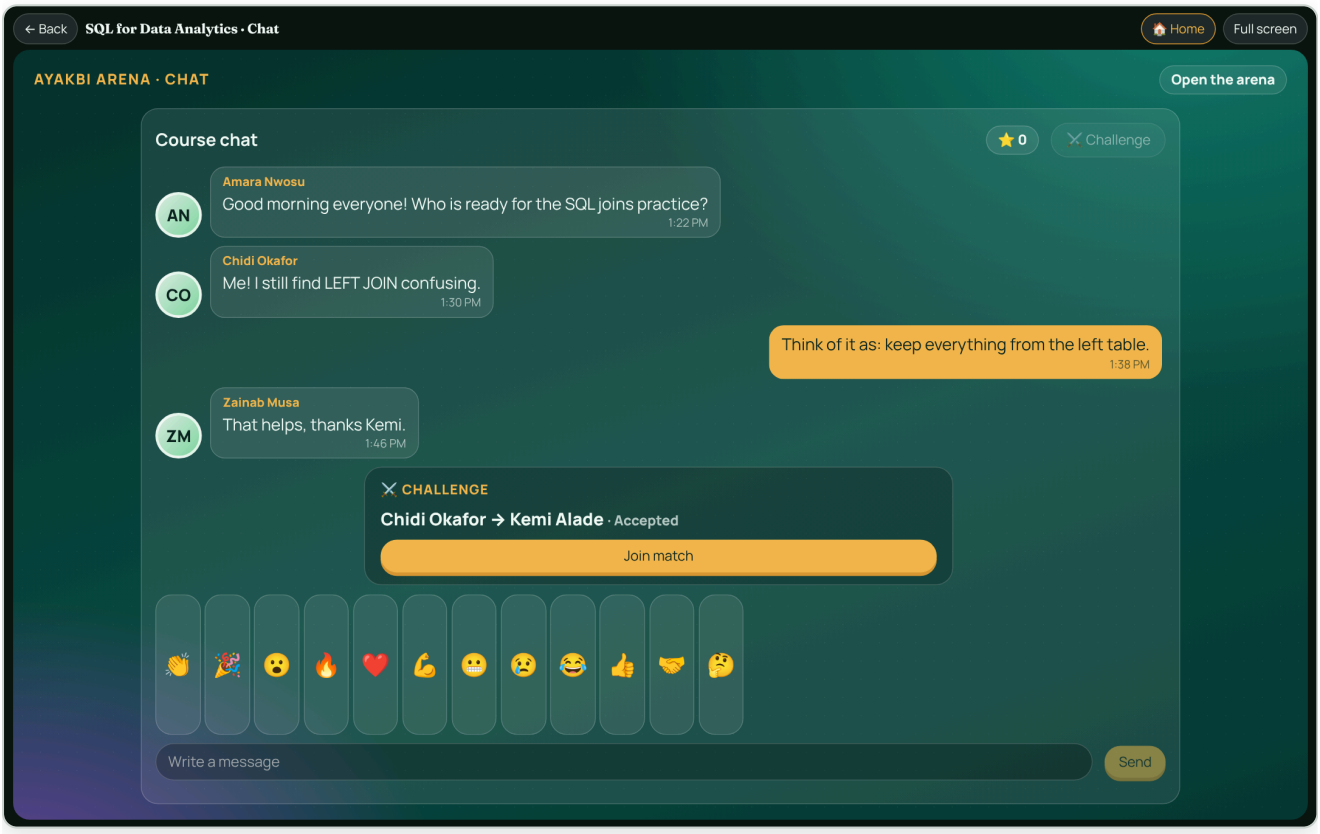
Your progress bar on each course shows modules completed. Course news arrives as notifications and in **Messages**. See Chapter 9 to understand your results.

B7 Using Group Chats and Community Features

Talking with coursemates, asking questions and keeping chat friendly.

The course group chat

Each course can have a group chat for the people enrolled in it. It appears only when the AAICBI team has switched it on for your course. You can reach it from **Ayakbi Arena**, from the **Chat is live** card on your dashboard, or from the course page.



COMPUTER

PHONE

Figure 46. The course chat: messages from coursemates, challenge cards and reactions.

TASK **Send a message in the course chat**

Steps

1. Open **Ayakbi Arena** and choose your course, then open the chat. (Or select **Open chat** on a **Chat is live** card.)
2. Type your message in the box at the bottom. Messages can be up to 500 characters.
3. Select the send button.
4. To react without typing, use the reaction row (one tap posts a large emoji).

Expected result Your message appears in the chat for everyone enrolled in the course.

If it does not work If you cannot post, you may be paused by a moderator (the page shows why and until when), or the chat may be switched off for your course.

Asking good questions

- Say what you tried and where you got stuck.
- Use the lesson **Q&A** for questions about one lesson, so everyone can find the answer later.
- Use **Messages** for private questions to your instructor.

Respectful conduct

- Be kind. No insults, threats or bullying.

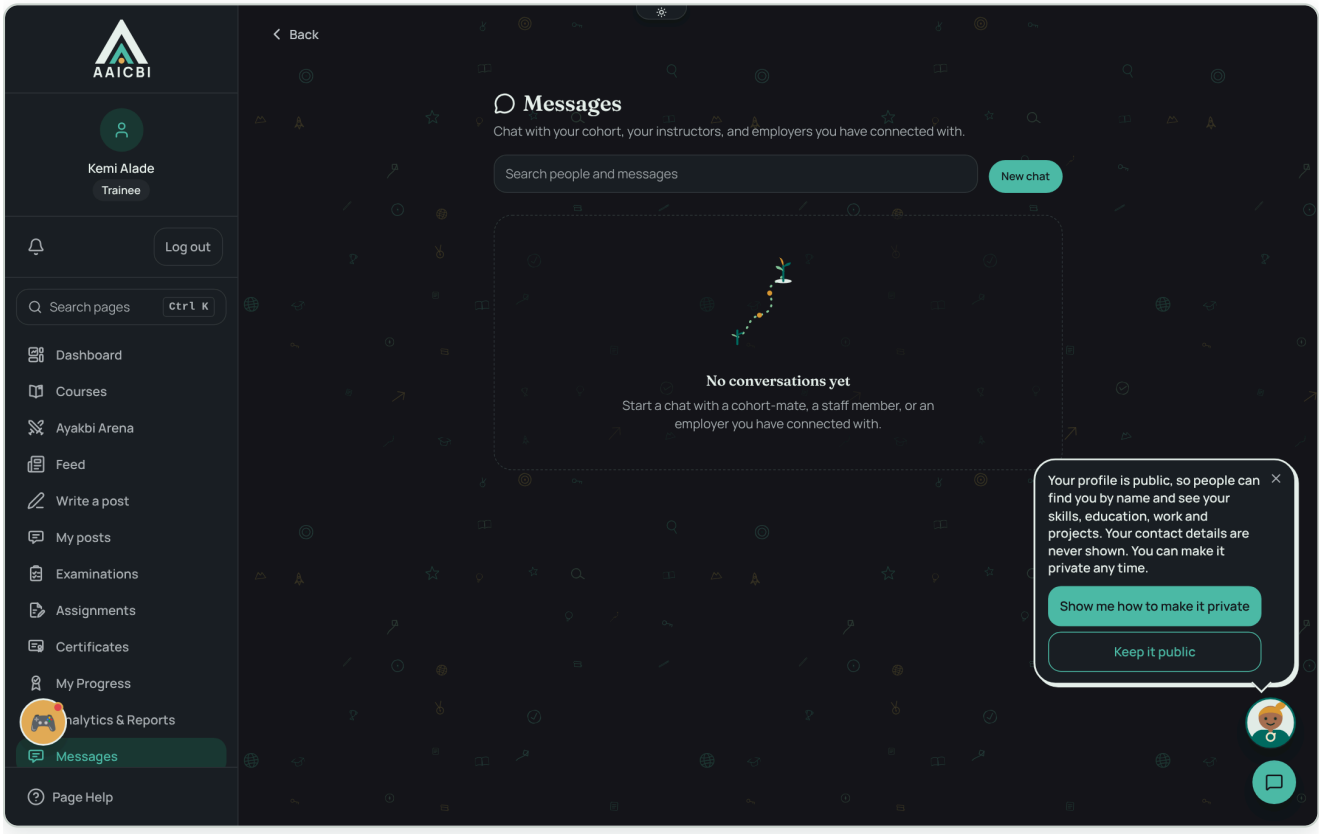
- Do not share answers to assessments.
- Do not share other people's private information.
- Moderators can remove messages, pause your participation or end a game. Every decision is recorded with a reason.

Who is online

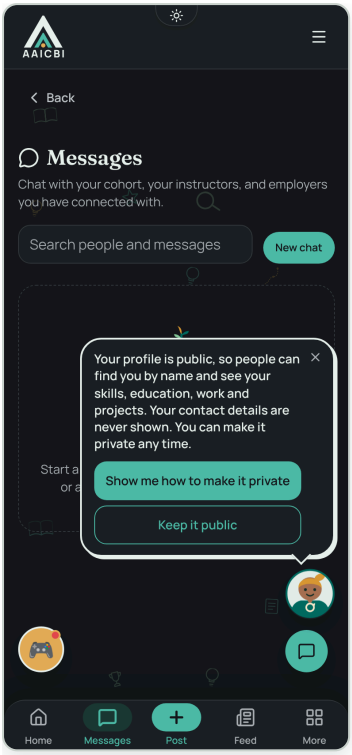
The arena shows who is online in your course and lets you challenge them. Anyone signed in with the app open counts as online.

Notifications and messages

The bell shows alerts; the round **Messages** button (bottom right) opens one inbox with your course group chats, cohort chats and direct messages. You can start a new direct message with the plus button. A number on the button or on the app icon shows unread messages.



COMPUTER



PHONE

Figure 47. Messages.

Reporting inappropriate behaviour

- During a game, use the report option in the match.
- For a person or profile, open **Report a concern** and describe what is wrong.
- For anything urgent, message your instructor or organisation.

Chat rules and moderation

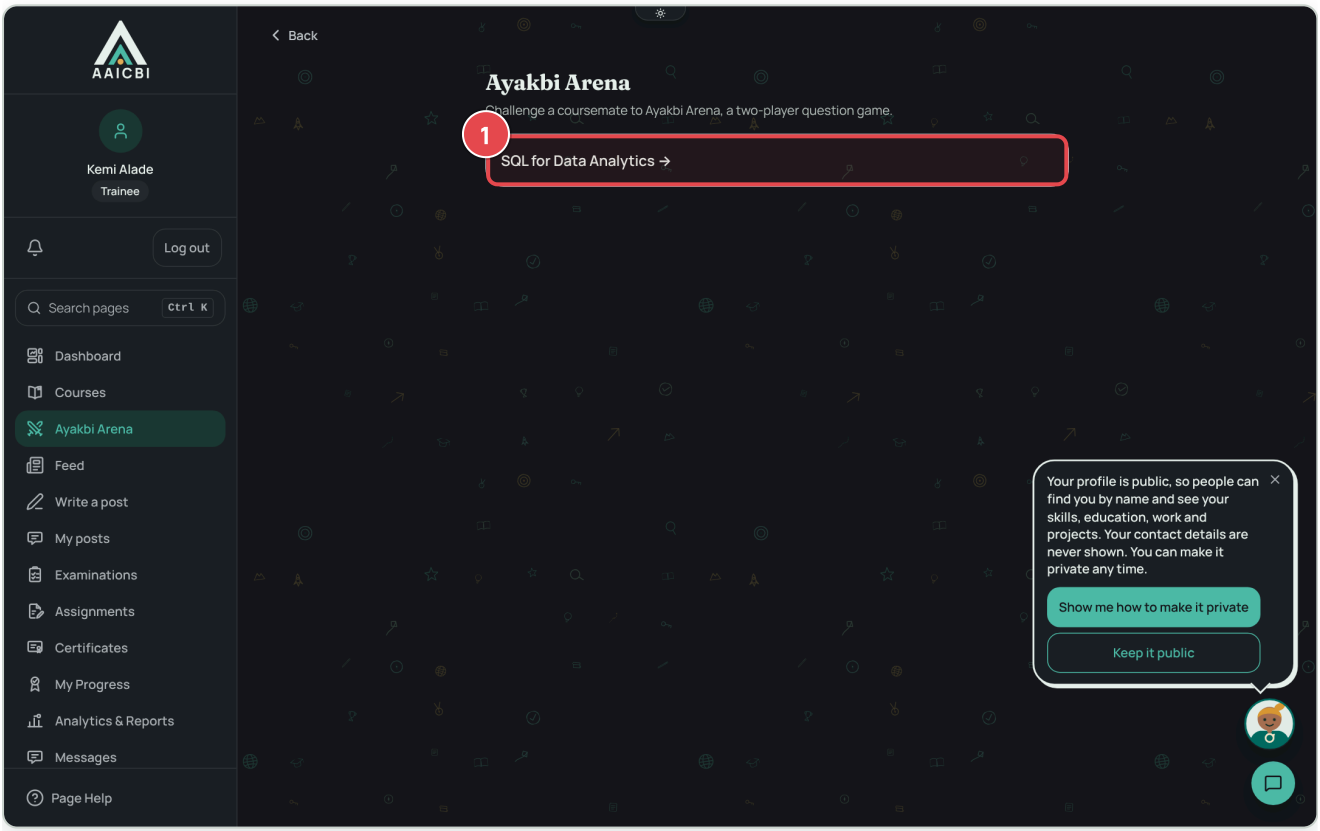
Your training organisation's moderators and AAICBI can remove messages, pause your participation for a time, end a game or warn you. If you are paused, the lobby tells you why and until when. You can still read your lessons and take assessments.

B8 Playing Educational Games

Games make practice fun. They are optional, free of pass or fail, and only appear where your course has them switched on.

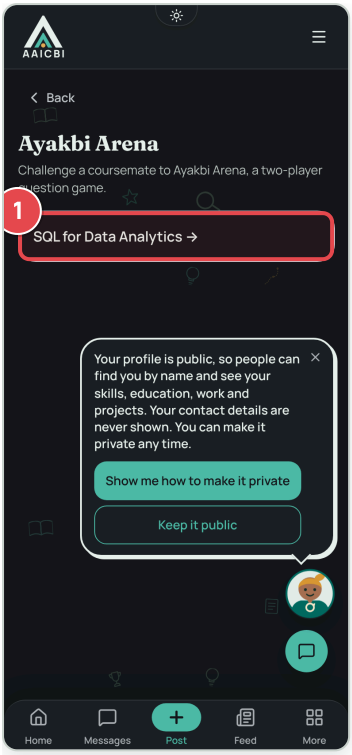
Where games appear

- **Practice and course games** in a module: quizzes, matching and ordering questions and scenarios.
- **Ayakbi Arena**: a two-player question game with a course chat.
- **Games on the feed**: a taste of a course that you can try without an account.



1 Choose a course to open its arena.

COMPUTER



PHONE

1 Choose a course to open its arena.

Figure 48. Ayakbi Arena lists the courses where it is open.

Practice games

In a module open **Practice**. Questions come in rounds of ten. After each answer you see whether it was right, the correct answer and why. At the end a summary shows your score and the answers to review. A streak and small celebrations are only for fun. Sound is off until you switch it on in the game.

Ayakbi Arena: playing with another trainee

TASK **Challenge a coursemate**

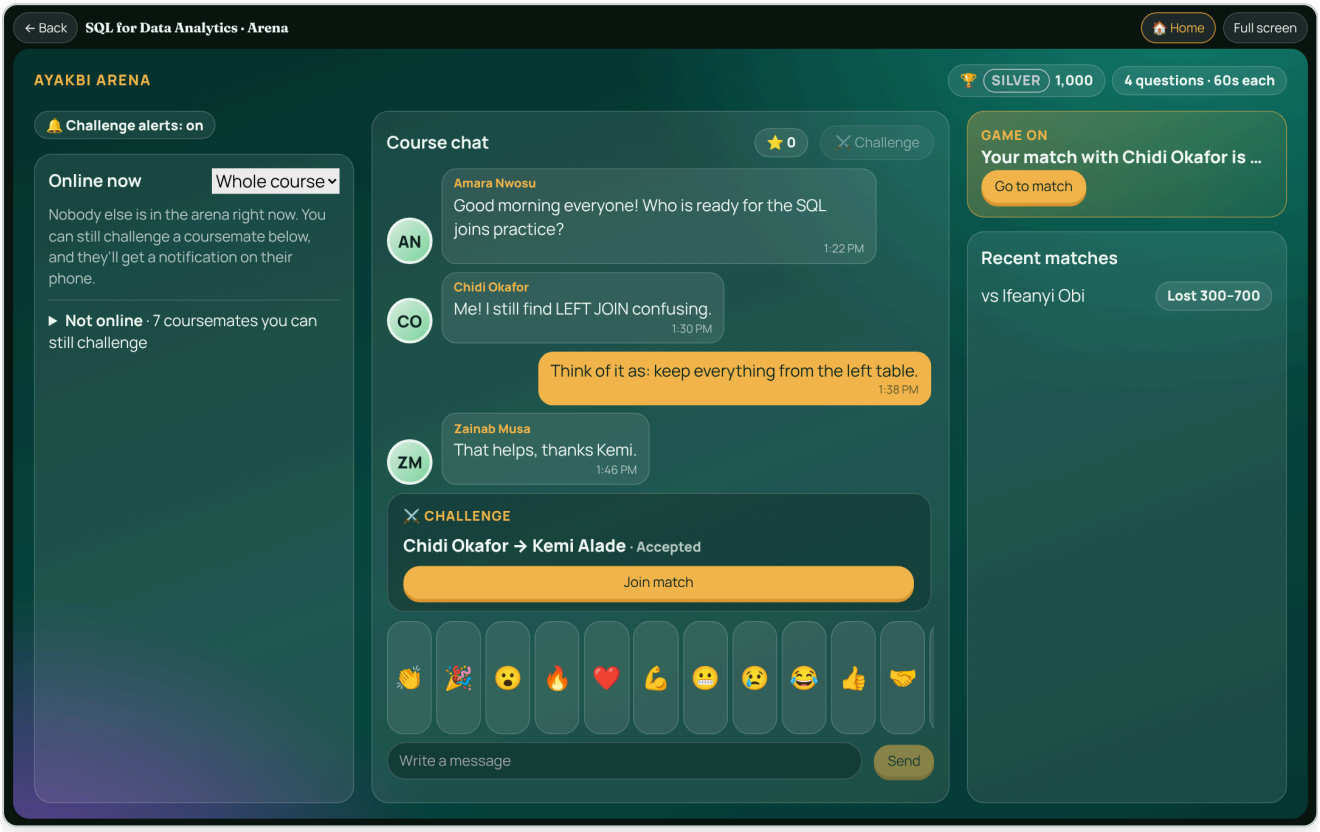
Before you begin The Arena is switched on for your course.

Steps

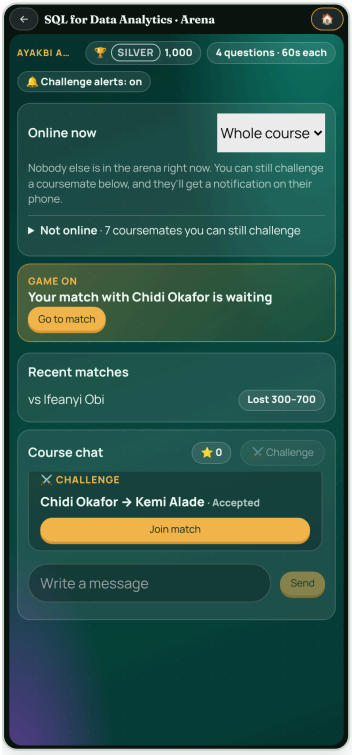
1. Open **Ayakbi Arena** and choose the course.
2. In the lobby find a coursemate (the list shows who is online and who is not) and select to challenge them. You can also use the ⚔️ button in the course chat.
3. Wait for them to accept. They are notified in their bell and on their phone if alerts are on.
4. When the game starts, answer the question before the timer runs out. If one player misses, the other gets a short chance to answer for extra points.

Expected result The game plays one question at a time with a scoreboard, then a result screen with your score and ladder points.

> **If it does not work** If nobody answers your challenge it expires, you are told, and you can challenge again or message them in the chat.



COMPUTER



PHONE

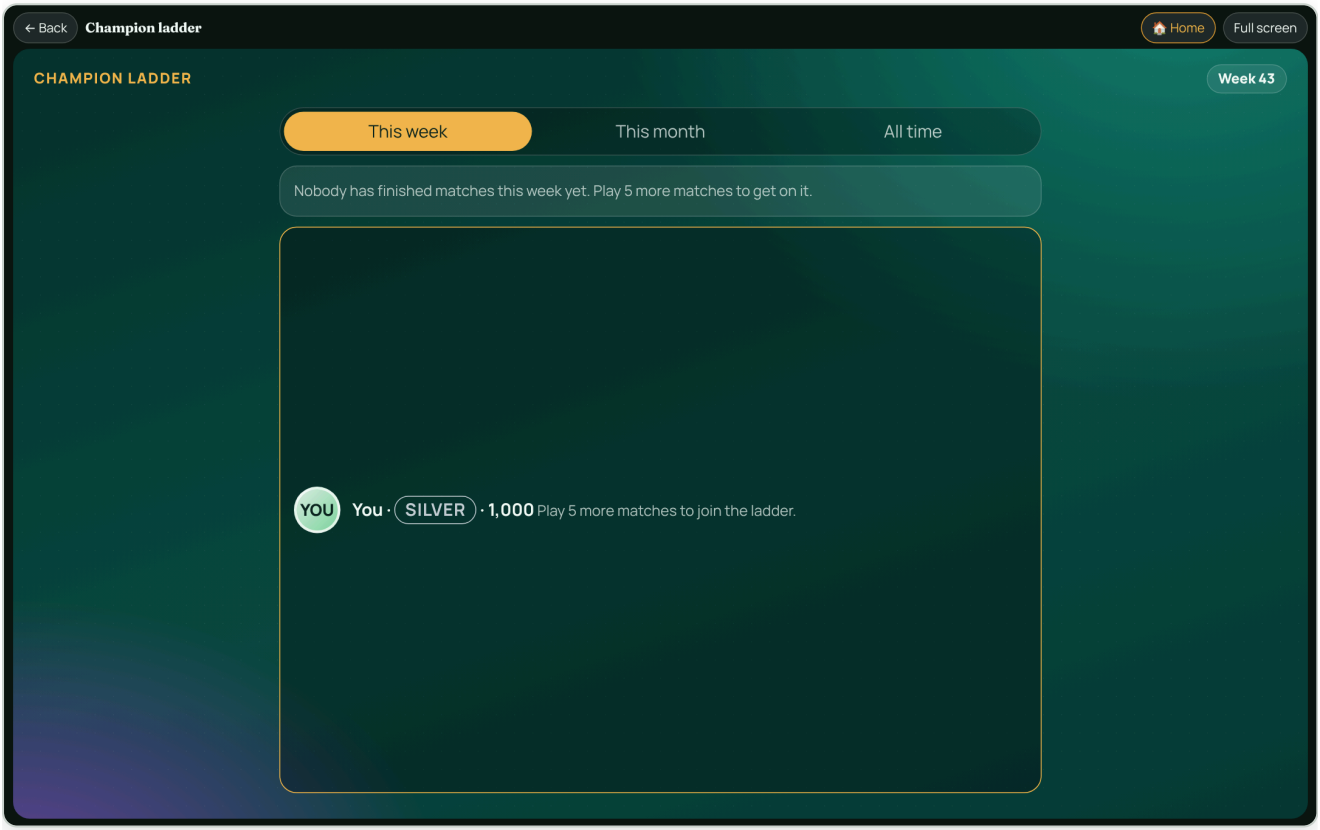
Figure 49. A course's arena: who is online, challenges and recent matches.

Group chat games: Fastest Fingers

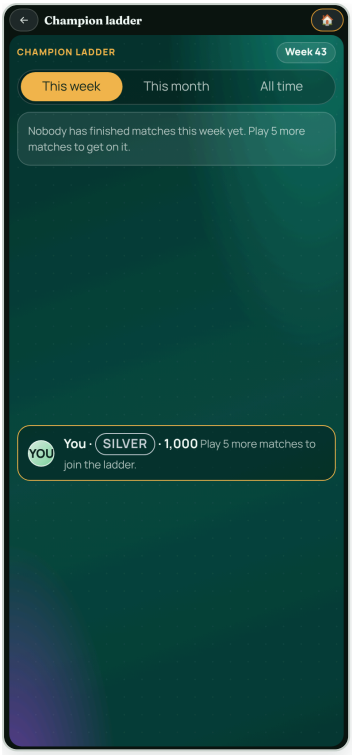
Your instructor may post a quick question in the course chat as a card. Answer it first and correctly to earn credits; everyone sees who won. Your credit total for the course is shown in the chat.

Scores, results and leaderboards

After each game you see your score. The **ladder** of each course ranks players by rating and tier (Bronze, Silver, Gold, Platinum, Champion). You appear after five counted games. A weekly champion is announced in the chat.



COMPUTER



PHONE

Figure 50. A course ladder.

Game rules and moderation

- Play fairly: no cheating and no abuse in match chat.
- You can leave a game with **Quit**; the other player wins. You can also pause (a limited number of times).
- If you are reported, a moderator may warn you, pause your participation or end the game, and records a reason.

If something goes wrong

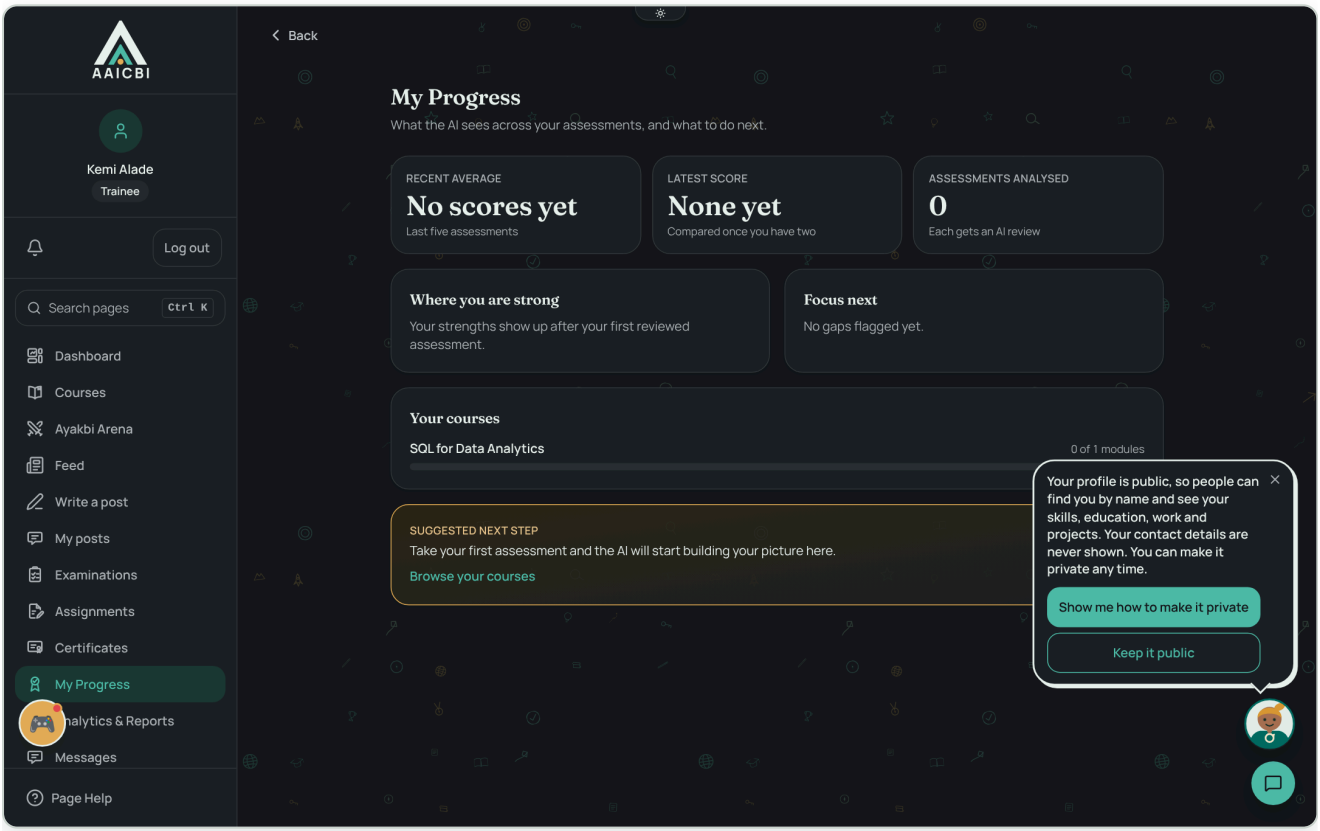
Problem	What to do
A game will not load	Check your connection, refresh the page and open the Arena again. If you left a game, a gold bar at the top lets you return.
A session ended unexpectedly	A moderator may have ended it, or a player quit or lost connection. Check your notifications for a message.
A result looks wrong	Message your instructor with the time and the other player's name. Moderators can review a match.
I cannot start games	You may be paused in that course (the lobby says so), or the Arena may be off for the course.

B9 Understanding Your Results and Progress

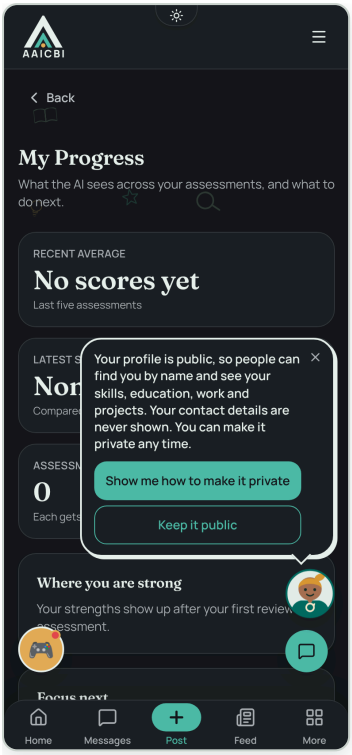
Where to see how you are doing, and how to use feedback to improve.

My Progress

Open **My Progress**. It shows what the platform's AI sees across your assessments and what to do next: your **Recent average** (last five assessments), your **Latest score** and how it compares with your earlier average, and how many **Assessments analysed**. **Where you are strong** and **Focus next** name topics. The **AI review of your latest assessment** gives short written feedback. **Your courses** shows a progress bar for each course.



COMPUTER

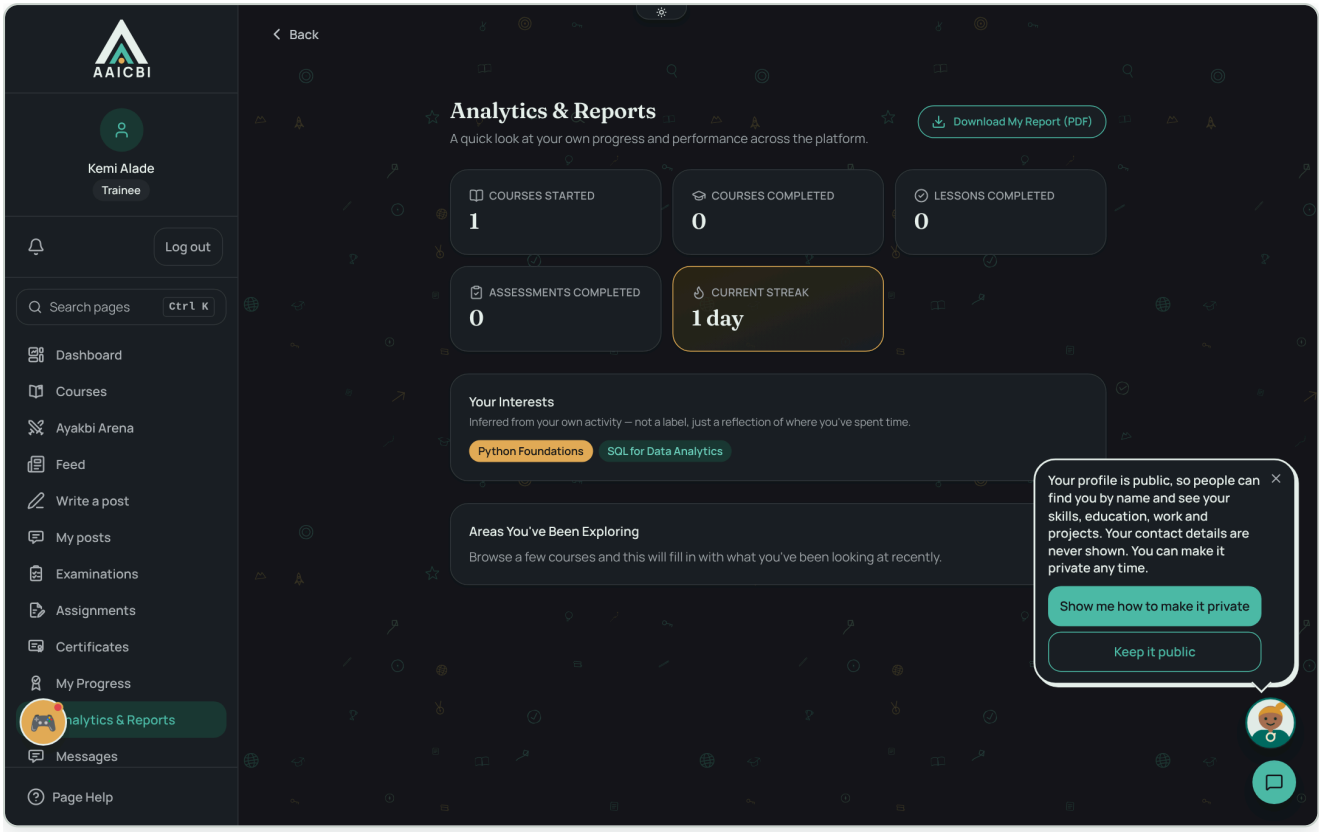


PHONE

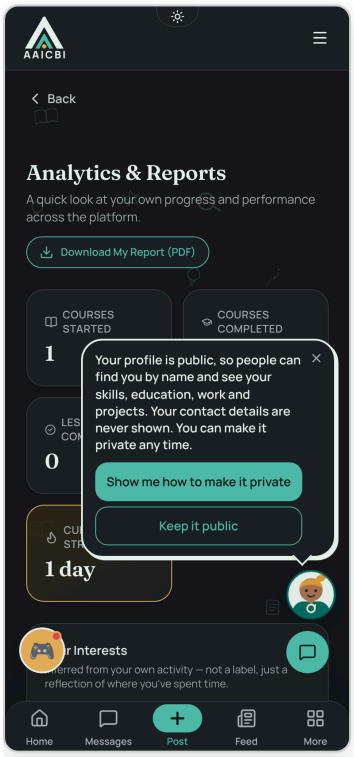
Figure 51. My Progress: strengths, what to focus on next and progress in each course.

Analytics & Reports

Analytics & Reports shows your activity: **Courses started**, **Courses completed**, **Lessons completed**, **Assessments completed** and your **Current streak** of days. **Assessment Performance** lists how many you passed and failed, your average and highest score. **Your Interests** lists topics you spend time on. Select **Download My Report (PDF)** for a copy.



COMPUTER



PHONE

Figure 52. Analytics & Reports.

Examination results and certificates

- **Examinations**: each row shows your status and **View result** for completed ones.
- **Certificates**: certificates you earned, with a verification link anyone can use.

- Game scores and ladder position are in **Ayakbi Arena** (Chapter 8).

Using feedback to improve

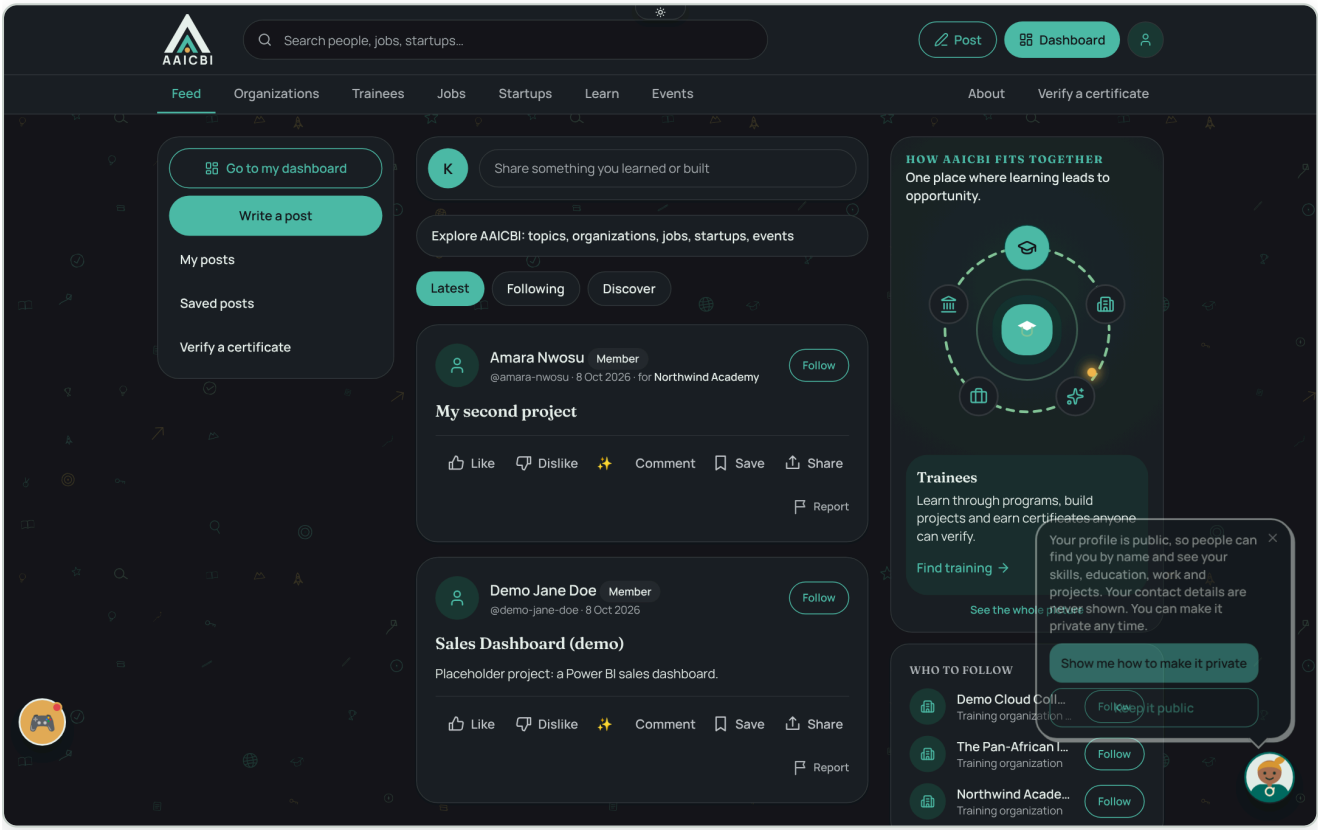
- Read the explanation for every question you miss, not only the score.
- Start with the topic named under **Focus next**.
- Use **Practice** for that topic before retaking an assessment.
- Ask a question in the lesson **Q&A** or message your instructor.
- A score that goes up and down is normal; look at the trend, not one result.

B10 Using the Feed and Social Features

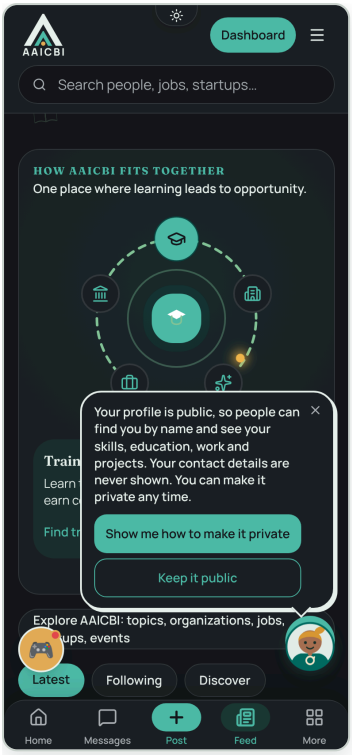
The feed is where members and organisations share what they learn and build.

Reading the feed

Open **Feed**. Posts appear under **Latest**, **Following** and **Discover**. Select a post to read it, like or save it and comment. People you follow appear under **Following**. **Saved** posts are kept for later.



COMPUTER



PHONE

Figure 53. The feed.

Writing a post

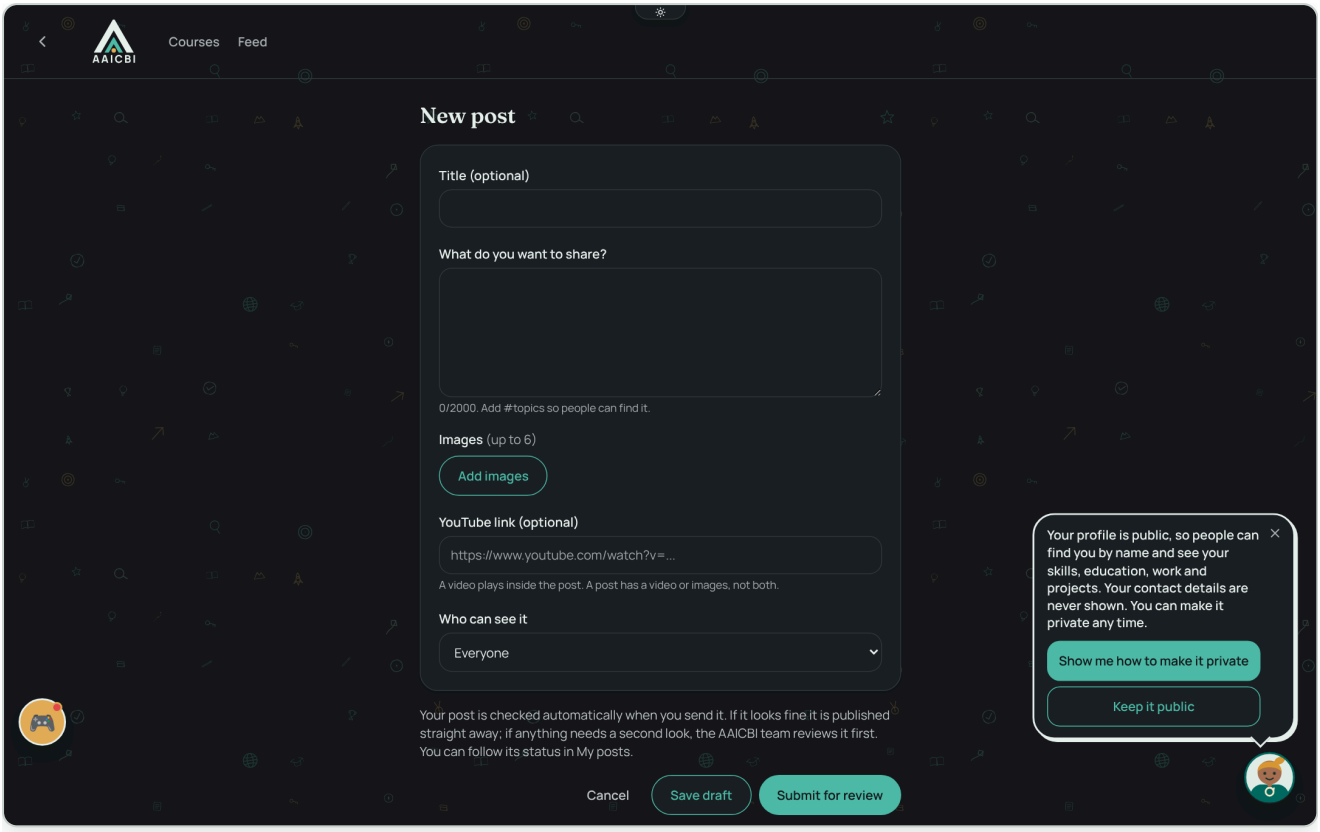
TASK **Share something you learned or built**

Steps

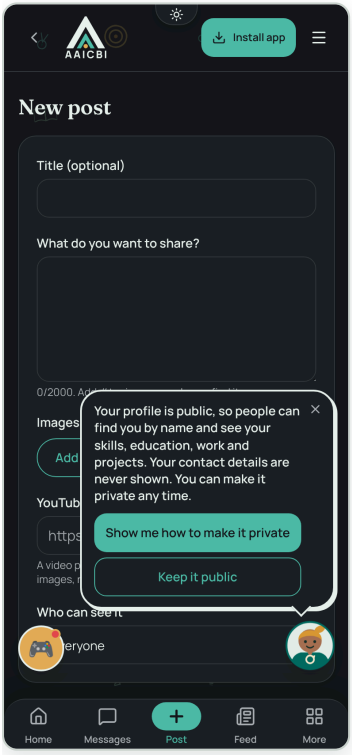
1. Open **Write a post** (or the round **Post** button on a phone).
2. Add a **Title** if you like and write your text. Use #topics so people can find it.
3. Optionally add up to six images, or one YouTube link (a post has either a video or images, not both).
4. Choose **Who can see it**.
5. Select **Submit for review** or **Save draft**.

Expected result Your post is checked automatically. If it looks fine it is published straight away; if it needs a second look the review team checks it first. **My posts** shows the status.

If it does not work A post that needs changes is returned with a reason in **My posts**; edit it and send it again.



COMPUTER



PHONE

Figure 54. Write a post.

Community standards

- Be respectful; no harassment, hate or threats.
- Share your own work or give credit.

- Do not post private details about yourself or others.
- Training organisations can ask for a post that mentions them to be kept off the public feed (with a reason you can read and appeal).

Discovering members

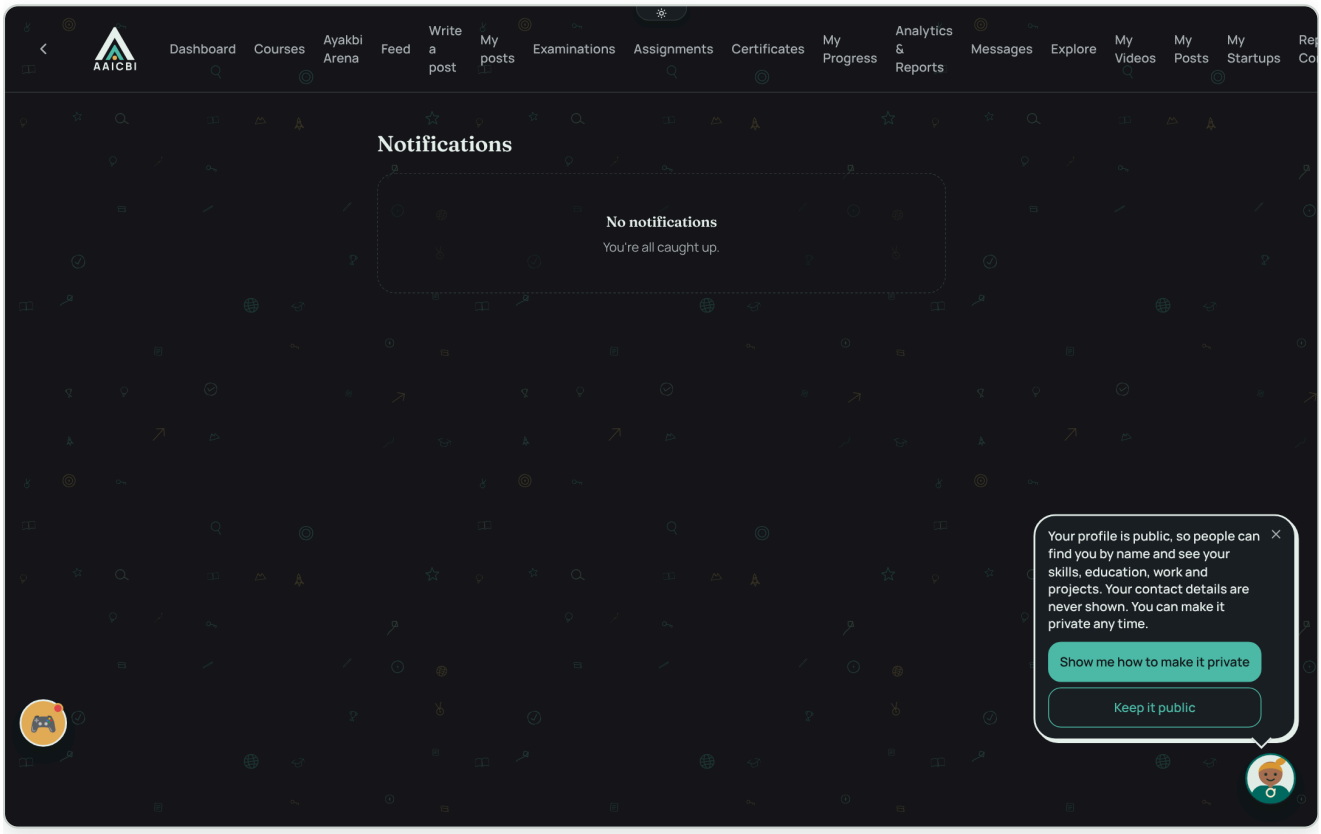
Search for **People**, open a profile and follow them. Profiles show what the person chose to share.

B11 Notifications, Messages, and Account Settings

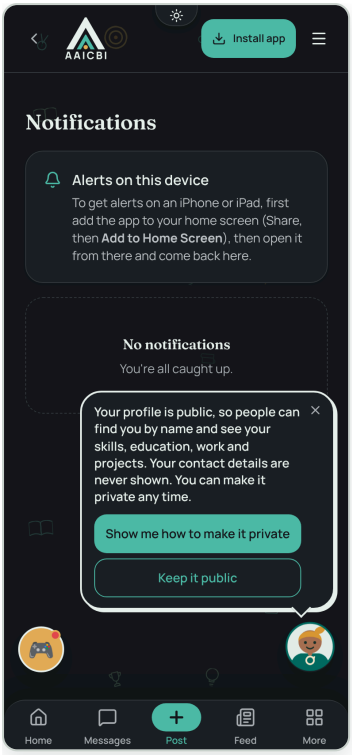
Stay informed, stay in touch and look after your account.

Notifications

The **bell** lists alerts; open **Notifications** for the full list. A red number shows what is new. You can allow notifications on your phone from **Settings** so important alerts, such as game challenges, reach you even when the app is closed. On an iPhone, add AAICBI to the Home Screen first.



COMPUTER



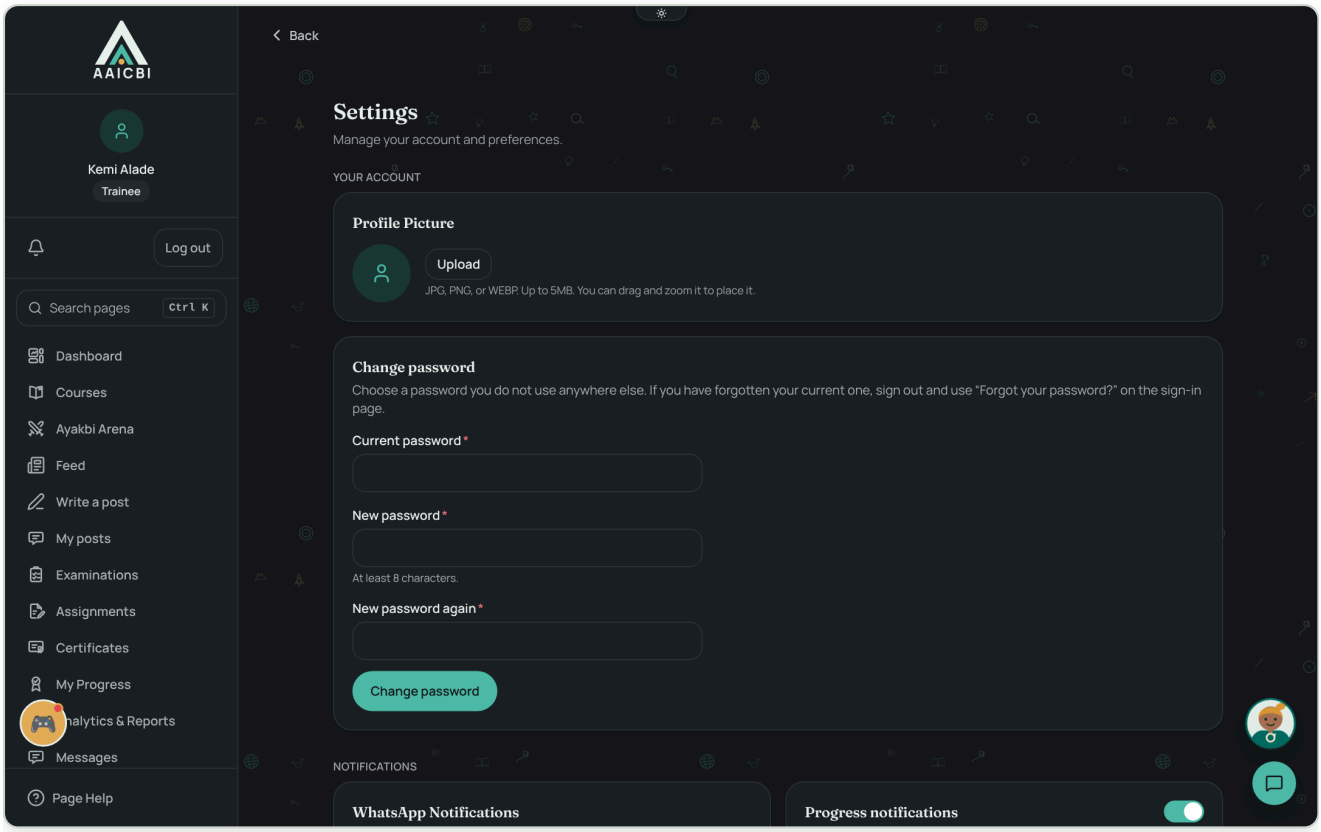
PHONE

Figure 55. Notifications.

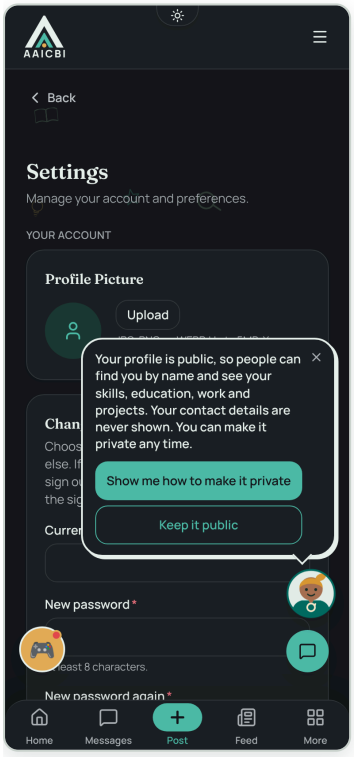
Messages

Open **Messages** for conversations with instructors and organisations, and use the round Messages button for your course chats too. Employers may also write to you after an introduction you accept.

Settings



COMPUTER



PHONE

Figure 56. Settings.

Setting	What it does
Profile Picture (Your account)	Select **Upload** (JPG, PNG or WEBP up to 5 MB; you can drag and zoom to place it).
Change password (Your account)	Enter your current password, then the new one twice, and select **Change password**.
Progress notifications (Notifications)	A switch: email me when I unlock the next module and when an assessment result is ready.
Low-bandwidth mode	Lighter pages for slow connections.
AI study buddy	Switch Loop's study help on or off.
Dark mode	Switch to a dark appearance. It follows you across devices.
WhatsApp Notifications	Verify a WhatsApp number with a 6-digit code to receive key updates.
Employer Discoverability	A switch (with **Save**) that lets vetted employers browsing AAICBI find you. Your contact details stay hidden until you accept a specific introduction.
Public Profile Link	Select **Generate Link** to make a shareable link to your profile, useful on a résumé or LinkedIn. It only works while Employer Discoverability is on.

Passwords and logging out

TASK

Change your password

Before you begin You are signed in and know your current password. Accounts that sign in only with Google have no password to change here.

Steps

1. Open **Settings**. Under **Your account** find **Change password**.
2. Type your **Current password**.
3. Type the **New password** (at least 8 characters) and again under **New password again**.
4. Select **Change password**.

Expected result A message says your password has been changed.

If it does not work If you have forgotten your current password, sign out and select **Forgot your password?** on the sign-in page; follow the link in the email.

- If you have forgotten your password, select **Forgot your password?** on the sign-in page and follow the email link.
- Never share your password. AAICBI will never ask for it.

- To log out select **Log out** at the top of the menu (on a phone open **More**). Always log out on shared computers.

Account security advice

- Use a password you do not use anywhere else.
- Be careful with links in messages; open AAICBI by typing its address.
- Review your profile visibility from time to time.
- If you think someone else used your account, reset your password and tell your organisation.

B12 Troubleshooting and Frequently Asked Questions

Simple fixes for common problems.

Problem	Try this
I cannot register	Read the red message under the form. Make sure the Privacy Policy box is ticked and your password has at least 8 characters. An email that is already registered cannot be used again — sign in instead.
I cannot sign in	Check your email and password (Caps Lock). If you never verified your email, use **Send the link again** on the sign-in page. Wait a few minutes after too many attempts.
I forgot my password	Select **Forgot your password?** under the sign-in form and follow the email link.
A course is missing	Open **Courses**: only published courses appear. If your organisation arranged access, check the email address they used matches yours.
Learning materials are missing	Some modules unlock after the previous one. Refresh the page. Ask your instructor if a lesson is empty.
I cannot send a message	Check your connection. In a course chat you may be paused by a moderator; the page says why.
I cannot join a group chat	The chat appears only for courses where it is switched on and only if you are enrolled.
A game will not connect	Refresh and reopen **Ayakbi Arena**. Check your connection.
A score is missing or looks wrong	Games and assessments appear after you finish. Message your instructor with the date and the game or assessment name.
The phone menu is confusing	Use the bottom bar and **More**. **Back** at the top left returns to the previous page. The **Loop** button can take you to any page.
Pages are slow	Turn on **Low-bandwidth mode** in **Settings**, refresh, and try a stronger connection.

Frequently asked questions

Is it free? Some courses are free and some are paid. The course card shows **FREE** or **PAID**.

Who can see my profile? You choose under **Profile visibility**.

Can I use it on my phone? Yes. You can also add it to your home screen.

Seeking help

Ask **Loop**, use **Page Help**, message your instructor or organisation, or use **Report a concern** for something wrong with a profile or person. For account problems, see **Getting help** at the end of this manual.

Glossary

AAICBI
Africa's AI Capacity Building Initiative, organised by Futybills Tech Community. The AAICBI Ecosystem is the platform where learning, training organisations, employers, investors and startups meet.

Account type
The kind of account you create: Trainee, Training Organisation, Employer, Investor or Startup founder. You choose it on the **Join** page.

Alert / notification
A short message in the bell menu (and sometimes on your phone) that tells you something happened, such as a reply, a decision or a challenge.

Arena (Ayakbi Arena)
The two-player question game and course chat. It only appears for a course when the AAICBI team has switched it on.

Cohort
A group of trainees who study a course together. Cohorts are managed inside a course.

Course (programme)
A set of modules and lessons, with assessments, that trainees enrol in.

Dashboard
Your home page after signing in. It shows what needs your attention.

Enrolment
A trainee's place in a course. A trainee can only see the courses they are enrolled in.

Fastest Fingers
A quick question an instructor posts in a course chat. The first correct answers earn credits.

Feed
The public stream of posts from members and organisations.

Game session / match
One game of Ayakbi Arena between two trainees.

Gaming Studio
The platform's tool for building games. It belongs to the AAICBI team only and is not available to training organisations or trainees.

Handle
The short public address of a profile, such as `@your-name`.

Leaderboard / ladder
A ranking of players in a course by their game results.

Loop

The friendly guide character found on pages. Loop answers questions about using the platform and can take you to the right page.

Moderation

Keeping play and chat fair: warning, restricting, removing messages or ending a game, always with a reason.

Organisation role

What a team member may do in a training organisation: Owner, Manager, Editor or Viewer.

Seat

A place in your organisation's plan for one active trainee.

Verification

Confirming your email address by opening the link in the message we send you.

Getting help

The pages this manual describes do not publish a support email address or phone number, so none is printed here. Use the in-platform options below.

Support contact — to be confirmed by AAICBI before distribution. Insert the approved help email, phone or support page here.

Until the contact details are confirmed, you can get help without leaving the platform:

- Open the round **Loop** button on any page and type your question. Loop knows the pages and can take you to the right one.
- Use **Page Help** (bottom of the left menu on a computer) for help about the page you are on.
- **Training organisations:** open **Settings** and use **Support → Message the Super Admin**: type a **Subject** and **Your message**. It goes straight to the AAICBI Super Admin's inbox.
- **Trainees:** use **Messages** to write to your instructor or organisation about something in your course, and **Report a concern** (More menu) if something is wrong with a profile or person.

Document information and revision history

Item	Detail
Document	AAICBI Ecosystem User Manual
Version	1.0
Published	20 October 2026
Prepared for	Training organisations and trainees
Basis	The AAICBI Ecosystem as it runs in the organisation's own environment on the date above. Features that are planned but not available are not described as available.
Screenshots	Real screens captured at 1440 × 900 (computer) and 390 × 844 (phone) from a test environment with demonstration accounts and sample data. Names, courses and numbers are examples only.

Version	Date	Change
1.0	20 October 2026	First edition.

Screens change as the platform improves. If a screen differs from a figure in this manual, the written steps and labels still describe the same task; please report the difference using the contact details to be confirmed by AAICBI.
